What is WM Doing to Help Keep Recycling Programs Sustainable?

Commitment to Post-Consumer Content

WM is the only company in the waste industry to sign on to the Association of Plastic Recyclers Demand Champion Program. Demand Champions commit to drive use of post-consumer recycled content in durable goods, such as waste carts, in an effort to expand the market for mixed residential plastics, thereby boosting recycling programs.

**Investing in the Future Now**

Over three decades we have invested more than \$1 billion in recyclables processing infrastructure alone, including more than \$220 million over the past two years in capital investments in our Material Recovery Facilities (MRFs). By 2023, 93 percent of all single stream recycled materials will be processed in new or upgraded MRFs with cutting edge recyclables processing technologies that maximize outbound quality of recyclable materials while minimizing operating expenses.

Educating Our Communities

WM has made a significant investment in our Recycle Right education program, which provides tailored tools for everyone from residents to businesses to educators as well as our government agencies on how to Recycle Right. Our investments in Recycle Right have helped reduce contamination by 30% over the past year.

WE ARE GROWING RECYCLING

Limiting Plastic Exports

Nearly 80 percent of paper and plastic recyclables WM collects are sold to domestic markets for processing and no plastics collected on our routes and processed at our single stream MRFs are sent outside North America. This limits export of plastics to countries that are not well-equipped to properly handle the materials. Sending plastic to such markets increases the likelihood of more plastic entering rivers, waterways, and oceans.

Partnerships to Forge the Path Ahead
WM's recycling partnerships help educate legislators, regulators, and the public on ways public policy can maximize the environmental benefits of recycling. Key partnerships include The Recycling Partnership, a nonprofit organization that works with government entities to implement effective programs; Keep America Beautiful, which works with local communities to help teach the fundamentals of recycling; and industry associations such as the National Waste and Recycling Association. These partnerships are important means to the sustainability of recycling over the long term.

A Better Solution for Organics

One-third of food goes uneaten across the globe and wasted food can add billions of tons of GHG emissions to the atmosphere. WM continues to utilize new technologies to extract economic and environmental value from these organic materials. In 2018, we processed more than 3.3 million tons of source-separated organic materials, including food waste and yard trimmings, which goes to facilities that create renewable energy or marketable compost and soil amendment products.

**ADDENDUM TO
PROFESSIONAL SERVICES AGREEMENT FOR
RECYCLING SERVICES**

This Addendum (the "Addendum") is incorporated into City Contract No. 7531
(Professional Services Agreement for Recycling Services) (the "Contract").

1. **QUANTITY AND QUALITY:** During the term of the Contract, WM shall accept and City agrees to deliver City Single Stream Materials. City Single Stream Materials means materials collected by or on behalf of City from residents and entities in the City which have been source-separated from solid waste for the purpose of being recycled. Single Stream Materials includes both Recyclables and Non-Recyclables, as defined in Exhibit A of this Addendum. City will provide the Single Stream Materials in accordance with Exhibit A ("Specifications"). Single Stream Materials specifically exclude, and City agrees not to deposit or permit the deposit for collection of, any waste tires, radioactive, volatile, corrosive, flammable, explosive, biomedical, infectious, bio-hazardous, regulated medical or hazardous waste, toxic substance or material, as defined by, characterized or listed under applicable federal, state, or local laws or regulations, or chemical or other properties that are deleterious or capable of causing material damage to any part of WM's property, its personnel or the public or materially impair the strength or the durability of WM's structures or equipment, or any materials containing information (in hard copy or electronic format, or otherwise) which information is protected or regulated under any local, state or federal privacy or data security laws, including, but not limited to the Health Insurance Portability and Accountability Act of 1996, as amended, or other regulations or ordinances or other waste not approved in writing by WM (collectively, "Excluded Materials"). Title to and liability for Excluded Materials shall remain with City at all times. Title to Single Stream Materials provided by City to WM is transferred to WM upon WM's receipt or collection unless otherwise provided in this Agreement or applicable law. WM reserves the right at its sole discretion upon notice to City to discontinue acceptance of any category of Recyclables as a result of market conditions related to such materials and makes no representations as to the recyclability of the materials which are subject to the Contract.
2. **PAYMENTS; CHARGES; ADJUSTMENTS:** Upon receipt of an invoice, City shall pay for the services furnished by WM in accordance with the Contract, as such charges may be adjusted over the term of the Contract as noted herein (the "Charges"). State and local taxes, if applicable, will also be added. WM shall pay City for amounts owed pursuant to Exhibit B of the Contract on or about the last day of the following month. WM reserves the right to increase the Charges payable by City (i.e., Base/Processing Fee and Contamination Charges) or reduce the rebate to City during the term to cover increased costs due to uncontrollable circumstances, including, without limitation, changes in local, state or federal laws or regulations, imposition of taxes, fees or surcharges or acts of God such as floods, fires, hurricanes and natural disasters. In the event WM adjusts the Charges as provided in this Section, City and WM agree that this Agreement as so adjusted will continue in full force and effect for the

Exhibit B - Addendum

remaining term. Any City invoice balance not paid within thirty (30) days of the date of invoice is subject to a late fee of 1.5% per month. In the event that payment is not made when due, WM retains the right to suspend service until the past due balance is paid in full. In the event that service is suspended in excess of fifteen (15) days, WM may terminate this Agreement for such default and recover any equipment and containers.

3. VALUE SHARE PAYMENT/CHARGES.

- a. Where the blended value of the City's Single Stream Materials is greater than the Base/Processing Fee, City's value share is 50% of the difference between the blended value and the Base/Processing Fee and Excess Contamination Charges. When the blended value is less than the Base/Processing Fee, City shall pay WM the difference between the Base/Processing Fee and the blended value, plus the Excess Contamination Charges. See example in Exhibit B of the Contract regarding how the calculation will be done.
- b. To calculate the blended value per ton of Single Stream Materials, (a) the percentage of each Recyclable and Non-Recyclable component set forth below contained in the City's Single Stream Materials, as established and revised by quarterly audits, is multiplied by the current value of each commodity set forth below; and (b) Each commodity value per ton is added together to obtain the blended value per ton. City acknowledges that the value of a commodity may be negative.
- c. CPI Adjustment. WM has the right to adjust the Base/Processing Fee, Transfer Station Fee and Excess Contamination Charges on each anniversary of the Contract ("Anniversary Date"). Such CPI adjustment shall be effective on such Anniversary Date and shall be recalculated and effective each Anniversary Date thereafter. The CPI adjustments shall be based on the percentage increase in the CPI for the twelve (12) month period ending two months prior to the Anniversary Date. "CPI" means the Consumer Price Index-All Urban Consumers (CPI-U), Water, Sewer, and Trash Collection (WST), (Not Seasonally Adjusted, 12-month rolling average) as published by the United States Department of Labor, Bureau of Labor Statistics (1982-1984=100). In the event this CPI is no longer viable or no longer reflective of consumer prices in City's geographic region, another consumer pricing index or method of adjustment may be used as a replacement for the CPI, subject to the mutual agreement of the parties. Failure by WM to submit such CPI price adjustment shall not preclude the retroactive implementation of such adjustment as of the Anniversary Date.
