2025-2027 Consolidated Plan

Housing & Community Development Division

This document outlines the City of Cheyenne’s strategic vision and action plan for housing and community development, for the Plan Period: July 1, 2025 – June 30, 2027

Date of Publication: June 9, 2025

Website: [Housing & Community Development Division – City of Cheyenne](https://www.cheyennecity.org/housing-and-community-development)

For questions or additional information, please contact the Housing & Community Development Division at (307) 637-6255 or email agorbey@cheyennecity.org

Executive Summary

ES-05 Executive Summary - 24 CFR 91.200(c), 91.220(b)

1. Introduction

A Housing and Urban Development (HUD) Consolidated Plan (Con Plan) is a framework to assist communities in identifying housing and community development priorities that focus and align funding from the Community Planning and Development formula block grant. The City of Cheyenne (City) has received Community Development Block Grant (CDBG) funding from HUD since the 1970's. HUD requires that Entitlement Cities, which is a city designated by HUD to receive formula grant funds, must submit a Con Plan every three to five years. The Consolidated Plan is carried out through Annual Action Plans, which provide a concise summary of the actions, activities, and the specific federal and non-federal resources that will be used each year to address the priority needs and specific goals identified by the Con Plan. Grantees report on accomplishments and progress toward Consolidated Plan goals in the Consolidated Annual Performance and Evaluation Report (CAPER).

The City of Cheyenne will complete the 2020-2024 Con Plan on June 30, 2025. The proposed 2025-2027 Con Plan reflects the City's priority needs, goals and strategies that have been identified through consultations and citizen participation from July 2024 through May 2025. The plan is prepared in accordance with [24 CFR part 91](#), which describes needs, resources, priorities and proposed activities to be undertaken with respect to HUD programs, including the CDBG program. An approved consolidated plan means that it has been approved by HUD in accordance with [24 CFR part 91](#).

2. Summary of the objectives and outcomes identified in the Plan Needs Assessment

The objectives and outcomes outlined in the Needs Assessment section of the plan include investments in public facility and neighborhood improvements within low- to moderate-income neighborhoods. Public service needs are a high priority, and the City has set a goal to use CDBG funds to support initiatives such as domestic violence shelters, transitional housing, and public facilities that serve or house elderly or disabled residents. Additional priorities include food and health services—particularly those supporting vulnerable populations such as the elderly and disabled, as well as employment training programs that provide low- to moderate-income Cheyenne residents with opportunities in fields such as construction, trades, healthcare, or information technology.

For the 2025-2027 Consolidated Planning period, all funded activities are required to meet the *HUD National Objective* of benefiting low- and moderate-income (LMI) persons. At least 70% of CDBG funds must be used to benefit LMI individuals. Qualifying activities under this objective include public services, housing assistance, and infrastructure improvements that serve areas where at least 51% of residents are low- or moderate-income.

Additionally, activities must meet one of the following eligible objectives and outcomes in the 2025-2027 Consolidated Plan:

Objectives:

- Create a sustainable living environment
- Provide supportive services for low-income and special needs populations
- Create economic opportunities

Outcomes:

- Affordability
- Availability/Accessibility

These objectives reflect the City's commitment to addressing a broad range of community needs, from infrastructure and public facility improvements to job training and support services.

3. Evaluation of past performance

The City has conducted a thorough evaluation of its performance during the previous Con Plan period to inform the goals and priorities for the 2025–2027 Con Plan. Our objective is to set achievable goals that fully comply with HUD requirements and ensure timely expenditure of CDBG funds.

During the 2020–2024 planning period, the City set goals to rehabilitate existing homes and add two new housing units; however, unforeseen challenges impeded progress toward these goals. CDBG funds were allocated to Habitat for Humanity of Laramie County (Habitat) for home acquisition and rehabilitation, but this initiative faced setbacks due to environmental issues, administrative capacity constraints, and shifting priorities within the affiliate. Similarly, Habitat was awarded CDBG funds for its Home Repairs program to assist LMI homeowners, but environmental requirements, a shortage of Sam.gov-registered contractors, and staffing turnover led to the return of these funds. After consulting with the City, Habitat decided to pause its CDBG applications for several grant cycles to focus on the

Pronghorn Crossing housing development project.

In the most recent grant cycle, there were no applications for rehabilitation or acquisition activities. In response to these trends, the City strategically shifted its focus from housing rehabilitation and acquisition goals to prioritizing public facility, infrastructure, and neighborhood improvements in LMI areas. This approach will remain in place until new development partners are identified and engaged, maximizing the impact of CDBG funds and building local capacity for future initiatives.

Despite the challenges in housing rehabilitation, CDBG funds were successfully utilized during the 2020–2024 Con Plan period to address a range of community needs. These included improvements to domestic violence shelters, senior centers, a women's dormitory at a local homeless shelter, the acquisition of a public facility to support LMI families with mortgage assistance and financial literacy, and accessibility enhancements to neighborhood parks serving low-and moderate-income residents.

4. Summary of citizen participation process and consultation process

The City is committed to fostering an inclusive and transparent process for developing its 2025-2027 Con Plan. To ensure that all residents, public agencies, and interested parties have ample opportunity to contribute their insights and feedback, the City has established a comprehensive Citizen Participation Plan. This plan can be viewed on the City's Housing & Community Development Division webpage, under the "Learn More About: Plans" tab. [Housing & Community Development Division – City of Cheyenne](#)

The 2025-2027 Con Plan will be made widely accessible to the public through various channels during the 30-day comment period from **Monday, June 9, 2025, to Tuesday, July 8, 2025**. A summary of the plan will be published in local newspapers, providing an overview of its content and purpose. The full plan will be available at the following locations:

- **Online:** An electronic version of the full document will be available for review on the City's Housing & Community Development Division webpage, under the "Learn More About: Plans" tab.
- **Laramie County Library:** A printed copy is available at the Laramie County Library, 2200 Pioneer Ave, 3rd Floor, Cheyenne, WY 82001.
- **City of Cheyenne Municipal Building:** Printed copies are available at the City of Cheyenne Municipal Building, 2101 O'Neil Ave., Cheyenne, WY 82001, in the Clerk's and the Mayor's Office.

To facilitate direct engagement with the community, the City held two public meetings during the plan's development phase. These meetings were accessible via Zoom and served as forums for residents to voice their opinions, ask questions, and provide valuable input. Additionally, the City will hold one public hearing and one public meeting during the required 30-day comment period. During this time, community members can submit feedback on the proposed plan, either in writing or orally at the public hearing. This extended period ensures that all stakeholders have sufficient time to review the document thoroughly and provide thoughtful responses.

The City values the input of its residents and is committed to carefully considering all comments received during the participation process. The final plan will incorporate relevant feedback, and a summary of all comments will be attached to the document. In cases where certain suggestions are not incorporated, the City will provide explanations for these decisions, maintaining transparency throughout the process.

By implementing this comprehensive Citizen Participation Plan, the City aims to create a three-year plan that truly reflects the needs and aspirations of our community, ensuring that the 2025-2027 strategic vision aligns with the collective interests of all residents.

5. Summary of public comments

Upon completion of the public comment period, and in accordance with the regulations set forth in 24 CFR Part 91, a final summary reflecting the comments received will be included. The comment period for the 2025-2027 Con Plan is **Monday, June 9, 2025, to Tuesday, July 8, 2025.**

6. Summary of comments or views not accepted and the reasons for not accepting them

Upon completion of the Public Comment period, in accordance with the regulations set forth in 24 CFR Part 91, a summary which includes a description of the comments received and an explanation of how they were considered or, if not accepted, the reasons for non-acceptance will be included. (24 CFR § 91.105).

7. Summary

Upon completion of the public comment period, and in accordance with the regulations set forth in 24 CFR Part 91, a final summary reflecting the comments received will be included.

The Process

PR-05 Lead & Responsible Agencies 24 CFR 91.200(b)

1. Describe the agency/entity responsible for preparing the Consolidated Plan and those responsible for administration of each grant program and funding source

The following are the agencies/entities responsible for preparing the Consolidated Plan and those responsible for administration of each grant program and funding source.

Agency Role	Name	Department/Agency
Lead Agency	CITY OF CHEYENNE	
CDBG Administrator	CITY OF CHEYENNE	Housing & Community Development Division
HOPWA Administrator		
HOME Administrator		
HOPWA-C Administrator		

Table 1 – Responsible Agencies

Narrative

The City of Cheyenne serves as the lead agency overseeing the development of the 2025–2027 Consolidated Plan (Con Plan) through its Housing & Community Development Division (H&CD). H&CD staff administer grants for eligible activities that support Con Plan goals and objectives, leveraging partnerships with local nonprofits, housing providers, and social service agencies to maximize impact. H&CD ensures that CDBG funding will be used to support the plan goals: to support public facility and neighborhood infrastructure improvements, job training, and essential public services.

PR-10 Consultation - 91.100, 91.110, 91.200(b), 91.300(b), 91.215(I) and 91.315(I)

1. Introduction

The PR-10 Consultation Section provides an overview of how the City developed its 2025–2027 Con Plan for the U.S. Department of Housing and Urban Development (HUD). It describes the City's process for gathering community input, working with stakeholders, and using public feedback to guide its strategy for community development. This section explains the methods used to collect input, identifies the main participants, and outlines the results that influenced the Con Plan to address housing and community needs over the next three years.

In preparing the Con Plan, the H&CD Division collected input from City departments, nonprofit organizations, and state agencies. The City contracted with the University of Wyoming's Center for Business and Economic Analysis (CBEA) to update the Analysis of Impediments to Fair Housing Study, which was last updated in 2020. In accordance with the Fair Housing Act, the Secretary requires that CDBG grantees administer all programs and activities related to housing and community development in a manner that affirmatively furthers the policies of the Fair Housing Act. As part of this certification process, grantees must complete an analysis of impediments to fair housing choice and take actions to overcome the effects of any impediments identified through that analysis. In summary, requirements for the analysis of impediments include assuming the responsibility of fair housing planning by conducting an analysis to identify impediments to fair housing choice within their jurisdictions; strongly encouraging grantees to annually update their analysis of impediments; taking appropriate actions to overcome the effects of any impediments identified through their analyses; and maintaining records reflecting the analyses and related actions.

CBEA conducted a comprehensive analysis of housing, population, demographic, workforce, and income data, among other datasets, to identify barriers to fair housing. This data-driven approach was combined with consultations focused on understanding local challenges to fair housing. Together, these consultations and analyses helped identify the community's fair housing needs and set clear goals for the Con Plan. This process ensured that the plan reflects the priorities of Cheyenne residents and supports the needs of low- and moderate-income (LMI) populations, with a focus on projects and strategies that have broad community support.

Provide a concise summary of the jurisdiction's activities to enhance coordination between public and assisted housing providers and private and governmental health, mental health and service agencies (91.215(I)).

H&CD staff regularly meet and communicate with housing providers such as My Front Door, Habitat for Humanity of Laramie County, Wyoming Housing Network, and the Cheyenne Housing Authority, and actively participate in the Laramie County Community Partnership Housing Task Force to strengthen

coordination between the City and these organizations. Additionally, the Community Development Manager (CDM) of the H&CD Division has conducted interviews and consultations with representatives from the Wyoming Department of Health Communicable Disease Division, HealthWorks, the Cheyenne Regional Medical Center Foundation, and the Community Action of Laramie County Crossroads Health Clinic. These efforts support needs assessments and help coordinate initiatives between the City and both public and private health, mental health, and service agencies.

Describe coordination with the Continuum of Care and efforts to address the needs of homeless persons (particularly chronically homeless individuals and families, families with children, veterans, and unaccompanied youth) and persons at risk of homelessness

The H&CD staff actively coordinate with the Wyoming Continuum of Care (CoC) to address the needs of homeless individuals and families, including chronically homeless persons, families with children, veterans, unaccompanied youth, and those at risk of homelessness. As a CoC member, the CDM regularly participates in meetings and collaborates with local agencies and service providers to strengthen the local response to homelessness.

In 2024, the CDM partnered with several organizations in Cheyenne to expand the Laramie County Point-in-Time (PIT) Count Committee. The CoC conducts the annual PIT Count each January, providing a snapshot of homelessness across Wyoming by counting individuals residing in homeless residential projects on a designated night. This initiative, held nationwide during the last 10 days of January, helps communities assess available resources and better understand the demographics and needs of those experiencing homelessness. The expanded collaboration led to two successful PIT Count events on January 25 and 26, 2025, significantly increasing participation and enhancing coordination among local service providers.

These efforts have improved the accuracy of homelessness data in Wyoming and strengthened the network of services for a wide range of vulnerable populations in Cheyenne. Additionally, in spring 2025, CDM participated in a three-part CoC forum focused on homelessness in Wyoming. This forum identified service gaps, gathered feedback on CoC priorities, and established benchmarks for progress. Such ongoing collaboration ensures the CoC can more effectively allocate resources and address the evolving needs of Wyoming communities.

Describe consultation with the Continuum(s) of Care that serves the jurisdiction's area in determining how to allocate ESG funds, develop performance standards and evaluate outcomes, and develop funding, policies and procedures for the administration of HMIS

The H&CD staff has not engaged in direct discussions with the State of Wyoming Continuum of Care (CoC) regarding the allocation of ESG funds for the jurisdiction. However, at a recent CoC Gap Analysis forum, the CDM proposed a post-Point-in-Time (PIT) Count debrief for all CoC members statewide, as

well as the sharing of PIT data among participating communities. These initiatives would facilitate collaborative data review, identify trends, and enhance strategies for addressing homelessness.

CDM also recommended establishing an annual meeting to assess performance benchmarks and discuss opportunities for improvement. These suggestions were well received by the CoC and may be included in the benchmarks for 2025-2026.

Additionally, the City's Economic Resource Administrator, who oversees the CDBG Program, participated as a member of the CoC's grant review committee and contributed feedback to the CoC on the grant review process.

2. Describe Agencies, groups, organizations and others who participated in the process and describe the jurisdictions consultations with housing, social service agencies and other entities

Please see the table below for detailed information on the consultations for the City's 2025-2027 Comprehensive Plan (Con Plan):

Table 2 – Agencies, groups, organizations who participated

1	Agency/Group/Organization	COMEA House and Resource Center
	Agency/Group/Organization Type	Services-homeless
	What section of the Plan was addressed by Consultation?	Homeless Needs - Chronically homeless Homeless Needs - Families with children
	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	The City consulted with Comea Shelter's Executive Director to discuss needs. Comea is expanding its capacity through ongoing construction to serve more unhoused individuals. The shelter provides emergency and transitional housing, private family rooms with case management, and daily meals. Their main need is operational funding, not construction support, and they do not plan to seek CDBG funds for new building projects until the currently funded projects are completed.
2	Agency/Group/Organization	Blue Foundation – Blue Boost Center
	Agency/Group/Organization Type	Financial Literacy and other services
	What section of the Plan was addressed by Consultation?	Anti-poverty Strategy

	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	The City consulted with the Blue Foundation's Blue Boost Center, whose Executive Director identified funding for a Case Worker as their top support need. The Center's mission focuses on stability, educational growth, and economic opportunity, providing resources and helping individuals achieve financial independence and a better quality of life.
3	Agency/Group/Organization	Laramie County Senior Services
	Agency/Group/Organization Type	Services-Elderly Persons
	What section of the Plan was addressed by Consultation?	Housing Need Assessment Anti-Poverty Strategy
	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	The City consulted with the Executive Director of the Cheyenne Senior Center, who stated that they did not have a priority need for Community Development Block Grant (CDBG) funds. The Senior Center is currently undergoing a transition, with its governance being transferred from the Cheyenne Housing Authority to a newly established non-profit organization that will be owned by Laramie County.
4	Agency/Group/Organization	Habitat for Humanity of Laramie County
	Agency/Group/Organization Type	Housing
	What section of the Plan was addressed by Consultation?	Housing Need Assessment
	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	The City works closely with Habitat, which is developing 12+ units at Pronghorn Crossing in North Cheyenne. The City secured \$1.8 million in state funds to extend water and sewer lines for the project. Due to Habitat's shift from rehabilitation to new construction and ongoing staffing and budget constraints, the City's 2025-2027 Consolidated Plan excludes rehabilitation goals. Both organizations remain committed to addressing Cheyenne's housing needs through ongoing collaboration and strategic planning.

5	Agency/Group/Organization	Community Action of Laramie County
	Agency/Group/Organization Type	Services - Housing Services-Persons with Disabilities Services-homeless Services-Health
	What section of the Plan was addressed by Consultation?	Homeless Needs - Chronically homeless Homelessness Needs - Veterans Non-Homeless Special Needs
	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	The City of Cheyenne consulted with Community Action of Laramie County (CALC), whose services include case management, veterans housing, and, through the Crossroads Healthcare Clinic, medical, mental health, and substance abuse treatment for the homeless. CALC highlighted the need for ADA-compliant infrastructure at their facilities.
6	Agency/Group/Organization	Local Domestic Violence Shelter
	Agency/Group/Organization Type	Services-Victims of Domestic Violence
	What section of the Plan was addressed by Consultation?	Homeless Needs - Families with children
	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	The City consulted with the Executive Director of the local domestic violence shelter, who reported rising utility costs—especially from Black Hills Energy—and a need for emergency funds for victims. The shelter struggles to maintain its large facility year-round due to these expenses.
7	Agency/Group/Organization	Magic City Enterprises
	Agency/Group/Organization Type	Services - Housing Services-Persons with Disabilities
	What section of the Plan was addressed by Consultation?	Housing Need Assessment Non-Homeless Special Needs

	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	The City consulted with Magic City Inc., a Title XIX provider in Cheyenne, who identified a need for more housing units to support independent living for clients with disabilities. Magic City Inc. is working with Habitat on a joint multi-unit housing project and highlights the need for local infrastructure improvements near the proposed site. Magic City plans to seek CDBG funding for this effort during the 2025-2027 Consolidated Planning period.
8	Agency/Group/Organization	Equal Justice Wyoming Foundation
	Agency/Group/Organization Type	Services-Elderly Persons Services-Persons with Disabilities Services-Victims of Domestic Violence Services-homeless Service-Fair Housing Services - Victims Other government - State Foundation
	What section of the Plan was addressed by Consultation?	Anti-Poverty Strategy Legal Services
	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	The City consulted with the Equal Justice Wyoming Foundation (EJWF) and Equal Justice Wyoming to address Wyoming's critical need for civil legal services. EJWF, committed to equal access to justice, provides grants and collaborates with state organizations to strengthen legal support for all residents. Priority needs include family law (especially domestic violence), eviction risk, financial issues, and the impact of losing the ERAP program, all intensified by high post-pandemic housing costs.
9	Agency/Group/Organization	Climb Wyoming
	Agency/Group/Organization Type	Services-Education Services-Employment
	What section of the Plan was addressed by Consultation?	Housing Need Assessment Economic Development Anti-Poverty Strategy Job Training

	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	The City consulted with Climb Wyoming, an organization serving low-income single mothers—primarily those earning 30–40% of the Area Median Income (AMI), who face significant housing challenges due to a shortage of affordable units. Climb provided data to support the importance of career training programs for LMI mothers and advocated that employment training be included in the Con Plan as a goal.
10	Agency/Group/Organization	Recover Wyoming
	Agency/Group/Organization Type	Services-homeless
	What section of the Plan was addressed by Consultation?	Homeless Needs - Chronically homeless Anti-Poverty Strategy
	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	The City’s consultation with Recover Wyoming highlighted the Path Program, which helps prevent evictions by providing rental assistance to low-income clients with mental health diagnoses. In January 2024, the program served 60 clients, demonstrating its positive community impact. The consultation underscored the importance of prevention of eviction, mental health support for housing stability, and expanding partnerships when setting future priorities for Cheyenne’s Consolidated Plans.
11	Agency/Group/Organization	HealthWorks
	Agency/Group/Organization Type	Services-Health
	What section of the Plan was addressed by Consultation?	Homelessness Strategy Anti-Poverty Strategy Health
	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	The City’s consultation with the CEO and CFO of HealthWorks for the Con Plan identified a need for facility rehabilitation, especially sidewalk improvements at HealthWorks’ new location and a critical need for language interpretation services to improve healthcare access for LMI clients.
12	Agency/Group/Organization	Laramie County Community College
	Agency/Group/Organization Type	Services-Education

	What section of the Plan was addressed by Consultation?	Economic Development Workforce Development
	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	The City consulted with the Manager of Laramie County Community College's Adult Career and Education System (ACES) Program, which provides free individualized instruction and high school equivalency preparation for students 16 and older, serving about 500 students annually. The ACES Manager expressed interest in applying for CDBG funds to support two new initiatives: a digital curriculum software subscription for over 300 students and a free digital literacy program.
13	Agency/Group/Organization	City of Cheyenne Community, Recreation & Events Department
	Agency/Group/Organization Type	Other Government - Local Grantee Department
	What section of the Plan was addressed by Consultation?	Economic Development
	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	The City consulted with the Director of the Community Recreation and Events Department about the need to replace outdated playground equipment in LMI neighborhoods, as many of these playgrounds are over 20 years old and are not ADA compliant. Although the City can maintain existing equipment, it lacks dedicated funds for replacements.
14	Agency/Group/Organization	Wyoming Independent Citizen Coalition
	Agency/Group/Organization Type	Community Advocacy Neighborhood Organization
	What section of the Plan was addressed by Consultation?	Homelessness Strategy Economic Development Community beautification projects in LMI areas

	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	The City consulted with members of the Wyoming Independent Citizen's Coalition (WICC), a Cheyenne-based nonprofit advocating for underserved groups, who has worked with the City to identify key needs for low-to-moderate income residents, especially on Cheyenne's south side. Their input shaped the 2025-2027 Con Plan, to include area benefit programs for LMI neighborhoods.
15	Agency/Group/Organization	City of Cheyenne, Engineering Department
	Agency/Group/Organization Type	Other government - Local
	What section of the Plan was addressed by Consultation?	Public Safety
	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	The H&CD staff consulted with the Traffic Engineer from the City's Engineering Department to learn about traffic safety needs, particularly the Safe Routes to School (SRTS) Initiative and to determine which schools in qualified census tracts or block groups needed SRTS improvements.
16	Agency/Group/Organization	Family Promise Cheyenne
	Agency/Group/Organization Type	Services - Housing Services-Children Services-Victims of Domestic Violence Services-homeless
	What section of the Plan was addressed by Consultation?	Housing Need Assessment Homeless Needs - Families with children Anti-poverty Strategy
	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	The City consulted with Family Promise's Executive Director, who reported a rising demand for rental, security deposit, and utility assistance. Despite partnerships, requests continue to grow, a need recognized by multiple community organizations.
17	Agency/Group/Organization	Unaccompanied Student Initiative
	Agency/Group/Organization Type	Services-Children Services-homeless
	What section of the Plan was addressed by Consultation?	Homeless-Unaccompanied youth

	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	The City of Cheyenne consulted with the Unaccompanied Student Initiative (USI) about youth homelessness. USI's Executive Director emphasized the need for a new building to expand housing for homeless youth. Although USI is not applying for funding this grant cycle, they plan to seek future funding and public service support to grow their services in Cheyenne.
18	Agency/Group/Organization	Wyoming Coalition for the Homeless
	Agency/Group/Organization Type	Services-Homeless
	What section of the Plan was addressed by Consultation?	Homeless Needs - Chronically homeless
	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	The City consulted with the Wyoming Coalition for the Homeless, which operates the Welcome Mat Day Shelter, to discuss the shelter facility maintenance needs. The agency's leaders highlighted the need for facility improvements to the flooring, shower area and kitchen area. Although this organization did not apply for the 2025 grant cycle, they are considering future applications.
19	Agency/Group/Organization	Laramie County Community Partnership
	Agency/Group/Organization Type	Services-Health Civic Leaders
	What section of the Plan was addressed by Consultation?	Community Needs Assessments
	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	The City of Cheyenne consulted with the Laramie County Community Partnership (LCCP) and participates on the LCCC Housing Task Force. Discussions and upcoming data highlight affordable housing as the city's top priority, with a focus on increasing affordable units and addressing related policy and tenant concerns.
20	Agency/Group/Organization	State of Wyoming, Wyoming Business Council
	Agency/Group/Organization Type	Services - Broadband Internet Service Providers Services - Narrowing the Digital Divide Other government - State

	What section of the Plan was addressed by Consultation?	Economic Development
	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	The City consulted with the Wyoming Business Council's Broadband Manager, who stated that expanding broadband wiring and connections for low- and moderate-income (LMI) households would significantly increase access to essential services. This expansion would directly enable opportunities for work, education, and telehealth—including remote health monitoring options for vulnerable populations. Regarding broadband internet service providers serving the jurisdiction, the Broadband Manager also noted that increased competition among providers will help lower the cost of internet service for consumers.
21	Agency/Group/Organization	Cheyenne Police Department
	Agency/Group/Organization Type	Other government - Local
	What section of the Plan was addressed by Consultation?	Homeless Needs - Chronically homeless Homelessness Needs - Unaccompanied youth
	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	The City consulted with the Cheyenne Police Department to gather information about the unsheltered homeless population in Cheyenne. In January 2025, the CPD actively participated in the annual Point-in-Time (PIT) Count, joining groups of volunteers to interview individuals experiencing homelessness.
22	Agency/Group/Organization	City of Cheyenne, Compliance Department
	Agency/Group/Organization Type	Other government - Local
	What section of the Plan was addressed by Consultation?	Homeless Needs - Chronically homeless

	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	The H&CD Division consulted with the City's Compliance Department to gather information regarding the unsheltered homeless population in Cheyenne, as well as to assess the public health risks associated with homeless encampments. These risks include the presence of drug paraphernalia, discarded needles, and increased exposure to individuals sleeping outdoors.
23	Agency/Group/Organization	Cheyenne Fire & Rescue Department
	Agency/Group/Organization Type	Agency - Emergency Management Other government - Local
	What section of the Plan was addressed by Consultation?	Hazard Mitigation
	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	The H&CD Division consulted with Cheyenne Fire Rescue to gather information on hazard mitigation, natural hazards related to climate change, and effective mitigation strategies for the Cheyenne area.

24	Agency/Group/Organization	City of Cheyenne Engineering Department
	Agency/Group/Organization Type	Agency - Emergency Management Other government - Local
	What section of the Plan was addressed by Consultation?	Hazard Mitigation
	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	The H&CD Division consulted with the Stormwater Division Manager and City Drainage Engineer regarding hazard mitigation. CDBG funding may be allocated for minor infrastructure improvements during the Con Plan period, which could support larger stormwater projects.
25	Agency/Group/Organization	Wyoming Department of Health (WDH), Public Health, Communicable Disease Unit
	Agency/Group/Organization Type	Other government - State

	What section of the Plan was addressed by Consultation?	Services - Housing Services-homeless
	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	The City consulted with the WDH Housing Grant Manager about the HOPWA grant, Housing Opportunities for Persons with AIDS/HIV. The consultation resulted in sharing resources such as the City's 2025 updated AI study with the WDH.
25	Agency/Group/Organization	Wyoming Department of Health (WDH), Lead Prevention Program Manager
	Agency/Group/Organization Type	Other government - State
	What section of the Plan was addressed by Consultation?	Services-Children Public Safety
	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	The City consulted with the WDH Lead Prevention Program Manager about the lead exposure in Cheyenne and across the state. The consultation resulted in the incorporation of information about Statewide Lead prevention strategies and efforts in the Con Plan.
26	Agency/Group/Organization	Wyoming Housing Network (WHN)
	Agency/Group/Organization Type	Services-Housing Civic Leader
	What section of the Plan was addressed by Consultation?	Services-Housing
	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	The City consults with the Director of WHN on an ongoing basis. H&CD staff serves on the board of the WyoNAHRO board with the Director of WHN. The City is exploring future opportunities with WHN to support affordable housing development in Cheyenne. The City contributed \$150,000 in unused program income funds to a 2025 WHN multi-family housing project, Robin's Point apartments.

Identify any Agency Types not consulted and provide rationale for not consulting

Despite limited staff resources, the H&CD Division conducted thorough due diligence in consulting agencies and stakeholders serving low-to-moderate income residents for the Con Plan. We prioritized engagement with key stakeholders, community partners, and City departments. To further broaden input, we contracted with the University of Wyoming's Business and Economic Development Division to facilitate additional required consultations for the Analysis of Impediments to Fair Housing Study.

Other local/regional/state/federal planning efforts considered when preparing the Plan

Name of Plan	Lead Organization	How do the goals of your Strategic Plan overlap with the goals of each plan?
Continuum of Care	Wyoming Continuum of Care	The Wyoming Continuum of Care (WY CoC) and the City of Cheyenne's Consolidated Plan both focus on reducing homelessness and increasing affordable housing. WY CoC coordinates statewide housing and services for homeless individuals, while Cheyenne's plan supports agencies providing shelter, transitional, and rapid re-housing. Both prioritize essential services and aim to make homelessness rare, brief, and non-recurring, with Cheyenne also emphasizing the creation of decent, affordable living environments.

Table 3 – Other local / regional / federal planning efforts

Describe cooperation and coordination with other public entities, including the State and any adjacent units of general local government, in the implementation of the Consolidated Plan (91.215(l))

The H&CD staff works closely with state agencies and neighboring local governments to effectively implement its Consolidated Plan. Although there is no formal collaboration established specifically for the 2025-2027 plan, the City maintains ongoing partnerships and continually seeks new opportunities to address community priorities.

This collaborative approach includes:

- Regular communication between the City's Economic Resource Administrator and CDBG Supervisor, and state departments
- H&CD staff participation in regional planning sessions, such as the CoC Gap Analysis Forums, PIT Count preparation meetings, and service on the WyoNAHRO Board
- Sharing resources, including data, knowledge of federal regulations and requirements, and information on available federal grants with local agencies

- Aligning local initiatives with broader state and regional priorities, such as supporting the Board of Public Utilities Lead-Free Initiative

The H&CD Division is proactive in identifying potential partnerships, monitoring relevant programs, engaging with local organizations, and exploring innovative ways to collaborate. This flexible strategy enables the City to adapt to changing needs and maximize the impact of its Con Plan for the benefit of all residents.

DRAFT

PR-15 Citizen Participation – 91.105, 91.115, 91.200(c) and 91.300(c)

1. Summary of citizen participation process/Efforts made to broaden citizen participation

The City's Citizen Participation Process for the 2025-2027 Consolidated Plan (Con Plan) is designed to ensure robust public involvement in developing the Community Development Block Grant (CDBG) program. This process encourages citizen engagement from the outset, clearly outlining procedures for community approval of both the Con Plan and the Annual Action Plan (AAP), as well as methods for addressing concerns and amending plans after approval. The H&CD Division's Advisory Council leads the citizen participation process, conducting public hearings and collecting public comments to ensure meaningful community input.

The Citizen Participation Process plays a critical role in goal-setting for the CDBG program by prioritizing community needs. Through public hearings, comment periods, and targeted outreach efforts, citizens provide valuable feedback on the Con Plan and AAP, directly influencing how CDBG funds are allocated to address local priorities such as housing, public improvements, and essential services for low- and moderate-income residents. To enhance outreach and engagement, the City's H&CD Division has implemented strategies including hosting lunch and learns, collecting survey data, conducting in-person surveys, targeting hard-to-reach populations, and leveraging technology to provide virtual access to meetings. This comprehensive process ensures that the goals established in the Consolidated Plan are relevant, realistic, and achievable, aligning with HUD National Objectives while reflecting the community's priorities.

Table 4 – Citizen Participation Outreach

Needs Assessment

NA-05 Overview

Needs Assessment Overview

Cheyenne, Wyoming, has seen steady population and economic growth over the past two decades, with a 3% population increase from 2009 to 2020 and median household income projected to rise from \$58,219 to \$77,176 by 2025. Despite these gains, the city faces persistent housing challenges, especially for low- and moderate-income (LMI) residents, including a critical shortage of affordable housing affecting extremely low-income households (0–30% AMI) and those earning up to 80% AMI. Renters face higher overcrowding and cost burdens, while seniors and people with disabilities are disproportionately affected by the lack of accessible units.

Limited housing supply, high prices, and regulatory barriers contribute to these issues. Housing instability and homelessness risk are linked to severe cost burdens, overcrowding, and inadequate housing, with single-person and very low-income households particularly vulnerable. The aging housing stock and slow development worsen conditions, especially for seniors, people with disabilities, and racial and ethnic minorities.

Homelessness is increasing due to affordable housing shortages, inflation, and rising demand for shelter and transitional housing, affecting both local and transient populations. CDBG-funded efforts like the COMEA Shelter's Women's Dormitory expansion aim to increase shelter capacity. The H&CD Division prioritizes supporting shelters, improving healthcare access, expanding education and job training, increasing food and outreach services, and enhancing public facilities and infrastructure for LMI communities. For 2025-2027, the H&CD Division will strategically allocate CDBG funds to improve infrastructure and public facilities and strengthen partnerships with stakeholders including the Wyoming Continuum of Care, City Departments, and local non-profits.

NA-10 Housing Needs Assessment - 24 CFR 91.205 (a, b,c)

Summary of Housing Needs

Cheyenne, Wyoming's largest city and capital, has seen modest but steady growth over the past two decades. From 2009 to 2020, the population rose 3% (62,195 to 64,100) and households grew 10% (25,130 to 27,600). Median household income increased 18% from \$58,219 to \$68,611, and as of 2025, it is \$77,176. Despite this growth, low-to-moderate-income residents face persistent housing challenges, chiefly a shortage of affordable housing. As a result, 30,555 households spend over 30% of their income on housing, with 17,305 spending more than half.

Extremely low-income households (0–30% AMI) are especially affected; 33% of renters in this group spend over half their income on housing, and 3,430 residents face severe housing problems, such as cost burden, overcrowding, or substandard conditions. Overall, 15,600 households experience significant housing issues, with 87% of low-income renters and 90% of low-income homeowners being cost burdened. The lack of accessible units further impacts the elderly and disabled. These challenges mirror broader statewide trends of limited supply, high prices, and regulatory barriers, leading to economic and social consequences for Cheyenne, including reduced disposable income, business pressures, and workforce retention difficulties.

Demographics	Base Year: 2009	Most Recent Year: 2020	% Change
Population	62,195	64,100	3%
Households	25,130	27,600	10%
Median Income	\$58,219.00	\$68,611.00	18%

Data Source: Comments:

Describe the number and type of single-person households in need of housing assistance.

Single-person households in Cheyenne face significant housing challenges. According to HUD definitions, a single-person household is an individual living alone, including elderly, disabled, displaced, near-elderly, or other single adults—all eligible for HUD assistance. In Cheyenne, these households are primarily categorized as “Other” in the Needs Assessment tables.

Among households earning 0–30% of the Area Median Income (AMI), 4,265 experience housing problems, and 3,540 of these face severe cost burdens, spending more than half their income on housing. Additionally, 290 single non-elderly households are experiencing crowding, indicating that affordability issues are forcing some individuals into shared or substandard living conditions. These findings highlight an urgent need for affordable housing options specifically for single adults.

Estimate the number and type of families in need of housing assistance who are disabled or victims of domestic violence, dating violence, sexual assault and stalking.

In 2024–2025, Cheyenne’s domestic violence shelter has 52 beds and serves 50–60 clients per month, including children, with an estimated 600–720 individuals housed annually. The shelter serves a diverse population—including families, seniors, crime victims, and those with special needs—and provides wraparound services such as advocacy, legal support, and financial aid. In 2023–2024, the shelter assisted over 1,200 new or unduplicated individuals, delivering nearly 19,000 services and providing more than 12,000 bed nights—a 28% increase from the previous year. About one-third of clients were under 18.

Cheyenne’s disabled population is about 7% (8,222 people), with higher rates among older adults. Many face long affordable housing waitlists, and those on Supplemental Security Income (SSI) are particularly affected. In 2025, the maximum federal SSI income is \$11,604 per year, still below the poverty line. In Laramie County, 15.6% to 19.5% of people with disabilities, about 1,280 to 1,600 individuals, live in poverty. Research shows that rental assistance with supportive services is more cost-effective than the public costs of homelessness or institutional care.

What are the most common housing problems?

Extremely low-income households are facing the most severe housing challenges, including the highest rates of cost burden, severe cost burden, overcrowding, and substandard living conditions. In the area, more than 10,500 extremely low-income households are dealing with at least one serious housing problem. Renters in Cheyenne are particularly vulnerable, experiencing higher rates of overcrowding—2,930 renter households compared to just 875 owner households—and greater struggles with housing affordability. Single-person households, especially those with very low incomes, are at heightened risk for severe cost burdens and are more likely to reside in shared or substandard housing.

Are any populations/household types more affected than others by these problems?

Racial and ethnic minorities are disproportionately affected by housing problems. Nearly all extremely low-income American Indian, Alaska Native, and Asian households, as well as over 90% of extremely low-income Hispanic households, face at least one major housing issue, compared to about 86% of White non-Hispanic households. Additionally, people with disabilities and seniors encounter significant barriers to finding accessible and affordable housing, often facing long waitlists for public housing and vouchers. The need for public housing and vouchers in Cheyenne continues to grow, particularly for one- and two-bedroom units, underscoring the urgent demand for expanded affordable housing options in the community.

Describe the characteristics and needs of Low-income individuals and families with children (especially extremely low-income) who are currently housed but are at imminent risk of either residing in shelters or becoming unsheltered 91.205(c)/91.305(c)). Also discuss the needs of formerly homeless families and individuals who are receiving rapid re-housing assistance and are nearing the termination of that assistance

Family Promise of Cheyenne, Community Action of Laramie County, and organizations like the Comea Shelter participate in rapid re-housing and homeless prevention efforts. While specific data on the needs of those receiving rapid re-housing is lacking, local nonprofits report that clients often require supportive services such as childcare, job training, legal aid, and health services to overcome barriers to stable housing. Access to landlord mediation, legal assistance, and credit repair is also critical to preventing homelessness among low-income families. Tailored support and resource connections are essential, particularly for extremely low-income individuals and families at risk of losing their housing.

If a jurisdiction provides estimates of the at-risk population(s), it should also include a description of the operational definition of the at-risk group and the methodology used to generate the estimates:

The City's H&CD Division follows the HUD Continuum of Care program's definition of "at-risk" populations. This includes individuals or families who are likely to become homeless within 14 days and who lack the resources or support networks needed to secure other permanent housing. The definition also covers unaccompanied youth under 25, families with children experiencing housing instability, and individuals or families fleeing domestic violence or other dangerous conditions without safe alternatives.

To ensure a comprehensive understanding of local needs, the City incorporates recent data on "at-risk" populations from a variety of agencies and organizations. These include the local domestic violence shelter, Comea Shelter, Family Promise of Cheyenne, Community Action of Laramie County, Wyoming Department of Health, Recover Wyoming, Unaccompanied Student Initiative, the Cheyenne Housing Authority, and the CoC 2025 Point-In-Time Count.

Specify particular housing characteristics that have been linked with instability and an increased risk of homelessness

Several housing characteristics are strongly associated with instability and an increased risk of homelessness. A severe cost burden is a primary factor, occurring when households spend more than 50% of their income on housing and are left with limited resources for other essentials. Overcrowding, often defined as more than one person per room, is another indicator of instability and typically results from unaffordable rents and a lack of suitable housing options. Substandard housing conditions-such as units lacking complete kitchen or plumbing facilities, further contribute to unsafe and precarious living situations.

Other factors also play a significant role. Much of Cheyenne’s housing stock was built before 1980, raising concerns about ongoing safety, maintenance, and accessibility. Affordable housing tends to be concentrated in historically underserved neighborhoods, which can limit access to critical services and opportunities. These challenges disproportionately impact extremely low-income households, single-person households, racial and ethnic minorities, people with disabilities, and survivors of domestic violence. Additionally, long waitlists for public housing and housing vouchers underscore the shortage of affordable, stable housing options, increasing the likelihood of housing instability and homelessness.

NA-15 Disproportionately Greater Need: Housing Problems – 91.205 (b)(2)

Assess the need of any racial or ethnic group that has a disproportionately greater need in comparison to the needs of that category of need as a whole.

Introduction

Cheyenne's Housing Needs Assessment shows that minority groups, particularly American Indian/Alaska Native, Asian, Black, and Hispanic households, experience disproportionately greater housing problems compared to the population. Among extremely low-income households (0–30% of area median income), 100% of American Indian/Alaska Native and Asian households, and over 91% of Hispanic households, face at least one significant housing problem such as lacking kitchen or plumbing facilities, overcrowding, or severe cost burden.

These disparities persist, though to a lesser degree, in higher income brackets, with Black and multiracial households in the 30–50% AMI range and Hispanic households in the 50–80% AMI range also experiencing higher rates of housing problems than the citywide average for their income levels. Overall, the data highlights that minority households in Cheyenne are more likely to struggle with affordability, overcrowding, and substandard housing conditions.

These burdens are most pronounced among extremely low-income families and underscore the need for targeted housing interventions and resources to address persistent gaps faced by these vulnerable groups.

Housing Problems Table Data and Definitions

The four housing problems referred to in the charts in the Housing Problems sections are:

1. Lacks complete kitchen facilities
2. Lacks complete plumbing facilities
3. More than one person per room
4. Cost Burden greater than 30%

Date Source for Tables 9-12 (below) is from the 2016-2020 CHAS

In the context of HUD housing data, CHAS stands for Comprehensive Housing Affordability Strategy. It refers to special data tabulations that help analyze housing needs, especially for low-income households.

Table 16 - Disproportionally Greater Need 80 - 100% AMI

NA-20 Disproportionately Greater Need: Severe Housing Problems – 91.205 (b)(2)

Assess the need of any racial or ethnic group that has a disproportionately greater need in comparison to the needs of that category of need as a whole.

Introduction

The data included in the AMI tables included in the NA-20 Disproportionately Greater Need: Severe Housing Problems Section demonstrate that communities of color face more severe housing problems than White populations with similar incomes.

Among extremely low-income households (0–30% AMI), 100% of American Indian/Alaska Native and Asian households face severe housing problems, nearly 15 percentage points higher than White households in the same bracket. Hispanic households in this income category experience severe overcrowding at three times the rate of their White counterparts, while Black households in the 30–50% AMI range face severe cost burdens 22% more frequently. These disparities persist across moderate-income brackets, with minority groups consistently experiencing compounded challenges, including substandard housing, overcrowding, and cost burden, compared to citywide averages for their income levels. Data from the Severe Housing Problems by AMI Levels tables included in this section underscore how communities of color, particularly in southside neighborhoods with aging housing stock, face a disproportionately greater need.

Severe Housing Problems Table Data and Definitions

The four housing problems referred to in the charts in the Housing Problems sections are:

1. Lacks complete kitchen facilities
2. Lacks complete plumbing facilities
3. More than one person per room
4. Cost Burden greater than 30%

Date Source for Tables 13-16 is from the 2016-2020 CHAS. In the context of HUD housing data, CHAS stands for Comprehensive Housing Affordability Strategy. It refers to special data tabulations that help analyze housing needs, especially for low-income households.

0%-30% of Area Median Income

NA-25 Disproportionately Greater Need: Housing Cost Burdens – 91.205 (b)(2)

Assess the need of any racial or ethnic group that has a disproportionately greater need in comparison to the needs of that category of need.

Introduction:

The analysis of Housing Cost Burdens reveals persistent racial and ethnic disparities across AMI income levels, with minority households consistently spending disproportionate shares of income on housing. Among extremely low-income households (0-30% AMI), Hispanic and Black families face severe cost burdens at rates 15-20% higher than their White counterparts, while American Indian/Alaska Native households in moderate-income brackets (50-80% AMI) experience cost burdens at nearly double the citywide average for their income tier. These disproportionate burdens persist even as incomes rise, with minority groups in higher brackets still allocating larger portions of earnings to housing compared to non-Hispanic White households at similar income levels. The data underscores how affordability challenges compound for communities of color, particularly in southside Cheyenne which has limited affordable housing options.

Housing Cost Burden

Housing Cost Burden	<=30%	30-50%	>50%	No / negative income (not computed)
Jurisdiction as a whole	20,785	3,930	2,639	245

American Indian, Alaska Native	35	30	40	0
Pacific Islander	25	20	0	0
Hispanic	2,140	595	350	74

Table 21 – Greater Need: Housing Cost Burdens AMI

Data Source: 2016-2020 CHAS

NA-30 Disproportionately Greater Need: Discussion – 91.205(b)(2)

Are there any Income categories in which a racial or ethnic group has disproportionately greater need than the needs of that income category as a whole?

The analysis of the Table data reveals that there are income categories, as a whole, in which racial and ethnic groups have disproportionately greater housing needs compared to others in the same income bracket. According to data from the 2016–2020 American Community Survey (ACS) and the 2000 Census (Base Year), included in the Con Plan, American Indian/Alaska Native, Asian, Black, and Hispanic households consistently experience higher rates of housing problems, including cost burden, overcrowding, and substandard conditions, than the citywide average for their income levels.

In the extremely low-income category (0–30% AMI), 100% of American Indian/Alaska Native and Asian households, and over 91% of Hispanic households, face at least one housing problem, compared to 85.7% of White households. Similar disparities appear in other income brackets, such as Black households in the 30–50% AMI range and Hispanic households in the 50–80% AMI range.

If they have needs not identified above, what are those needs?

Hispanic workers in Wyoming and Cheyenne experience significantly higher unemployment rates than White workers. As of late 2023, Wyoming had the highest Hispanic-white unemployment ratio in the country, with Hispanic workers more than twice as likely to be unemployed as their White counterparts. These employment gaps, combined with lower educational attainment and ongoing racial and gender pay disparities, create economic instability and make it harder for minority populations to find stable housing.

In Cheyenne, minority communities—especially those living on the south side—face greater socioeconomic challenges, including higher poverty rates and less access to healthcare. These factors increase their risk of housing instability and homelessness. The findings are based on data from the 2016–2020 American Community Survey and the 2000 Census.

Are any of those racial or ethnic groups located in specific areas or neighborhoods in your community?

Cheyenne’s population is primarily White, accounting for about 75–81% of residents, with Hispanic or Latino individuals making up the largest minority group at 14–16%. Black or African American residents represent roughly 2.8–2.9%, Asian residents about 1.2%, and American Indian and Alaska Native about 0.8%. Individuals identifying with two or more races comprise about 10%. Approximately 3% of residents are foreign-born, and about 6% of households speak a language other than English at home.

The area around Francis E. Warren Air Force Base has a more varied racial and ethnic composition, including significant proportions of Black or African American, Asian, American Indian, and Hispanic or

Latino residents. Most households in this area speak only English, but a notable portion speak only Spanish.

Several neighborhoods in Cheyenne, especially in the south and near the Air Force base, have a high proportion of low- and moderate-income households. For example, in some block groups, the percentage of low- and moderate-income households ranges from about 55% to over 87%. The downtown area and many southern neighborhoods also have a significant presence of Hispanic residents, with some areas having Hispanic populations approaching 48%.

Census Tract 15.02, for instance, has a population of approximately 5,100, a median household income of about \$47,000, a poverty rate of 15%, and a median home value of \$190,000. The percentage of residents with at least a high school diploma is about 96%, and the median age is approximately 39.

Certain racial and ethnic groups in Cheyenne are concentrated in specific neighborhoods, with Hispanic residents mostly residing in the southern areas and White residents more prevalent in the north. The neighborhoods near the Air Force base and in the southern part of the city also have greater economic diversity and higher proportions of low- and moderate-income households.

NA-35 Public Housing – 91.205(b)

Introduction

The Cheyenne Housing Authority (CHA) provides low-income housing to residents of Cheyenne and runs a Section 8 housing voucher program, which subsidizes rent for tenants who have a private landlord. The family pays the difference between the total rent charged and the amount subsidized by the voucher. The CHA serves as the primary public housing authority for Cheyenne, owning and managing 341 public housing units, with 266 in Cheyenne and 75 in Laramie. In addition, the CHA administers 1,786 Housing Choice Section 8 Vouchers across multiple Wyoming communities, as well as specialized programs such as Veterans Assistance Supportive Housing (VASH) and Project-Based Section 8 Contract Administration, which supports 51 properties with over 2,100 rental units statewide.

The University of Wyoming Center for Business and Economic Analysis (CBEA) consulted with CHA's Director while preparing the updated Analysis of Impediments to Fair Housing for the City. Much of the information in the Needs Analysis- Public Housing Section (NA-35) is taken from CBEA's consultation with the CHA's Director.

The waitlist for housing vouchers has nearly tripled in the past three years, rising from approximately 1,000 to 3,100 applicants. Mr. Hancock, the Executive Director of the CHA, believes that the waitlist increase may be due to a falling number of participating private landlords/associated housing units and a "shortage" of vouchers. The landlord shortage may be the result of rising property and liability insurance premiums that are increasing because of reduced competition among insurance providers. Mr. Hancock suggests that one potential solution might be the establishment of an affordable housing trust fund in the state, although a proposal to create a trust fund in Wyoming died in committee in the 2023 legislative session. Additional options include expanding the use of Tax Increment Financing districts, allowing leases of state and federal lands to private developers, and encouraging property owners to restore abandoned buildings.

Table 3.2 below presents data on the characteristics of participants in the public housing and voucher programs in Cheyenne.

Section 504 Needs Assessment: Describe the needs of public housing tenants and applicants on the waiting list for accessible units:

All households that apply for housing assistance through the CHA are required to complete a pre-application that contains basic household and contact information and make clear the applicant's requested housing assistance program(s). Once this pre-application is completed, the household is placed on CHA's wait lists. Only 12% to 30% of households that submit a pre-application remain on the wait list and provide the more detailed information needed to qualify and receive the housing benefits provided through the CHA. Information on applicant household characteristics is relatively basic because the CHA currently does not have the required staff time or resources needed to gather more complete data on every household at the time of pre-application.

When a household moves up to the top of the wait list, the CHA contacts the household and collects the data required to complete a full application prior to being eligible to receive a voucher or sign a lease for a public housing unit. At that time, the CHA analyzes the collected household information to confirm household program eligibility to receive the housing benefit. The CHA collects information on accessibility needs during pre-application, but lacks comprehensive, up-to-date data until full applications are completed.

Despite this, the CHA recognizes a significant need for accessible units, especially for individuals with mobility, hearing, or visual impairments. Section 504 forbids organizations and employers from excluding or denying individuals with disabilities an equal opportunity to receive program benefits and services. It defines the rights of individuals with disabilities to participate in, and have access to, program benefits and services. The CHA complies with Section 504 by ensuring at least 5% of units in substantially renovated properties are accessible for mobility disabilities and 2% for hearing or visual disabilities. However, the current supply of accessible units is insufficient, particularly as the population ages and the waiting list grows. Most immediate needs are for one- and two-bedroom accessible units. The CHA provides reasonable accommodations and is considering improved tracking systems to better assess and address these needs, ensuring equal access for all applicants and residents.

Most immediate needs of residents of Public Housing and Housing Choice voucher holders

According to the CHA, an initial review of 35 pre-applications submitted in February 2025 found that 10 of the 35 pre-applicants (28%) requested units with stair rails, ADA units, ground level units (most common), or units with ramps. The current Housing Choice Voucher program wait list contains 2,560 households with a combined Public Housing plus Housing Choice Voucher wait list totaling 4,457 households.

The most recent data on the public housing wait list found that applicants requested:

- 805 one-bedroom units,
- 831 two-bedroom units,
- 204 three-bedroom units,
- 54 four-bedroom units, and
- 3 five-bedroom units.

The recent data from the CHA's pre-applications from February 2025 illustrates that the most immediate needs of residents of Public Housing and Housing Choice Voucher holders are to increase the availability of 1–2-bedroom units and to increase the number of available units that feature stair rails, ADA units, ground level units (most common), or units with ramps.

How do these needs compare to the housing needs of the population at large

The CHA primarily serves very low-income households, seniors, people with disabilities, and families in poverty, groups that often face severe cost burdens, require accessible or specialized housing, and experience long waitlists due to limited supply. Their needs are primarily for affordable, stable, and accessible housing, with many at risk of housing insecurity or homelessness. In contrast, the general Cheyenne population faces broader but less severe housing challenges. While affordability is a growing

concern citywide, especially for middle-income “workforce” households, these needs are not as urgent as those of the CHA beneficiaries.

DRAFT

NA-40 Homeless Needs Assessment – 91.205(c)

Introduction:

Assessing the homeless needs in Cheyenne, Wyoming for 2025 reveals a range of challenges and ongoing initiatives. The city's homeless population is on the rise and includes both residents and transient individuals and families. Efforts to expand shelter capacity are underway, exemplified by the Comea Shelter's recent expansion of its Women's Dormitory. Collaborative partnerships with stakeholders such as Wyoming CoC and local nonprofits are crucial for addressing homelessness in a coordinated and effective manner. Striking a balance between immediate shelter needs and long-term housing solutions will be essential, requiring the strategic use of federal, state, and local funding. Certain groups, particularly chronically homeless individuals—often affected by mental illness, substance abuse, or a history of incarceration—are especially in need of innovative housing strategies and supportive services.

Homeless Needs Assessment

Population	Estimate the # of persons experiencing homelessness on a given night		Estimate the # experiencing homelessness each year	Estimate the # becoming homeless each year	Estimate the # exiting homelessness each year	Estimate the # of days persons experience homelessness
	Sheltered	Unsheltered				
Persons in Households with Adult(s) and Child(ren)	0	77	77	0	0	0
Persons in Households with Only Children	0	0	0	0	0	0
Persons in Households with Only Adults	34	71	105	0	0	0
Chronically Homeless Individuals	24	19	43	0	0	0
Chronically Homeless Families	0	0	0	0	0	0
Veterans	0	16	16	0	0	0
Unaccompanied Child	2	12	28	28	21	0
Persons with HIV	0	1	1	0	0	0

Table 22 - Homeless Needs Assessment

**Data Source
Comments:**

The data for the "Sheltered estimate of homeless persons experiencing homelessness on a given night" column is sourced from the 2025 Sheltered PIT Count. An exception is the "Sheltered Unaccompanied Youth" field, where the number "12" was reported directly by the Unaccompanied Student Initiative (USI) through a consultation request. In the "Estimate the # experiencing homelessness each year" column, the figure "28" was also provided by USI via consultation. For the following columns-"Estimate the # becoming homeless each year," "Estimate the # exiting homelessness each year," and "Estimate the # of days persons experience homelessness each year"-no data was available beyond what was provided by USI.

Indicate if the homeless
population is:

Has No Rural Homeless

If data is not available for the categories "number of persons becoming and exiting homelessness each year," and "number of days that persons experience homelessness," describe these categories for each homeless population type (including chronically homeless individuals and families, families with children, veterans and their families, and unaccompanied youth):

- General Unsheltered Population Overview: Unsheltered individuals live in places not meant for habitation, such as streets, vehicles, or abandoned buildings. This population faces significant challenges, including chronic homelessness, mental health and substance use disorders, and limited access to healthcare and employment. They typically experience longer periods of homelessness and higher rates of physical and mental health conditions compared to sheltered populations.
- Chronically Homeless Individuals: Defined as those homeless for at least one year or with multiple episodes totaling 12 months, chronically homeless individuals often become homeless due to mental illness, substance abuse, and lack of affordable housing. Exiting homelessness usually requires intensive case management, supportive housing, and healthcare services. Their duration of homelessness frequently exceeds one year.
- Families with Children: This group includes parents or guardians with minor children who lack stable housing. Common contributing factors are economic hardship, domestic violence, and unaffordable housing. Rapid rehousing and supportive services are the primary strategies to help these families exit homelessness. Generally, the duration of homelessness is shorter than that of chronically homeless individuals.
- Veterans and Their Families: Veterans experiencing homelessness often struggle with PTSD, unemployment, and housing affordability. Programs like HUD-VASH play a critical role in assisting them to exit homelessness. The duration of homelessness varies, but targeted interventions aim to reduce it.

- Unaccompanied Youth: According to the 2025 PIT Count, there were two unsheltered unaccompanied youth and 12 sheltered youth, as reported by the Unaccompanied Students Initiative (USI), which provides housing support for students in need. All estimates for this group come from USI. No additional local data is available for unsheltered or sheltered youth in Laramie County.
- Data Gaps: The Homeless Needs Assessment Table for the unsheltered population in Cheyenne, WY, is based on the January 2025 PIT Count. Additional data for sheltered populations was provided by Unaccompanied Students Initiative and Comea Shelter Services.

Nature and Extent of Homelessness: (Optional)

Race:	Sheltered:	Unsheltered (optional)
White	62	20
Black or African American	5	6
Asian	1	0
American Indian or Alaska Native	7	5
Pacific Islander	1	0
Ethnicity:	Sheltered:	Unsheltered (optional)
Hispanic	6	0
Not Hispanic	66	0

The "Nature and Extent of Homelessness" table for Laramie County presents race and ethnicity data for both sheltered and unsheltered populations, based on the 2025 Wyoming Point-in-Time (PIT) Count reports. The Unaccompanied Student Initiative (USI) reported a total of 28 sheltered youths in Laramie County. Of these, 18 identified as white and 6 as Black or African American; 4 youth identified as Hispanic. No American Indian, Alaska Native, Asian, or Pacific Islander youth were reported among the sheltered population. - All estimates for sheltered youth were provided exclusively by USI, as no other local data sources were available for this group. These data reflect the demographic composition of unaccompanied youth experiencing homelessness in Laramie County, as captured by the USI during the 2025 PIT Count.

Data Source
Comments:

Estimate the number and type of families in need of housing assistance for families with children and the families of veterans.

The Cheyenne VA Healthcare System has housed 136 veterans experiencing homelessness in southeast Wyoming and northern Colorado so far, this fiscal year. Impressively, 96% of these veterans have not returned to homelessness. Additionally, 134 unsheltered veterans in the network have been engaged to ensure they have access to housing and other essential wraparound services.

According to an article from the Cheyenne Cap City News (September 24, 2024), and as reported at a March 2025 Laramie County Task Force meeting, local transitional housing is currently operating at 95-100% capacity, with a waiting list. Efforts are underway to secure additional housing, including collaboration with the Veterans Administration to potentially designate some transitional units specifically for veterans. However, this may reduce availability for others in need.

Describe the Nature and Extent of Homelessness by Racial and Ethnic Group.

Based on the 2025 PIT Count Results for Laramie County, unsheltered homelessness affects a total of 34 individuals, all of whom are adults. There were no reports of children or families experiencing unsheltered homelessness in this count. When examining the racial and ethnic breakdown, most unsheltered individuals are White, accounting for 20 out of the 34 people. Black, African American, or African individuals make up 6 of the unsheltered population, while 5 individuals identify as American Indian, Alaska Native, or Indigenous. Additionally, 3 individuals are Hispanic or Latina/e/o. Other racial and ethnic groups, such as Asian, Middle Eastern, Native Hawaiian, or Pacific Islander, were not represented in the unsheltered population.

Chronic homelessness is a significant component of the unsheltered population, with 24 individuals identified as chronically homeless. Of these, 16 are White, 4 are Black, African American, or African, 2 are American Indian, Alaska Native, or Indigenous, and 2 are Hispanic or Latina/e/o. This distribution closely mirrors the overall racial and ethnic breakdown of the unsheltered group.

Regarding where people are sleeping, many unsheltered individuals reported staying in abandoned structures (16 people) or on the streets and outdoors (15 people), while a smaller number (3 people) were sleeping in vehicles. Overall, the data reveals that unsheltered homelessness in Laramie County is primarily experienced by adults, with a notable presence of White, Black, and Indigenous individuals. Chronic homelessness is widespread within this group, and most are finding shelter in precarious locations such as abandoned buildings or outdoors.

Describe the Nature and Extent of Unsheltered and Sheltered Homelessness.

The nature and extent of unsheltered and sheltered homelessness in Laramie County are characterized by seasonal fluctuations and persistent gaps in available resources, underscoring the need for transitional housing and low-barrier shelters.

In the 2025 Laramie County Point-in-Time (PIT) Count, 34 individuals experiencing homelessness were surveyed. Of these, 24 were chronically homeless, and 16 reported a substance use disorder or serious mental illness. The survey's "Sleeping Locations" section revealed that 16 respondents were staying in abandoned structures, while 15 were sleeping on the streets. The Cheyenne Police Department noted that the number and locations of unsheltered individuals change frequently due to factors such as weather, police enforcement, and compliance activities. During the summer, about 80% of unsheltered individuals sleep outdoors; in winter, this drops to around 20%, with more people seeking shelter in low-cost hotels, the Comea Shelter, or any available indoor spaces.

The City's Compliance Department generally agreed with the PIT estimate of 34 unsheltered individuals, noting their own January estimate was around 30. However, they also acknowledged that the unsheltered population increases significantly in the summer, potentially reaching two to three times the January totals. Local nonprofits and service agencies report similar trends. The Compliance Department focuses on identifying encampment locations, addressing vagrancy, and ensuring property safety, rather than tracking individuals.

While conducting the PIT count in January provides the most accurate data on shelter bed use, it does not fully capture the year-round fluctuations in Wyoming's unsheltered population, which varies considerably due to harsh winters.

There is a clear need for transitional housing and low-barrier shelter programs, particularly for individuals exiting incarceration, struggling with addiction or mental health issues. Currently, the Comea Shelter cannot accept individuals with extensive criminal histories into their long-term housing programs. However, they are developing a plan, supported by a \$3 million grant proposal, to purchase an additional motel focused on individuals leaving prison or jail. This would provide 35 units for short- or long-term housing for people who are homeless or at risk (such as those exiting incarceration) once they secure employment, rather than requiring them to complete lengthy programs. Comea is working with the Department of Corrections and Laramie County Jail on this initiative and expects to know by the end of 2025 if funding is approved. If funded, the program could launch by mid-2026.

NA-45 Non-Homeless Special Needs Assessment - 91.205 (b,d)

Introduction

Non-homeless Special Needs populations in Cheyenne include a range of individuals who require additional support due to various challenges and vulnerabilities, as defined by HUD. These groups include frail and non-frail elderly individuals, who make up approximately 18% of Cheyenne's population, reflecting the city's significant senior demographic. Persons with physical disabilities represent another key segment, with an estimated 8.5% of residents under age 65, about 5,539 individuals, living with a disability, according to recent U.S. Census Bureau data. The special needs community also includes persons with serious mental illness, individuals experiencing homelessness or at risk of homelessness, and persons living with HIV, the majority of whom are male and white, with sexual transmission as the primary risk factor. Additionally, persons with extremely low income face unique housing and support challenges.

Describe the characteristics of special needs populations in your community:

In Cheyenne, WY, the following groups are recognized as special needs populations:

- Frail and Non-Frail Elderly Individuals: Approximately 18% of Cheyenne's residents are seniors aged 65 and older, according to the latest U.S. Census Bureau estimates. This significant portion of the population may require specialized housing, healthcare, and social services.
- Persons with Physical Disabilities: Based on U.S. Census Bureau data from 2019–2023, about 8.5% of Cheyenne residents under the age of 65 live with a disability. With a 2023 population estimate of 65,168, this equates to roughly 5,539 individuals under 65 who may need accessible facilities and supportive services.
- Persons with Serious Mental Illness: Individuals experiencing serious mental health conditions are a key special needs group, often requiring ongoing mental health services, supportive housing, and community resources.
- Individuals Experiencing Homelessness: People without stable housing face heightened vulnerability and often need coordinated support, including shelter, healthcare, and employment assistance.
- Persons Living with HIV: In Laramie County, most people living with HIV are male and white. These individuals may need specialized medical care and social support.
- Individuals At Risk of Homelessness: This group includes people whose living situations are unstable or who are at imminent risk of losing their housing. Preventive services and financial assistance are crucial for this population.
- Persons with Extremely Low Incomes: Residents with extremely limited financial resources often face barriers to accessing housing, healthcare, and other essential services, placing them at greater risk for adverse outcomes.

These special needs populations in Cheyenne require targeted programs and resources to ensure their health, safety, and well-being within the community.

What are the housing and supportive service needs of these populations and how are these needs determined?

Analysis by the University of Wyoming's CBEA has identified the primary housing and supportive service needs of individuals experiencing homelessness, people with special service needs, and those exiting the prison system in Laramie County. These populations are typically served by homeless shelters and public housing, and most have extremely low incomes, less than 30% of the Area Median Income (AMI), or \$28,400 per year for a family of four.

Housing Needs

The most urgent housing need for these groups is an increased supply of affordable housing units that are accessible to households earning less than 30% AMI. Many individuals in these populations face significant barriers to stable housing, including a lack of affordable options, poor housing conditions, and challenges related to physical accessibility. There is also a critical need for emergency shelter and transitional housing, especially for those exiting institutional settings or with special service needs.

Supportive Service Needs

Beyond housing, these populations require a range of supportive services to achieve and maintain stability. Key needs include:

- **Legal Assistance:** Consultations with Legal Aid of Wyoming and the Equal Justice Wyoming Foundation revealed that many clients face complex landlord-tenant issues, such as disputes over housing conditions, security deposits, and evictions. Other legal needs include help with understanding renters' rights, accessing housing assistance, and navigating the legal system, which many find confusing and inaccessible.
- **Health and Wellness Support:** Housing instability and substandard living conditions have been shown to negatively impact health. According to Cheyenne Regional Medical Center staff, individuals with inadequate housing are more likely to require hospital care and may have difficulty returning home after discharge, especially if their homes lack basic utilities or accessibility features. Many also struggle to afford both housing and essential medications.
- **Home Repairs and Accessibility Modifications:** There is a significant need for critical home repairs and modifications to ensure safe and healthy living environments, particularly for those with limited mobility or chronic health conditions. Organizations like Habitat for Humanity of Laramie County and Rebuilding Together are working to address these needs through repair programs funded by sources such as CDBG.

How Needs Are Determined

These needs are identified through a combination of direct service provider consultations, data analysis, and community assessments:

- **Civil Legal Needs Assessments:** The Equal Justice Wyoming Foundation commissioned a statewide assessment to evaluate the legal needs of Wyoming's most economically disadvantaged residents, revealing widespread difficulties in navigating the legal system.
- **Health Provider Feedback:** Healthcare professionals report on the intersection of housing and health, highlighting the real-world impacts of housing instability on patient outcomes.
- **Community and Stakeholder Input:** Regular engagement with local nonprofits, housing organizations, and residents helps to identify gaps in services and emerging needs.

Discuss the size and characteristics of the population with HIV/AIDS and their families within the Eligible Metropolitan Statistical Area:

Laramie County, which includes Cheyenne, has the highest concentration of people living with HIV in Wyoming, accounting for about 30% of the state's HIV cases. From 2016 to 2020, Laramie County reported 8 newly diagnosed HIV cases, representing about 11% of new diagnoses in the state during that period. In 2020, Laramie County had the highest HIV prevalence rate in Wyoming at 92.9 cases per 100,000 population. While the absolute numbers remain small, the concentration of cases in Cheyenne and Laramie County underscores the need for ongoing prevention, testing, and outreach efforts in the area. This information is sourced from the 2020 Wyoming HIV Surveillance Report published by the Wyoming Department of Health.

According to the 2023 HIV in Wyoming Report from the Wyoming Department of Health, 22 new cases of HIV were reported, 81.8% were male and 18.2% were female. Of those new cases 45.5% of the newly diagnosed cases were diagnosed with HIV Stage 3 (AIDS) This is an increase from the 2022 data when less than 10% of the cases were diagnosed with HIV Stage 3. In 2023, the 25-34 and 45-54 age groups represented the largest portion of reported cases. New cases have been rising steadily in Wyoming since 2023. The diagnosis rates for Laramie County for 2019-2023 are 1.5 to 2.8 per 100,000 people.

If the PJ will establish a preference for a HOME TBRA activity for persons with a specific category of disabilities (e.g., persons with HIV/AIDS or chronic mental illness), describe their unmet need for housing and services needed to narrow the gap in benefits and services received by such persons. (See 24 CFR 92.209(c)(2) (ii))

A HOME TBRA preference refers to the order in which applicants are admitted to tenant-based rental assistance programs. Participating jurisdictions may establish local preferences for providing this assistance. In the Cheyenne area, the Wyoming Department of Health's Communicable Disease Unit manages the HOPWA grant funds. Through this program, qualifying Cheyenne residents can receive short-term rental, mortgage, and utility assistance (STRMU), tenant-based rental assistance (TBRA), permanent housing placement (PHP), and emergency shelter, which includes temporary motel stays while clients work to secure stable housing. These services help narrow the gap in benefits and services received by persons with HIV/AIDS.

Covered supportive services include case management provided by public health offices and medical transportation reimbursement to help ensure people get to their appointments, especially in rural Wyoming. There is also a nutrition component, where Boost or Ensure nutritional drinks are sent directly to the client. They work with Meals on Wheels, Mom's Meals, and other organizations to ensure their clients receive nutritious foods. The cost of treating HIV is prohibitive for many individuals, which is often what brings them to their program. The nurse case manager compiles a care plan, which includes a housing component. If there are housing needs, the program first checks to ensure the individual is eligible for HOPWA. The only two requirements for HOPWA eligibility are being HIV positive and having a household income at or below 80% of the area median income (AMI).

The Wyoming Department of Health's Communicable Disease Unit reports that other eligible supportive services are included in the HOPWA grant, though many overlap with those provided under the Ryan White grants. Since Ryan White funding is higher than HOPWA funding, the Department typically allocates supportive services under Ryan White, allowing more HOPWA funds to be spent on direct services such as rental and/or utility assistance. The specific supportive services offered include education, employment assistance and training, health/medical services, life skills management, meals/nutritional services, mental health services, outreach, and transportation.

They report that the order of service frequency used to be: STRMU (Short-Term Rental, Mortgage, Utility), TBRA (Tenant-Based Rental Assistance), PHP (Permanent Housing Placement), and, lastly, Emergency Shelter within the HOPWA grant.

There are few resources available for persons with chronic mental illness. Currently, in Wyoming, no state program ensures individuals being released from an institution are connected to outpatient care and/or supportive services. The Cheyenne Regional Medical Center's Behavioral Health, the Wyoming State Hospital in Evanston, and the Lighthouse in Worland all have different protocols for discharge planning and continuity of care. In Cheyenne, we are fortunate to have Volunteers of America Serenity Place, a transitional housing facility and program that assists clients from the point of crisis to a place where they can live with their diagnosis. More consistency in discharge protocol planning and continuity of care is needed. Programs that offer wraparound services are critical to ensuring that gaps in benefits and services are reduced.

NA-50 Non-Housing Community Development Needs – 91.215 (f)

Describe the jurisdiction's need for Public Facilities:

The City has consistently prioritized and funded public facility projects, recognizing them as a high-level need in the 2020-2024 Consolidated Plan. During the previous plan cycle, the City completed several public facility projects, including the Senior Center HVAC upgrade and the construction of a sound barrier wall for a local domestic violence shelter. These projects were funded through both annual CDBG allocations and CDBG-CV funds.

For the 2025-2027 CDBG grant cycle, the City will continue to emphasize Public Facilities Assistance as a strategic goal. Consultations conducted for the upcoming Consolidated Plan revealed ongoing and emerging needs among local service providers:

- Crossroads Health Clinic, operated by Community Action of Laramie County (CALC), and HealthWorks are considering applying for CDBG funds to improve sidewalk safety and accessibility at their respective clinics and facilities.
- CALC also expressed interest in seeking funding for sidewalk improvements at Smith Manor, a transitional housing facility serving homeless and low-income individuals as they work with case managers to secure permanent housing.
- Healthworks expressed interest in applying for CDBG funds to replace the sidewalks surrounding a newly renovated building that will double the size of the current clinic and allow the team to provide comprehensive primary care across all service lines. The new building will incorporate space for ten medical providers, ten behavioral health specialists, two dentists, four dental hygienists, and support staff required to make operations run smoothly. The City has approved Healthworks plans to phase the sidewalk replacements based on funding.
- Needs Inc. indicated plans to pursue public facility improvements for their food bank, which also supports a thrift shop, working wardrobe program, and other essential services.
- The Wyoming Homeless Coalition, which operates the Welcome Mat day shelter, has discussed applying for CDBG funds to repair flooring in the main room and address additional facility maintenance needs. The Welcome Mat provides day shelter, laundry, and shower facilities for individuals experiencing homelessness.

Feedback from these organizations, along with input from other non-profits, underscores a sustained and growing demand for public facility improvements to enhance safety, accessibility, and the overall quality of services provided to vulnerable populations. The City remains committed to addressing these needs through targeted investment in public facilities during the 2025-2027 planning cycle.

How were these needs determined?

The City identified public facility needs through a comprehensive consultation process with a wide range of local stakeholders, including Community Action of Laramie County (CALC), HealthWorks, Needs Inc.,

the Wyoming Homeless Coalition, and other non-profit organizations. As part of the Consolidated Plan development, the City's Community Development staff conducted direct outreach and held discussions with these organizations to assess their current and anticipated facility needs.

During these consultations, organizations were specifically asked about any public facility needs they were experiencing or anticipating, and whether they were interested in seeking CDBG funding. For those expressing interest, the Community Development Manager provided guidance on project eligibility and worked collaboratively to determine whether proposed projects met HUD's National Objectives and CDBG program requirements.

Some agencies indicated plans to apply for CDBG funding during the 2025-2027 cycle, though many are still in the early stages of project development. Others, after learning more about the federal regulatory requirements associated with CDBG funding, determined that the process was too complex for their current capacity and opted not to apply for the 2025 Program Year, but may apply in 2026 or 2027.

A City of Cheyenne CDBG 2025-2027 Comprehensive Consolidated Plan survey was sent out through the City's Facebook page. Initial survey results revealed a gap in senior respondents. To expand the respondent pool, the H&CD Manager collaborated with Meals on Wheels to distribute paper surveys to their clients. The online and paper survey collected data from the participants on their zip code, age, household income, number of occupants in the household.

- 136 recipients viewed the survey
- 83 participants took the survey
- 1,847 responses were recorded

Respondents ranked the top four areas of need as:

- Affordable Housing: 92%
- Infrastructure Upgrades: 90%
- Economic Development and Job Training: 88%
- Public Facility Improvements: 83%

Respondents ranked the top 3 infrastructure and public facility improvements most needed in their neighborhood as:

- Sidewalk and accessibility improvements: 51%
- Parks and recreational facilities: 49%
- Road repairs: 44%

Describe the jurisdiction's need for Public Improvements:

The City has identified significant public improvement needs, particularly in LMI neighborhoods, through consultation interviews and community engagement. Consultations with organizations such as the Wyoming Independent Citizens Coalition, a grassroots group dedicated to neighborhood safety,

accessibility, and beautification, underscored the need for targeted improvements to foster community pride and create safer, more welcoming environments.

The H&CD Division Staff consulted with the City Traffic Engineer on the public improvement needs for the City's Safe Routes to School Plan. The City Engineering Department applied for and was allocated CDBG funds for the Safe Routes to School Alta Vista Elementary School project. This project prioritizing safety upgrades around an elementary school in a neighborhood located in a low- to moderate-income (LMI) area, located in a Qualified Census Tract. The City's Safe Routes to School plan has identified several schools in need of these critical improvements in other LMI areas and is considering submitting additional applications during the 2025-2027 Con Plan period.

Additionally, the H&CD Division consulted with Magic City Enterprises about public improvement needs. Magic City expressed interest in applying for CDBG fund for a sidewalk grant for the 2026 Program Year. The project is in an LMI neighborhood where Magic City and Habitat for Humanity of Laramie County are collaborating on a housing development project. This public improvement activity would directly benefit LMI individuals with disabilities.

How were these needs determined?

In addition to extensive consultations conducted by the H&CD Division on Public Improvement needs for Cheyenne and public feedback, gathered through Community surveys and outreach for the 2025–2027 Con Plan, reinforced residents' priorities for investments in sidewalks, streets, and other infrastructure, especially in LMI neighborhoods. Of the respondents who participated in the City of Cheyenne CDBG 2025-2027 Comprehensive Consolidated Plan Survey, 51% ranked Sidewalk and accessibility improvements has the highest need for Cheyenne. 90% of respondents chose infrastructure upgrades as the 2nd highest need for the City to address.

Describe the jurisdiction's need for Public Services:

The City engaged with over 30 nonprofits and government agencies to assess public service needs, receiving numerous inquiries about eligible activities. While organizations such as After School for Kids and the Cheyenne Family YMCA expressed interest in youth program funding, they ultimately did not apply due to regulatory challenges and limited capacity.

Employment training emerged as a significant need, especially for low- and moderate-income (LMI) residents. The Laramie County Community College ACES program and Climb Wyoming highlighted the importance of workforce development, digital literacy, and support services for single mothers—who face the highest poverty rates in Wyoming. Recent studies show that 20% of Laramie County children are raised by single mothers, with 12% living below the poverty line. Wyoming also has the nation's largest wage gap, with women earning just 71 cents for every dollar earned by men. Digital skills were identified as essential, with almost 70% of jobs now requiring some level of digital literacy.

Needs Inc. Food Pantry reported a steady increase in families enrolling in their monthly food box program and plans to launch a food walking bag program for homeless clients.

Health service providers, including CALC and HealthWorks, emphasized the need for support for clinics serving LMI and homeless populations. HealthWorks identified language barriers and the need for comprehensive interpretation services, while CALC noted rising demand for prescription assistance.

Shelters and service organizations such as Recover Wyoming, Family Promise, and the Salvation Army reported increased requests for utility and rental assistance, attributing this to inflation and higher utility costs. Both Needs Inc. and Meals on Wheels observed a sharp rise in food insecurity, with Needs Inc. reporting a 44% increase in monthly food boxes distributed from 2022 to 2023. Meals on Wheels also noted a growing elderly population and more seniors living below the poverty line.

The Blue Boost Center and other agencies stressed the need for additional case workers to connect LMI residents with support services, financial literacy resources, and other critical programs. Reflecting these growing needs, the City received 15 public service grant applications for the 2025 Program Year—up from four the previous year—demonstrating a significant increase in community demand across multiple sectors.

How were these needs determined?

The City identified these needs through consultations with over 30 local nonprofits and agencies. Service providers reported increasing challenges for low- and moderate-income residents due to rising housing, utility, and food costs. A surge in requests for assistance and a sharp increase in public service grant applications reflect growing demand for youth programs, workforce training, food security, and health services. This direct feedback ensured that the most urgent community needs are addressed in the 2025-2027 Consolidated Plan.

Survey data from the City of Cheyenne CDBG 2025-2027 Comprehensive Consolidated Plan Survey generally supports the public service needs identified during the Housing & Community Development consultations with local agencies. Among survey respondents, 85% ranked services for seniors, youth, or persons with disabilities as a high priority need in Cheyenne. When asked which public services were most important to address, respondents identified the top four as youth programs (47%), substance abuse programs (16%), health services (15%), and job training and placement (15%). Additionally, when asked about specific populations needing targeted services, respondents most frequently cited seniors, youth, and children (95%), followed by low-income individuals and families (45%), and persons with disabilities or health challenges (38%).

Housing Market Analysis

MA-05 Overview

Housing Market Analysis Overview

As part of the Consolidated Plan (Con Plan) process, grantees conduct a comprehensive assessment of the jurisdiction's housing, economic, and demographic conditions within the Needs Assessment and Market Analysis sections. Grantees are required to gather and analyze extensive data to prepare their Consolidated Plans. The information compiled in the Needs Assessment and Market Analysis serves as the foundation for the grantee's Strategic Plan, as well as for policy and investment decisions.

The Con Plan is developed for HUD using the HUD eCon Plan Template. Community Planning and Development (CPD) Maps provide grantees with population, housing, and economic data collected from the U.S. Census Bureau, HUD, and other federal agencies. Data for the Needs Assessment and Market Analysis sections are drawn from multiple sources, including information provided by agencies, City departments or divisions, and local nonprofits.

Data Sources Used

- eCon Planning Suite Data Sources
 - American Community Survey (ACS): Conducted annually by the U.S. Census Bureau, the ACS collects data from a sample of the population and provides a wide range of statistics on household demographics, economics, and housing conditions. Data is available at various geographic levels, down to the census block group.
 - Comprehensive Housing Affordability Strategy (CHAS): CHAS data is a special tabulation of ACS data for HUD, illustrating the extent of housing problems and needs, particularly for low-income households.
 - Homeless Data Exchange/Annual Homeless Assessment Report (AHAR): HUD collaborates with communities to collect data on homeless populations through the Point-In-Time (PIT) and Housing Inventory Count (HIC). The AHAR publishes annual figures at the national, state, and Continuum of Care (CoC) levels, including numbers of homeless persons, chronically homeless individuals, veterans, and homeless children and youth.
 - Fair Market Rents (FMR): FMRs are gross rent estimates published annually by HUD and used by Public Housing Authorities to set payment standards for the Housing Choice Voucher program. FMRs also determine rent ceilings for the HOME rental assistance program and other HUD initiatives. HUD calculates FMRs using data from the Decennial Census, the ACS, and random digit dialing telephone surveys.

- HOME Program Rent and Income Limits: These limits are used to determine eligibility and affordability for HUD programs.

The Housing & Community Development (H&CD) staff utilized available data to predict trends and supplemented this analysis with findings from the City's Analysis of Impediments to Fair Housing Study (AI), updated this year by the University of Wyoming Center for Business and Economic Analysis (CEBA). CEBA conducted an in-depth analysis of local and state trends, many of which are reflected in the Market Analysis section of the Con Plan. The updated AI is available on the City's H&CD webpage under the "Learn More About: Analysis of Impediments to Fair Housing" tab.

When additional data from other sections is used, the alternative source will be identified accordingly.

MA-10 Number of Housing Units – 91.210(a)&(b)(2)

Introduction

Cheyenne’s housing stock includes about 30,000 residential units, primarily single-family detached homes, which make up roughly two-thirds of all units and reflect the city’s historic preference for low-density neighborhoods. Single-family-attached homes are limited, and apartment buildings with five or more units account for only about 10% of the total, underscoring a lack of diverse housing options.

Much of the housing stock is aging, with nearly half of all units built before 1980. This highlights a need for rehabilitation and contributes to a shortage of quality, available homes. The shortage is especially acute for low- and moderate-income households, who face limited access not just due to overall supply, but because affordable units are particularly scarce.

As of 2025, Cheyenne offers 542 *subsidized rental units* and 533 *units that accept Section 8 vouchers*, but the demand far exceeds supply, resulting in long waitlists and ongoing challenges for families, seniors, and people with disabilities. This situation emphasizes the need for more and varied affordable housing throughout the city.

All residential properties by number of units

Property Type	Number	%
1-unit detached structure	19,720	66%

Table 24 – Unit Size by Tenure

Alternate Data Source Name:

2023: ACS 1-Year estimates

Data Source Comments:

Table 2: Unit Size by Tenure. The ACS 2023 1-Year estimates do not provide bedroom counts by owner and renter status, unlike the 2016- 2020 data, which is included here for that breakdown. For 2023, only total bedroom counts (not separated by tenure) are available and included for reference. As of April 2024 in Cheyenne: Studio apartments: 6 units available, priced from \$750 to \$1,700 per month. One-bedroom units: 38 available, ranging from \$695 to \$1,695 per month. Two-bedroom units: 80 available, priced from \$725 to \$2,300 per month. Three or more bedrooms: Only 21 units available. Two income-restricted units were listed at \$503+ per month; other units ranged from \$1,075 to \$2,970 per month. Zillow listed four income-restricted units at Lexington Hills Apartments: one 2-bedroom for \$465, two 3-bedrooms for \$508 each, and one 4-bedroom for \$550. Income limits for these units are based on HUD estimates.

5 or more bedrooms	4,246	13.2%
Total Units	32201	

Unit Size By Tenure Table 2

Describe the number and targeting (income level/type of family served) of units assisted with federal, state, and local programs.

Cheyenne, Wyoming utilizes a mix of federal, state, and local programs to assist a wide range of low- and moderate-income residents with affordable housing. The number and targeting of Federal, State, and Local Assisted Housing Units are as follows:

Subsidized Rental Units

- There are 8 subsidized properties in Cheyenne, totaling 542 units. These are primarily targeted to low-income households, with some properties specifically serving seniors and persons with disabilities. The largest concentration is in zip code 82001 (Central Cheyenne), which includes 448 units, mostly managed by the Cheyenne Housing Authority.
- Subsidized properties are distributed as follows:
 - 82001 (Central): 4 buildings, 448 units
 - 82007 (South): 1 building, 4 units
 - 82009 (North): 3 buildings, 90 units (including senior/disabled housing)

Voucher-Accepting Units

- Cheyenne has 15 properties that accept Section 8 Housing Choice Vouchers, with a total of 533 units across three main zip codes. These serve income-qualified families, including seniors and people with disabilities. Below is a breakdown of the number of buildings and units by zip code:
 - 82001: 6 buildings, 119 units
 - 82007: 7 buildings, 299 units
 - 82009: 2 buildings, 113 units

Overall Affordable Housing

According to *Affordable Housing Online*, Cheyenne has 1,688 affordable units, including both subsidized and voucher-accepting units, covering a broad spectrum of low-income residents, including seniors with disabilities, and low-income individuals and families. Some properties and programs are specifically designed for seniors or persons with disabilities, such as Heritage Court and Indian Hills Manor, which is run by the Cheyenne Housing Authority. Most of these units have waiting lists, although specific data about occupancy was not available online.

Provide an assessment of units expected to be lost from the affordable housing inventory for any reason, such as expiration of Section 8 contracts.

According to the Director of the Cheyenne Housing Authority (CHA), there are currently no affordable housing units in Cheyenne expected to be lost due to the expiration of Section 8 contracts or similar agreements. While four Section 8 contracts are set to expire in Wyoming, none of these properties are located in Cheyenne. This means the city's affordable housing inventory is not at immediate risk from expiring federal rental assistance contracts. Cheyenne's affordable housing stock remains stable with respect to expiring federal contracts; however, the broader statewide increase in demand and potential losses elsewhere underscores the need for ongoing vigilance and coordinated housing policy efforts.

Does the availability of housing units meet the needs of the population?

Mobile and manufactured homes represent a small segment, accounting for just 2% of all housing units. While these homes provide a lower-cost alternative, typically priced between \$25,000 and \$80,000, their future is challenged by rising rents, restrictive zoning, and utility challenges which hinder the development of new parks and the preservation of affordability. Policy changes could help protect and expand this housing option.

Recent development has increased the city's total housing units from 30,010 to 32,201, according to the 2023 ACS 1-year estimates, driven by new construction of both apartments and single-family homes. However, much of this new supply is market-rate and remains out of reach for many low- and moderate-income (LMI) residents. As of April 2025, Cheyenne's median home value is \$372,516, with a median listing price of \$422,000, further underscoring affordability challenges for LMI households.

Rental housing also faces affordability constraints. Of Cheyenne's 9,655 rental units, only 8.3% are affordable to households earning 30% of the area median income. Most affordable rentals are accessible only to those earning 50–80% of the HUD Area Median Family Income (HAMFI), leaving very few options for the lowest-income renters. New apartment complexes are under construction, with rents ranging from \$600 to \$1,637, but these rates remain high for those at LMI levels. There is a growing need for smaller units and accessible, maintenance-free living—especially for singles, seniors, and small families.

Describe the need for specific types of housing:

Cheyenne's current supply of affordable housing units does not meet the needs of its population, especially for low-income families, seniors, and persons with disabilities. The City has 542 subsidized rental units and 533 units that accept Section 8 vouchers, but demand far exceeds supply, as shown by long waitlists and inconsistent reporting on unit availability. The total of 1,688 affordable units, including both subsidized and voucher-accepting properties, remains insufficient given the growing population and rising rates of homelessness. This shortage is most pronounced in central and south Cheyenne.

A major barrier to expanding affordable housing is the limited availability of land zoned for such developments, as well as regulatory restrictions. Rental units for Extremely Low Income (ELI) renters are especially needed. According to NLIHC's 2024 Wyoming Housing Profile, there are 18,176 ELI renter households in Wyoming, but only 13.5% of affordable homes are available to them. Wyoming is experiencing a shortage of 8,866 affordable rental homes for the state's ELI renter population. In Laramie County, about 13% of residents are disabled, and seniors 65 and over make up around 16% of the population—both groups that are particularly vulnerable to housing instability. Despite the placement of 521 multifamily affordable housing units between 2019 and 2023 using federal funds, the gap remains significant.

A key challenge is ensuring that new developments serve the most vulnerable populations. Cheyenne should encourage developers to include accessible units and prioritize projects that directly benefit ELI renters, seniors, and persons with disabilities. This can be supported by providing incentives and targeting funding to developments that meet these needs. Actively leveraging federal and state resources, such as Low-Income Housing Tax Credits (LIHTC) is key essential to expanding the affordable housing stock.

Alternative housing options, such as mobile and manufactured homes, townhomes, and new apartments, provide solutions to reducing the City's housing shortage but are limited by high prices, zoning restrictions, and escalating rents. For example, while mobile homes represent one of the most affordable pathways to homeownership in Cheyenne, there is currently no *zoning by right* for mobile home parks in either Laramie County or the City of Cheyenne. This regulatory barrier restricts the expansion of this critical entry-level housing style. Effective planning and rezoning agricultural land on the edge of the city could make mobile home park development feasible, expanding the housing stock for low-income residents while minimizing community resistance.

Similarly, higher-density options like townhomes and cottages could help address the shortage, but current prices remain out of reach for many residents due to high construction costs and zoning limitations. New apartment developments are underway, but with rents ranging from \$600 to \$1,637, they are often unaffordable for many in need. **MA-15 Cost of Housing – 91.310(a)**

MA-15 Cost of Housing – 91.310(a)

Introduction:

Cheyenne's housing market continues to suffer from rising costs, with recent data showing significant affordability challenges for both homebuyers and renters. According to the 2023 ACS 1-Year Estimates, the city's median home value was \$340,800, while the ACS 5-Year Profile reported a median of \$311,200. More recent figures from Zillow show the median home value reached \$372,516 in April 2025, a 3.4% increase over the past year. Realtor.com lists the median listing price even higher at \$425,000, with a median price per square foot of \$1921. The median sold price stands at \$351,817, underscoring the persistent upward pressure on home prices.

This escalation in home values is largely driven by a shortage of affordable housing, making homeownership increasingly unattainable for many Cheyenne residents. Rental affordability is also a growing concern: nearly half of Laramie County renters are cost-burdened, with median rents rising 42% from 2010 to 2021, disproportionately impacting low- and moderate-income (LMI) households. The demand for subsidized and Section 8 rental units far exceeds supply, as reflected in long waitlists.

Table 28 – Monthly Rent

Data Source Comments:

Is there sufficient housing for households at all income levels?

Cheyenne does not have enough housing for all income levels. Home prices and rents have risen sharply, with the median home value at \$372,516 in April 2025 and average rents up 42% since 2010. Nearly half of renters are cost-burdened, spending more than 30% of their income on housing. Affordable rental units, especially for low- and moderate-income households, are in short supply, and demand for subsidized housing far exceeds availability. Federal rent limits and subsidies are not keeping pace with

local market rents, making it difficult for lower-income residents to find affordable options. Overall, Cheyenne faces a significant shortage of affordable housing, particularly for those with the greatest need, and targeted strategies are required to address these gaps.

How is the affordability of housing likely to change considering changes to home values and/or rents?

Housing affordability in Cheyenne is becoming increasingly challenging as both home values and rents continue to rise. As of April 2025, the median home value in Cheyenne is \$372,516, reflecting a 3.4% increase over the past year¹. This growth follows a trend from 2023, when median values ranged between \$311,200 and \$340,800, indicating a steady upward trajectory. Similarly, rental costs have seen significant increases: the average rent in Cheyenne is now \$1,500 per month, up by \$405 compared to the previous year.

These rising costs mean that more residents are likely to spend a higher percentage of their income on housing, which can lead to increased financial strain. Housing is generally considered affordable when it accounts for no more than 30% of a household's income; exceeding this threshold often forces families to make difficult choices between housing and other basic needs.

How do HOME rents / Fair Market Rent compare to Area Median Rent? How might this impact your strategy to produce or preserve affordable housing?

Both HOME rents and Fair Market Rents (FMR) are well below the area median rents in Cheyenne. This gap makes it more difficult to produce or preserve affordable housing without additional subsidies. Because rental subsidies tied to FMR or HOME limits may not be enough to secure units in the open market—especially with rents having increased 42% since 2010—low- and moderate-income households may have a harder time finding affordable options.

Given that funding sources are limited, the City cannot fully close these funding gaps on its own. However, by removing barriers to affordable housing development and increasing the overall supply of housing, the City can help reduce housing costs in the long term. Other strategies include encouraging and supporting more development projects that use Low-Income Housing Tax Credits and utilizing CDBG funds to rehabilitate affordable housing projects.

In summary, the difference between FMR/HOME rents and area median rents means that producing or preserving affordable housing will require additional financial support or policy interventions to keep rents affordable for those who need it most.

MA-20 Housing Market Analysis: Condition of Housing – 91.210(a)

Introduction

The City of Cheyenne defines “standard condition” housing as well-maintained, structurally sound homes meeting all local and HUD standards, while “substandard but suitable for rehabilitation” units are those that fall short of these criteria but can feasibly be improved through repairs. These definitions guide the city’s rehabilitation efforts and ensure compliance with building and fire codes. With only 20% of Cheyenne’s housing stock built since 2000, there is a significant need for both owner-occupied and rental unit rehabilitation. Additionally, a substantial portion of homes-especially those built before 1980- pose potential lead-based paint hazards, with an estimated 355 low- or moderate-income units requiring testing and possible remediation. The overall condition of Cheyenne’s housing stock highlights the urgent need for targeted strategies to address rehabilitation needs and the removal of lead-based paint hazards.

Describe the jurisdiction's definition of "standard condition" and "substandard condition but suitable for rehabilitation":

The City’s Housing & Community Development (H&CD) Division defines “standard condition” and “substandard condition but suitable for rehabilitation” according to its Minimum Housing Rehabilitation Standards, which are based on the Uniform Building Code (UBC), Uniform Housing Codes, and follow HUD Section 8 Minimum Housing Quality Standards and other HUD guidelines.

- **Standard Condition:** A unit in standard condition is a well-maintained residential structure built on a permanent, stable foundation. It must have solid structural integrity, be weather-tight and insulated against the elements, and include all basic mechanical systems: plumbing, electricity, heating, hot water, toilet facilities, and kitchen facilities, as required by the Uniform Building Code and HUD standards.
- **Substandard Condition (but Suitable for Rehabilitation):** A unit is considered substandard if it lacks a permanent solid foundation, structural integrity, weather tightness, minimal insulation, or if its basic mechanical systems do not meet current standards. It may also show deferred maintenance to the extent that the structure is at risk of increased decay. However, if such a unit can feasibly be brought up to standard through rehabilitation, it is considered suitable for rehabilitation.

These definitions serve as the minimum requirements for rehabilitation projects using HUD funding and are intended as guidance for contractors, developers, homeowners, and city officials. All rehabilitation work must also comply with requirements set by the City’s Building and Fire Departments before starting.

Condition of Units

Condition of Units	Owner-Occupied		Renter-Occupied	
	Number	%	Number	%

Need for Owner and Rental Rehabilitation:

Estimated Number of Housing Units Occupied by Low- or Moderate-Income Families with LBP Hazards

The CHA utilizes capital funds for ongoing modernization and preventive maintenance, including upgrades such as new flooring and electrical system improvements. The agency is committed to maintaining high occupancy rates and ensuring quick turnaround times for unit readiness.

HUD contracts a third-party to conduct unit inspections in accordance with HUD's NSPIRE standards. The most recent NSPIRE inspection for the CHA took place on October 24, 2024. During this inspection, HUD randomly selected 30 out of CHA's 341 Public Housing units—266 located in Cheyenne and 75 in Laramie. CHA achieved a score of 90 during the October 24, 2024, inspection. Due to this high score, CHA's Public Housing units will not require another HUD inspection for three years.

MA-25 Public and Assisted Housing – 91.210(b)

Introduction

The Cheyenne Housing Authority (CHA) owns and manages a variety of properties in Cheyenne and Laramie, including single-family homes and apartments. In Cheyenne, the CHA also offers apartment communities specifically designed to serve elderly and disabled individuals. All CHA Public Housing properties in Cheyenne and Laramie are smoke-free, ensuring a healthier environment for residents.

These housing units are subsidized by the U.S. Department of Housing and Urban Development (HUD) and are maintained in full compliance with HUD regulations. The CHA continually accepts applications for its programs, including the Housing Choice Voucher Program—commonly known as Section 8. This federal program is the primary means by which very low-income households, as well as elderly and disabled persons, receive assistance to afford decent, safe, and sanitary housing in the private market and Qualified households participating in the Housing Choice Voucher Program receive vouchers to help subsidize their rent payments to landlords of privately owned properties. Participants are responsible for finding a suitable housing unit of their choice, provided the landlord agrees to participate in the program and the unit meets the CHA’s minimum health and safety standards. The CHA pays a housing subsidy directly to the landlord on behalf of the participating household, while the household pays the difference between the actual rent and the subsidized amount.

Of the 316 residents occupying the 316 units that the CHA reported in use as of February 2025, 100% of those households requested accessibility features that were current residents of those units, 192 reported being elderly or disabled. Waitlists are long and they have a limited number of accessible units. Data provided by the CHA in February 2025, provides information about the number of units in Cheyenne. Detailed information about the number of accessible units was unavailable.

Totals Number of Units

Cheyenne, as of February 2025

	Program Type

Table 33 – Total Number of Units by Program Type

Describe the supply of public housing developments:

Describe the number and physical condition of public housing units in the jurisdiction, including those that are participating in an approved Public Housing Agency Plan:

Indian Hills Manor provides apartments for seniors and people with disabilities, while Golden Meadows offers income-restricted townhomes, and McGowen Apartments serve seniors aged 55 and older. WRAP Houses, designed for larger families of two to eight people, are also income restricted. As the primary provider of public housing in Cheyenne, the CHA faces high demand and long waitlists due to an ongoing shortage of affordable housing. CHA manages 266 public housing units, all of which participate in an approved Public Housing Agency (PHA) Plan and are maintained to meet HUD’s Uniform Physical Condition Standards (UPCS). To ensure units remain decent, safe, and sanitary, the CHA conducts move-in, annual, preventative, and special inspections, while HUD’s Real Estate Assessment Center (REAC) may also randomly select units for inspection each year to verify compliance with federal standards.

Public Housing Condition

Public Housing Development	Average Inspection Score
266 units in Cheyenne	90 out of 100

Table 34 - Public Housing Condition

Describe the restoration and revitalization needs of public housing units in the jurisdiction:

The CHA’s public housing units require ongoing restoration and revitalization to remain safe, decent, and affordable for residents. The primary needs include capital improvements such as replacing roofs, windows, siding, and major building systems, as well as upgrades to flooring, sidewalks, and heating. Regular maintenance and prompt repairs are essential to address tenant requests, prevent deterioration, and ensure units meet safety and quality standards.

A significant challenge is compliance with federal requirements, especially regarding lead-based paint hazards in older units. Cheyenne faces a shortage of certified inspectors and abatement professionals, which can slow down necessary rehabilitation and limit the number of units that can be improved each year. All restoration efforts must also bring units up to City and HUD minimum housing standards, ensuring structural integrity, weather-tightness, and the removal of hazardous materials.

Describe the public housing agency's strategy for improving the living environment of low- and moderate-income families residing in public housing:

The CHA uses capital funds for ongoing modernization and preventive maintenance, including upgrades like new flooring and electrical system improvements, and aims to maintain high occupancy and quick turnaround times for unit readiness.

HUD hires a third-party to perform unit inspections per HUD's NSPIRE standards. The most recent NSPIRE inspection for the CHA was conducted on October 24, 2024. HUD randomly inspected 30 of the 341 units in Cheyenne and Laramie; CHA has 341 Public Housing units, 266 in Cheyenne and 75 in Laramie. CHA's score for the 10/24/2024 inspection was 90. Because of the high score, CHA's Public Housing units will not be HUD-inspected for another 3 years.

MA-30 Homeless Facilities and Services – 91.210(c)

Introduction

The Homeless Facilities and Services section provides an overview of the facilities and services currently available in Cheyenne to assist persons who are homeless. There are several programs in Cheyenne that provide shelter, transitional or temporary housing, rental assistance, and deposits to prevent or reduce homelessness. These programs operate shelters and two transitional housing facilities, provide stabilization and case management, and support clients working toward independent living. These agencies and programs work together to provide a continuum of care, from emergency shelter and healthcare to transitional housing, career support, and long-term stability services. By addressing both immediate needs and the root causes of homelessness, these coordinated efforts help individuals and families in Cheyenne move toward stable, independent living.

The Wyoming Continuum of Care reports that Cheyenne currently has 92 Year-round emergency shelter beds, 34 Transitional Housing Beds and 62 Permanent Supportive Housing Beds. The Table below provides a breakdown of some of the populations served, including Households with Children, Households with Only Adults and Veterans.

Facilities and Housing Targeted to Homeless Households

	Emergency Shelter Beds		Transitional Housing Beds	Permanent Supportive Housing Beds	
	Year-Round Beds (Current & New)	Voucher / Seasonal / Overflow Beds	Current & New	Current & New	Under Development
Households with Adult(s) and Child(ren)	26	0	0	0	0
Households with Only Adults	70	0	30	0	0
Chronically Homeless Households	0	0	0	0	0
Veterans	0	0	0	62	0
Unaccompanied Youth	0	0	4	0	0

Table 35 - Facilities and Housing Targeted to Homeless Households

Data Source

Comments:

Table 13 2025 data was provided by the HMIS Manager, Institute from Community Alliances for the Wyoming Continuum of Care.

Describe mainstream services, such as health, mental health, and employment services to the extent those services are used to complement services targeted to homeless persons

A wide range of agencies and programs in Cheyenne provide mainstream services that complement targeted assistance for homeless individuals, including chronically homeless persons, families with children, veterans and their families, and unaccompanied youth.

- Community Action of Laramie County (CALC): CALC offers intensive case management, mental and physical health services, and support aimed at helping clients achieve self-sufficiency. CALC's Homeless Health Clinic delivers primary healthcare and telehealth services to address both immediate and long-term health needs for homeless individuals and families.
- Wyoming Department of Health (WDH): WDH's Communicable Disease Unit administers the HOPWA grant, which provides supportive services such as case management, medical transportation reimbursement, and nutrition support for persons with AIDS/HIV. Healthworks offers sliding scale healthcare, dental care, and prescriptions to low- and moderate-income individuals, including those experiencing homelessness.
- Comea Shelter Services: Comea provides case management and limited transportation for anyone who is homeless or at high risk of homelessness. Safehouse has 42 beds available for those in crisis. Staff is on call 24 hours a day, 7 days a week. The on-call staff responds to any calls generated through the hot line, Laramie County Sheriff's Office, Cheyenne Police Department, Pine Bluffs Police Department and other partner agencies. The shelter is staffed with advocates at the house or on call 24/7. The shelter staff assist clients in preparing for self-sufficiency by making referrals for health, mental health, and employment services.
- Family Promise of Cheyenne: Family Promise focuses on families with children, offering prevention services, rental assistance, and case management to help families avoid homelessness or quickly regain stable housing.
- Unaccompanied Student Initiative (USI): USI supports unaccompanied youth, particularly teens, by providing prevention services, rental assistance, and case management, enabling them to secure safe housing while continuing their education and working towards self-sufficiency.
- Wyoming Department of Workforce Services: Workforce Services has several programs available for individuals looking for a job throughout the state, individuals who may be unemployed and for individuals who are currently working and need to report a workplace issue.
- Volunteers of America (VOA): VOA delivers stabilization services and case management, including through the Supportive Services for Veteran Families (SSVF) program, which provides rental assistance, deposits, car repair, and connections to VA benefits. Recover Wyoming administers the federally funded PATH (Projects for Assistance in Transition from Homelessness) Program, serving individuals who are homeless or at risk and have a

serious mental illness by offering case management, housing search support, and limited financial assistance for deposits or prevention. The local domestic violence shelter offers a Client Emergency Fund to cover security and utility deposits as well as the first month's rent.

- Peak Wellness Center Transitions Program: Peak Wellness Center supports homeless and low-income men in Cheyenne with accessible, affordable mental health and substance abuse services, including treatment and detox for drug and alcohol addiction, as well as buprenorphine services. They also assist youth and families with evaluation, prevention, diagnosis, and treatment of mental, emotional, and behavioral health issues, using psychotherapy and counseling to improve overall well-being.
- Laramie County Community College's Adult Career and Education System (ACES): The ACES program provides free instruction in digital literacy, high school equivalency, and English as a second language, collaborating with USI to support homeless clients in advancing their education and careers. Climb Wyoming assists single low- to moderate-income mothers, including those experiencing homelessness, by helping them earn certifications, build resumes, prepare for interviews, and transition to new careers.
- Habitat for Humanity's Fresh Start Program: Fresh Start offers vouchers for individuals facing difficult situations, such as transitioning out of homelessness, recovering from addiction, or escaping domestic violence, which can be used at the ReStore to purchase essential furniture.
- I Am My Brother and My Sister's Keeper (IAMBSK): IAMBSK provides meals, clothing, and other essentials to homeless individuals, further supporting this vulnerable population. Together, these agencies and programs create a comprehensive network of support for people experiencing homelessness in Cheyenne.

List and describe services and facilities that meet the needs of homeless persons, particularly chronically homeless individuals and families, families with children, veterans and their families, and unaccompanied youth. If the services and facilities are listed on screen

There are several programs in Cheyenne that provide shelter, transitional or temporary housing, rental assistance, and deposits to prevent or reduce homelessness.

- Volunteers of America Northern Rockies (VOA): VOA operates two transitional housing facilities in Cheyenne. One focuses on individuals in crisis, providing stabilization and case management, while the other, Mirror Lake Manor, supports clients working toward independent living. Residents typically stay about six months as they develop skills for independence.

- Community Action of Laramie County (CALC): CALC runs Smith Manor, which offers twelve transitional housing units for men and women re-entering the workforce, and six apartments for individuals with disabilities. CALC also provides single-occupancy and family transitional housing, with case management and affordable rent for income-eligible families. CALC partners with the VA Medical Center and Veteran Housing Services on the Bridge Housing Program, helping low-income homeless veterans and their families regain stability and move toward independence.
- Comea Shelter Services: Comea offers two transitional programs: The Transitional Living Program (TLP): A pay-to-stay program for individuals, lasting from six to 24 months. The Journey Center: A 90-day program for families with minor children, focusing on securing employment and housing.
- Family Promise of Cheyenne: Family Promise provides shelter for families in crisis, partnering with local churches to offer safe places to stay. They also offer prevention services, rental assistance, and case management to help families achieve economic stability and avoid homelessness.
- Unaccompanied Student Initiative (USI): Provides a stable home for homeless teens that live in a variety of unsafe, temporary situations - including cars, parks, shelters, motels, and couch surfing.
- Wyoming Department of Health, Communicable Disease Unit: HOPWA also offers programs like short-term rental, mortgage, and utility assistance (STRMU), tenant-based rental assistance (TBRA), permanent housing placement (PHP), and emergency shelter, which provides temporary motel stays while clients secure stable housing.

MA-35 Special Needs Facilities and Services – 91.210(d)

Introduction

Cheyenne provides a comprehensive network of services and supportive housing options for the elderly, frail elderly, persons with disabilities (mental, physical, developmental), individuals with substance use disorders, people living with HIV/AIDS and their families, and public housing residents

Including the elderly, frail elderly, persons with disabilities (mental, physical, developmental), persons with alcohol or other drug addictions, persons with HIV/AIDS and their families, public housing residents and any other categories the jurisdiction may specify, and describe their supportive housing needs

Including the elderly, frail elderly, persons with disabilities (mental, physical, developmental), persons with alcohol or other drug addictions, persons with HIV/AIDS and their families, public housing residents and any other categories the jurisdiction may specify, and describe their supportive housing needs

Services and Supportive Housing by Population Category

1. Persons with Disabilities (Mental, Physical, Developmental)

Community-Based Services

- Magic City Enterprises: Medicaid waiver-funded programs for adults with intellectual, developmental, and physical disabilities, including adult day services, community living, personal care, supported employment, respite, transportation, and group residences.
- Treasure Abilities: Case management and home/community-based waiver services for adults and children with developmental disabilities or brain injuries, including day habilitation and support.
- Humankind: 24/7 in-home and community-based support for individuals with intellectual and developmental disabilities through Medicaid waiver programs.
- Cheyenne Village: Personalized service plans and community integration for adults with intellectual and developmental disabilities.

Advocacy and Legal Support

- Protection & Advocacy System, Inc.: Legal and civil rights advocacy, legal representation, and assistance accessing state and federal services.
- Mayor's Council for People with Disabilities: Advises the city on inclusion, accessibility, recreation, employment, and transportation.

Employment Support

- Wyoming Department of Workforce Services – Vocational Rehabilitation: Counseling, job training, and placement for people with physical or mental disabilities.

Supportive Housing

- Cheyenne Housing Authority: Public housing and Housing Choice Vouchers, with dedicated units for people with disabilities.
- Section 811 Project Rental Assistance: Rental assistance and supportive services for extremely low-income adults with disabilities to promote independent living.
- Volunteers of America Northern Rockies: Supervised group and supportive housing for individuals with severe mental illness, including case management and life skills training.
- Transitional and Crisis Housing: Facilities like Serenity Place and Mirror Lake Manor provide crisis stabilization and transitional living for those with mental health needs.

2. Frail Elderly and Elderly

Housing and Services

- Cheyenne Housing Authority: Public housing units specifically for seniors, with accessibility features and on-site support.
- Community-Based Supports: Assistance with daily living activities, transportation, and health management.
- Case Management: Coordination of medical, mental health, and social services to support aging in place.

Supportive Housing Needs

- Affordable, accessible housing with physical adaptations (e.g., ramps, grab bars)
- On-site or mobile support for personal care and health needs
- Opportunities for social engagement and community activities

3. Individuals with Substance Use Disorders

Housing and Recovery Services

- Transitional and Crisis Housing: Serenity Place and Mirror Lake Manor offer stabilization and transitional living with a focus on recovery and independent living skills.
- PATH Program: Outreach and connection to housing and supportive services for those with co-occurring mental illness and substance use disorders who are homeless or at risk.

Supportive Housing Needs

- Safe, stable, and substance-free housing environments
- Access to counseling, treatment, and case management
- Life skills training and employment support

4. Persons Living with HIV/AIDS and Their Families

Specialized Housing Programs

- HOPWA (Housing Opportunities for Persons with AIDS): Rental assistance, emergency housing, case management, and supportive services tailored for people with HIV/AIDS and their families.

Supportive Housing Needs

- Affordable, stable housing with confidentiality and medical support
- Case management to coordinate health care, medication, and social services

5. Public Housing Residents (Including Families and Individuals)

Housing and Services

- **Cheyenne Housing Authority:** Manages public housing and Housing Choice Vouchers for low-income residents, including families, seniors, and people with disabilities.

- **Community Integration:** Programs and activities to promote resident engagement, self-sufficiency, and access to supportive services.

Supportive Housing Needs

- Affordable housing with access to transportation, employment, and educational opportunities
- On-site or referral-based support for health, wellness, and economic advancement

6. Other Populations (e.g., Homeless, Veterans)

Specialized Programs

- **HUD-VASH:** Combines HUD rental assistance with VA supportive services for homeless veterans and their families.
- **Recover Wyoming PATH Program:** Outreach and supportive services for homeless individuals with serious mental illness or co-occurring substance use disorders.

Describe programs for ensuring that persons returning from mental and physical health institutions receive appropriate supportive housing

Volunteers of America Northern Rockies (VOANR)

- **Transitional Housing & Crisis Stabilization:** VOANR operates transitional living facilities in Cheyenne, such as Mirror Lake Manor, which provides supported living for individuals with mental health needs. Residents typically stay for about six months, working with clinicians and case managers on independence skills before moving to long-term housing. Serenity Place offers crisis stabilization, serving as an entry point for those in acute need and helping them transition toward stability and community living.
- **Long-Term and Supportive Housing:** Facilities like Creekside Cottage offer therapeutic group living for those with severe and persistent mental illness, focusing on skill development, education, and community integration. Other supportive housing options allow for more independent living with case management and mental health plan support.
- **Veteran Services:** VOANR also provides housing and case management for veterans, including rent and deposit assistance, connection to VA benefits, and support for those at risk of homelessness.

Comea House & Resource Center

- **Emergency and Transitional Shelter:** Comea offers emergency shelter for up to 7 days, including meals, hygiene, and case management. For those needing longer-term support, the Journey Program provides structured pathways from stabilization to employment and eventual independent housing. The Pay-to-Stay program offers semi-private living for up to 120 days, with continued case management and support for mental health and self-sufficiency.

Community Action of Laramie County (CALC)

- **Self-Sufficiency Transitional Housing:** CALC offers single-occupancy and family apartments for homeless individuals and low-income families, all with intensive case management. This transitional housing is designed to help clients stabilize, develop life skills, and work toward permanent housing over a period of up to one year.
- **Crossroads Healthcare Clinic:** CALC provides primary medical care, mental health, and substance abuse services to homeless individuals, including those transitioning from institutions.

Veteran Housing Services: Short-term housing (up to 90 days) is available for homeless veterans, with intensive case management and coordination with VA services.

PATH Program (Projects for Assistance in Transition from Homelessness): PATH, administered locally by Recover Wyoming, helps those with a serious mental illness who are homeless or at risk. The program offers financial assistance for deposits and rent, rental assistance, and coordination with mainstream services to secure stable housing and improve health outcome

Specify the activities that the jurisdiction plans to undertake during the next year to address the housing and supportive services needs identified in accordance with 91.215(e) with respect to persons who are not homeless but have other special needs. Link to one-year goals. 91.315(e)

During the next program year, the City will address the supportive service needs of Cheyenne residents who are not homeless but have other special needs through targeted activities funded by HUD CDBG and local matching funds. A total of \$62,416 in CDBG funds and \$37,584 in local match will be allocated to five nonprofit agencies to support public service programs that align with the City's Consolidated Plan goals to promote self-sufficiency and provide job training opportunities.

The specific funded projects for the 2025 Program Year include:

- **Meals On Wheels: More than a Meal for Laramie County Seniors**
Funding: \$12,483 CDBG + \$7,514 City match = \$20,000
This project will provide meals to individuals over age 65 living below the poverty line and receiving SNAP benefits, helping their SNAP funds last longer each month. The funding will also support expanded outreach to connect additional eligible community members to the program.
- **Healthworks: Enhancing Access to Healthcare with Interpretation Services**
Funding: \$12,483 CDBG + \$7,514 City match = \$20,000
This initiative will implement comprehensive professional interpretation services at Healthworks, covering a broader range of languages and introducing video conferencing capabilities. This will enable approximately 175 patients annually with limited English proficiency to communicate directly with providers during medical, behavioral health, and case management appointments, ensuring equitable access to care.
- **Climb Wyoming Job Training Program**
Funding: \$12,483 CDBG + \$7,514 City match = \$20,000

CDBG funds will support free job training and counseling for low-income single mothers in Cheyenne, empowering them to increase their earning potential and achieve self-sufficiency. This program removes financial barriers to workforce development and helps families build more stable futures.

- LCCC ACES Program – Digital Literacy

Funding: \$12,483 CDBG + \$7,514 City match = \$20,000

The Laramie County Community College ACES Program will provide digital literacy instruction to approximately 150 low-to-moderate income Cheyenne residents, supporting the City's annual goal to expand job training and employment opportunities.

These activities directly support the City's one-year goals to promote self-sufficiency, enhance access to supportive services, and provide job training for residents with special needs who are not homeless.

For entitlement/consortia grantees: Specify the activities that the jurisdiction plans to undertake during the next year to address the housing and supportive services needs identified in accordance with 91.215(e) with respect to persons who are not homeless but have other special needs. Link to one-year goals. (91.220(2))

During the 2025 Program Year, the Housing & Community Development (H&CD) Division will launch a supplemental mini grant cycle. This initiative will provide up to \$259,000 in funding for shovel-ready infrastructure and public facility projects that directly benefit low- and moderate-income (LMI) households and serve vulnerable populations. The mini grant cycle is designed to support projects that align with the 2025-2027 Con Plan goals of Preserving and Improving Low-Income Neighborhoods and Public Facility Improvements.

To maximize impact, H&CD staff have proactively conducted outreach to educate nonprofits about Community Development Block Grant (CDBG) eligible activities and to identify high-impact projects that address the needs of non-homeless individuals with special needs. These efforts are directly linked to our one-year goals of improving access to quality housing and supportive services for LMI residents and other vulnerable groups.

MA-40 Barriers to Affordable Housing – 91.210(e)

Describe any negative effects of public policies on affordable housing and residential investment.

Wyoming faces a critical shortage of nonprofit developers and limited funding for affordable housing. The state must add tens of thousands of new homes by 2030 to meet projected demand, but the current shortfall is especially severe for extremely low-income households, who have far fewer affordable and available rental homes. This disproportionately impacts extremely low-income residents. According to the National Low Income Housing Coalition 2025 Wyoming Housing Profile- only 52 rental homes are affordable and available for every 100 extremely low-income household and 72% of extremely low-income renters are severely cost-burdened. Through consultation with affordable housing developers and as part of the updated 2025 Analysis to Impediments to Fair Housing Study, Wyoming's affordable housing sector has identified several significant barriers that hinder the development of new affordable homes, particularly for extremely low-income households.

Wyoming lacks both a State Revolving Loan Fund and a State Housing Trust Fund, making it one of only a few states without such resources. A recent legislative effort to create a State Housing Trust Fund with substantial annual funding did not advance. This fund would have supported new construction, rehabilitation, maintenance, and homelessness initiatives, and included a revolving loan component at or below market rates, as well as capacity-building for affordable housing development.

Six bills were introduced during the 2025 session to simplify housing development by removing barriers or establishing funding, but none passed. For example, House Bill 68 (HB0068), which would have supported tax increment financing for affordable housing by expanding the Wyoming Urban Renewal Code, died in committee. Another attempt to amend the Zoning Protest Petition law—which allows a small percentage of nearby property owners to force a supermajority city council vote on developments—also failed. This law recently blocked a large apartment project and left the site vacant during a period of high demand.

Developers struggle to make projects financially feasible, particularly due to infrastructure costs. Wyoming's infrastructure funding, managed by the State Lands and Investment Board (SLIB), is accessible only to municipalities, not private developers or nonprofits. Wyoming's state constitution restricts funding to nonprofits except for direct aid to the poor, which does not include affordable housing development. As a result, when municipalities need to apply for the funds, projects are subject to public processes where resident opposition can halt developments. Nonprofits and developers may apply for federal funding through state-administered programs, but these resources are limited, highly competitive.

MA-45 Non-Housing Community Development Assets – 91.215 (f)

Introduction

Cheyenne's location at the intersection of I-80 and I-25 in southeastern Wyoming position the City as a regional center for employment and business activity. The city has seen an increase in new businesses and development, resulting in a range of job opportunities. According to recent data, the largest business sectors are education and health, finance, insurance and real estate, and arts, entertainment, and accommodations-including gambling facilities. Together, these sectors account for 43% of jobs in Cheyenne, and new venues such as Horse Palace Swan Ranch are projected to add more than 140 jobs.

Job growth is expected in these sectors as well as in construction, indicating a continued need for skilled workers. Efforts to support job training programs, job placement services, and infrastructure improvements are likely to play a role in meeting workforce demands and maintaining economic stability. These initiatives may help workers develop the skills needed for available jobs, but challenges remain in ensuring that growth is balanced and benefits are widely shared across the community.

The labor market in Cheyenne shows considerable variation in wages and job distribution. Higher average hourly wages are found in management, healthcare, and engineering, while lower wages are common in personal care, food service, and maintenance positions. Most employment is concentrated on office support, transportation, and sales, with fewer jobs in creative or specialized fields. A notable gender wage gap exists, with women earning less than men at all education levels and employment types. Addressing this disparity, along with supporting workforce development for underrepresented groups, remains an ongoing concern. Cheyenne also has a relatively short average commute, which may contribute to a less burdensome daily travel experience compared to national averages.

Economic Development Market Analysis

Business Activity

Based on the Business Activity table above, what are the major employment sectors within your jurisdiction?

Based on the Business Activity Table data available in the 2016-202 ACS and the 2023 ACS 1-Year Estimate data sets, the largest employment sector in Cheyenne is the Education and Health sectors, with approximately 8,245 workers according to the 2023 ACS 1-Year Estimates.

Major employers for this Sector are:

- Laramie County School District #1, Laramie County Community College
- Cheyenne Regional Medical Center, which has over 2,000 employees and more than 170 active associate medical staff.

The city also has 517 active physicians and numerous healthcare facilities, such as UCHealth Primary Care, Cheyenne Children's Clinic, Health First, Cheyenne Plaza Primary Care, the Cheyenne VA Medical Center, the Laramie County Department of Health, the Wyoming Department of Health, and the 90th Medical Group at Warren Air Base.

The sector's size is driven by these large institutions, Cheyenne's role as a regional hub, and the stability of public funding, offering diverse job opportunities with competitive wages and benefits and being less affected by economic fluctuations than other industries.

Other major business sectors include Finance, Insurance, and Real Estate (2,876 jobs), which provides essential services to Cheyenne's growing population and business community, supporting steady job growth.

The Arts, Entertainment, and Accommodations sector employs 2,745 people, with a significant portion of jobs linked to gambling facilities such as the Horse Palace and Wyoming Downs; new venues like Horse Palace Swan Ranch are projected to add over 140 jobs.

Together, these three business sectors account for 43% of jobs in Cheyenne.

Describe the workforce and infrastructure needs of the business community:

The projected job growth in Wyoming, especially in construction, health care, hospitality, and retail, shows that Cheyenne's businesses need more skilled workers in these areas. Local employers are looking for people with technical skills and training to fill these jobs and help their companies grow. Many available jobs require at least a high school diploma or some technical education. Continued investment in things like business parks, fiber optic networks, and dependable utilities supports business growth and makes it easier for workers to get to their jobs. Supporting job training programs, job placement services, and infrastructure improvements will help the city's workforce and economy stay strong and competitive.

Describe any major changes that may have an economic impact, such as planned local or regional public or private sector investments or initiatives that have affected or may affect job and business growth opportunities during the planning period. Describe any needs for workforce development, business support or infrastructure these changes may create.

Cheyenne's major infrastructure investments, such as the new Meta data center and upgrades to roads, utilities, and public facilities, will create important needs for workforce development, business support, and continued infrastructure improvements during the 2025–2027 planning period. The Meta data center project alone will generate over 1,000 construction jobs and about 100 permanent positions, increasing demand for skilled workers in construction, technology, and support services. To meet this demand, the city will need more training programs, apprenticeships, and partnerships with local schools and colleges to help residents gain the skills needed for these new jobs.

Local businesses will also need support to take advantage of the growth opportunities that come with better infrastructure and increased economic activity. This may include help with business planning, expansion, and navigating new regulations. Organizations like Cheyenne LEADS will be important in guiding both new and existing businesses through these changes.

Finally, as the city grows, there will be a need for ongoing investment in public facilities, transportation, utilities, and safety services to keep up with increased use and to maintain a high quality of life for residents. Funding for these improvements will likely come from a mix of local taxes, grants, and partnerships with private companies. Overall, Cheyenne's investments will require a focused effort on workforce training, business support, and infrastructure planning to ensure the city's growth is successful and sustainable through 2027.

How do the skills and education of the current workforce correspond to employment opportunities in the jurisdiction?

The top occupations by projected growth from Wyoming Labor Force March 2025 Trends include construction laborers, general and operations managers, retail salespersons, and stockers/order fillers. Most of these roles require no more than a high school diploma, though some, such as general and operations managers and truck drivers, require post-secondary credentials. Notably, occupations with no formal education requirement account for about one-third of all job openings, while those requiring a high school diploma make up the largest share (38.6%).

Describe any current workforce training initiatives, including those supported by Workforce Investment Boards, community colleges and other organizations. Describe how these efforts will support the jurisdiction's Consolidated Plan.

Wyoming is launching several workforce training programs to help residents gain new skills, meet industry needs, and create more job opportunities. These programs are supported by Workforce Investment Boards, community colleges, and other organizations in the state.

The Wyoming Department of Workforce Services runs programs through One-Stop Workforce Centers. These centers offer skills assessments, job planning, career counseling, occupational training, on-the-job training, and work experience. The programs focus on fields like healthcare, construction, transportation, environmental technology, and office administration. They also provide support such as financial literacy and soft skills training to help people find and keep jobs.

The Workforce Development Training Fund offers grants to Wyoming businesses and workers for professional development and customized training. These grants help businesses improve employee skills, develop apprenticeships, and offer internships to meet changing industry needs and keep talent in the state.

Laramie County Community College offers a wide range of workforce training options, including apprenticeships, health and safety certifications, leadership training, and programs for local industries. LCCC provides short-term career training in high-demand fields, technical and trades programs, business and professional development courses, and customized training for businesses. The college also supports apprenticeship programs, dual enrollment for students, and extra support services.

Wyoming has also started Next Generation Sector Partnerships, which bring together employers, educators, and public agencies to identify workforce gaps and create training programs. These partnerships are active in construction, hospitality, and new industries, and have helped increase training and improve job outcomes.

Does your jurisdiction participate in a Comprehensive Economic Development Strategy (CEDS)?

Yes

If so, what economic development initiatives are you undertaking that may be coordinated with the Consolidated Plan? If not, describe other local/regional plans or initiatives that impact economic growth.

MA-50 Needs and Market Analysis Discussion

Are there areas where households with multiple housing problems are concentrated? (include a definition of "concentration")

Are there any areas in the jurisdiction where racial or ethnic minorities or low-income families are concentrated? (include a definition of "concentration")

What are the characteristics of the market in these areas/neighborhoods?

Are there any community assets in these areas/neighborhoods?

Are there other strategic opportunities in any of these areas?

DRAFT

MA-60 Broadband Needs of Housing occupied by Low- and Moderate-Income Households - 91.210(a)(4), 91.310(a)(2)

Describe the need for broadband wiring and connections for households, including low- and moderate-income households and neighborhoods.

Broadband access is a critical necessity for households in Cheyenne, WY, including those with low and moderate incomes. Reliable internet connectivity enables access to essential services such as telehealth, remote education, and economic opportunities like job searches and remote work. It also plays a key role in promoting educational equity by providing students with access to online learning resources and supporting healthcare through telemedicine options. However, significant barriers remain, particularly for underserved neighborhoods, due to affordability challenges and infrastructure gaps.

Efforts to address these issues include initiatives like federal investments through Connect Wyoming and local provider programs aimed at expanding broadband infrastructure and affordability. Notably, the Affordable Connectivity Program (ACP) provided financial assistance to low-income households by subsidizing internet costs and offering discounts on devices. However, the ACP ended in June 2024 due to funding constraints, leaving a gap in support for some LMI families.

On April 26, 2025, the Housing & Community Development Manager consulted Chad Bolling, Wyoming's Broadband Manager, to discuss the pressing need for broadband connections in Cheyenne. Bolling emphasized that improved broadband access would directly benefit households by enabling remote work, education, telehealth services, and health monitoring for vulnerable populations.

Describe the need for increased competition by having more than one broadband Internet service provider serve the jurisdiction.

The Wyoming State Broadband Program, administered by the Wyoming Business Council, is dedicated to ensuring that every resident and business in Wyoming has access to affordable, reliable, redundant, and future-proof broadband service. The program currently includes over fifty broadband providers statewide, all of which participate in the Affordability Connectivity Program. Through these efforts, the Broadband Program is actively working to improve both the connectivity and affordability of broadband for communities across Wyoming (WCDA 2023-2027 Con Plan).

According to BestNeighborhood.org, Cheyenne is served by 12 residential internet providers, covering 99.78% of the city. The average home in Cheyenne can access speeds up to 2,270 Mbps, with residents able to choose from between 1 and 10 providers depending on their location. Service types available include fixed wireless, DSL, cable, and fiber, though availability may vary by neighborhood. This level of provider diversity has led to a generally healthy competitive environment.

The Wyoming Business Council's Broadband Manager noted during consultation for the Con Plan that the ongoing need for increased competition among broadband providers in Cheyenne. Mr. Bolling emphasized that having multiple providers is essential for several reasons:

- Lower Costs: Increased competition drives down prices, making internet service more affordable for consumers.
- Improved Quality: Providers are incentivized to enhance their service quality and reliability to attract and retain customers.
- Greater Accessibility: Competition encourages providers to expand their networks, reaching underserved or unserved areas and ensuring more equitable access.

Cheyenne continues to invest in broadband infrastructure, with projects such as Visionary Broadband's fiber expansion—funded by Wyoming Business Council grants—aiming to address connectivity gaps in underserved neighborhoods. While these initiatives are crucial, fostering robust competition among providers remains a key strategy for ensuring that all residents and businesses benefit from affordable, high-speed internet.

While Cheyenne currently enjoys a relatively competitive broadband market, continued efforts to support and attract multiple providers are vital. Increased competition will not only lower costs and improve service quality but will also ensure that the internet is accessible to everyone, supporting the city's economic growth and quality of life.

MA-65 Hazard Mitigation - 91.210(a)(5), 91.310(a)(3)

Describe the jurisdiction's increased natural hazard risks associated with climate change.

The Housing & Community Development Division collaborated with Cheyenne Fire Rescue and the Department of Engineering to assess natural hazard risks in Cheyenne linked to climate change. Kip Sanders, Administrative Battalion Chief, provided two key reports: a Wildland Incident Heatmap for 2024 and a Wildland Incident by Month chart for 2024. These reports highlight that the primary natural hazards tracked by Cheyenne Fire Rescue are extreme cold/winter storms and wildfires. However, winter storms are not specifically monitored, as emergency calls are coded based on call type rather than weather events.

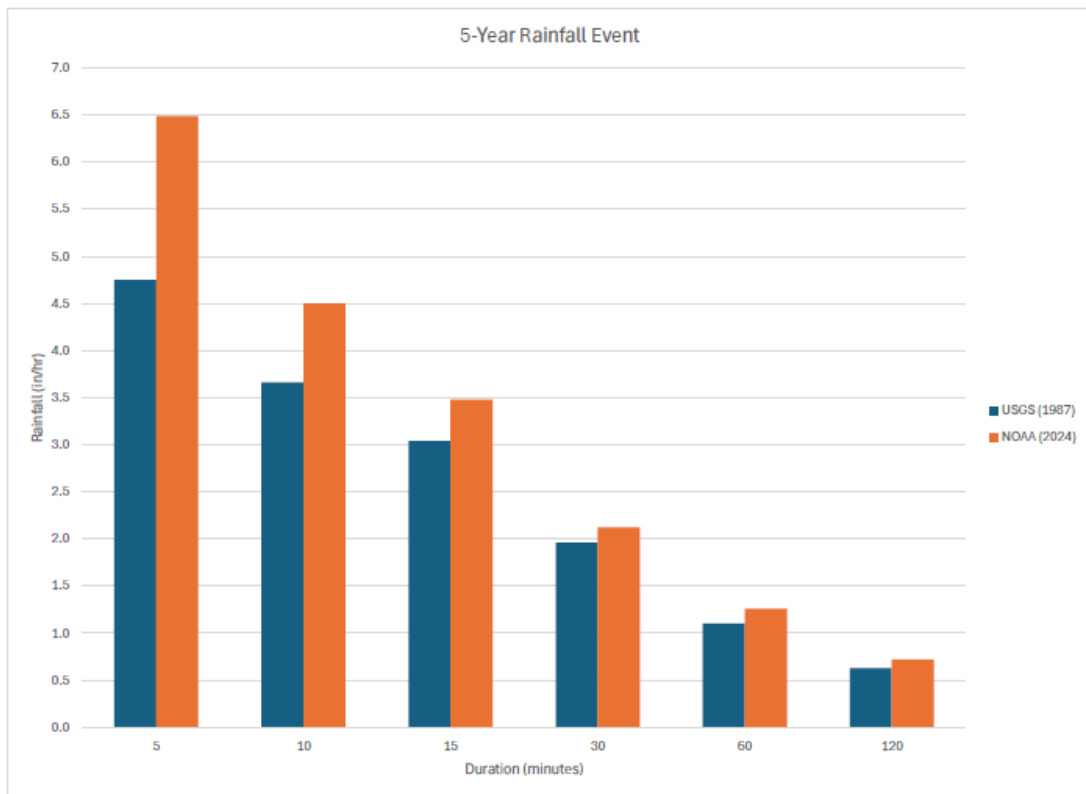

The wildfire data for 2024 reveals eight incidents across Cheyenne, with no single area being more susceptible than others. The monthly incident chart shows a notable spike in wildfires from April to May, doubling in frequency before declining in subsequent months. This trend underscores the seasonal nature of wildfire risks. The heatmap illustrates the geographic distribution of these incidents, emphasizing the widespread nature of wildfire threats across the city.

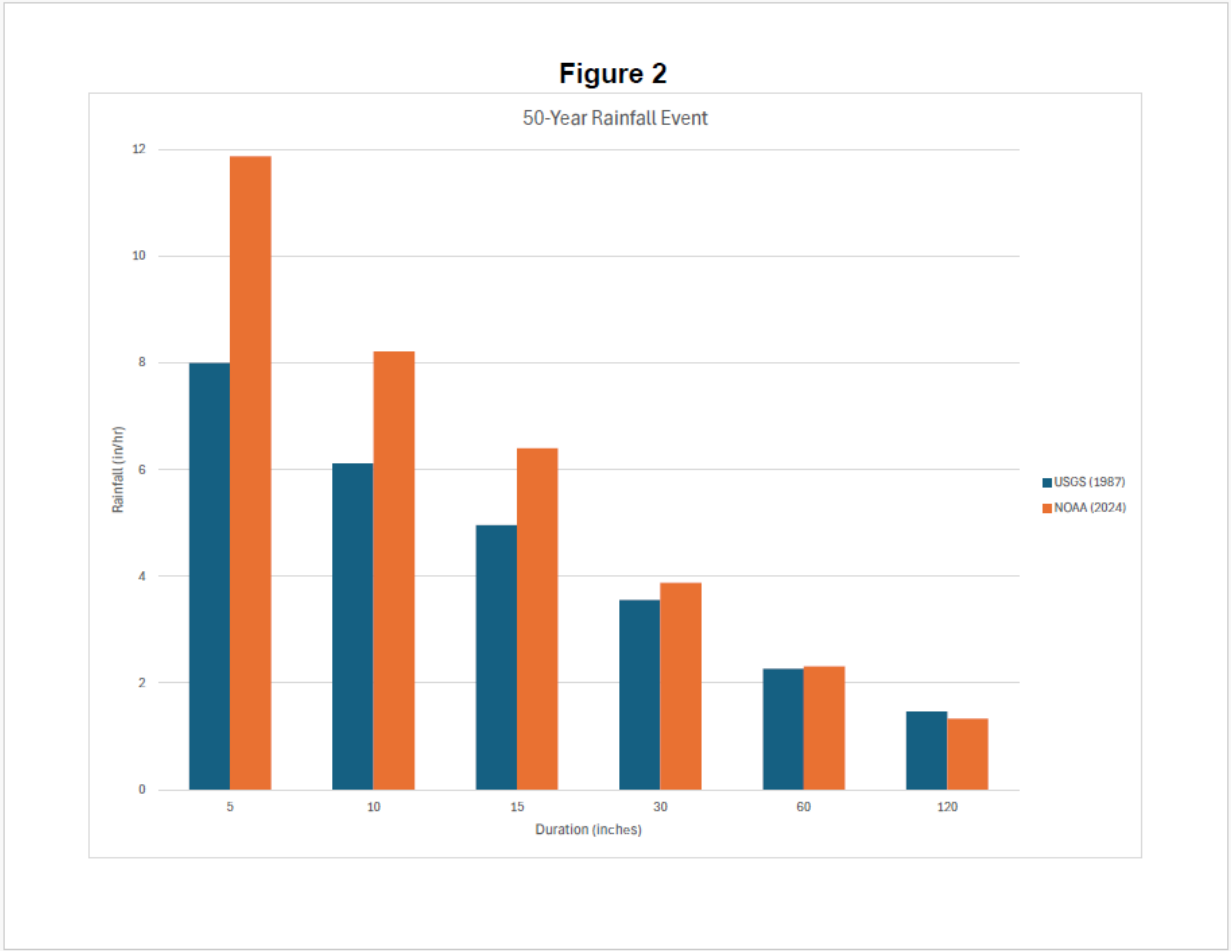

Additionally, the H&CD Staff consulted with the City's Stormwater Division Manager and City Drainage Engineer about the City's strategies for Hazard mitigation. There are potential increases in natural hazards in and around Cheyenne can most readily be seen through the increases in observed rainfall intensities and the associated statistical predictions used in modelling rainfall events. Two separate studies, 37 years apart, clearly demonstrate this.

Figures 1 and 2 (below) illustrate the differences between rainfall intensities from a study completed in the late eighties (USGS) versus a study completed in the early 2020's (NOAA). A comparison of the study results shows that rainfall intensities for shorter duration rainstorms have significantly increased over the last four decades. This trend is prevalent for all standard design storms (2-year through 100-year events). The implications of these increases will lead to more localized flooding problems, as more

stormwater runoffs will be generated with more frequent storm events.

Figure 1

The implications of these increases will lead to more localized flooding problems, as more stormwater runoffs will be generated with more frequent storm events. This will be especially prevalent in older areas of Cheyenne, which are typically occupied by low to moderate income households, where storm sewer systems are consistently undersized or non-existent. Figure 3 (attached) shows two locations in Cheyenne that will experience the impacts due to insufficient storm sewer collection infrastructure.

Describe the vulnerability to these risks of housing occupied by low- and moderate-income households based on an analysis of data, findings, and methods.

While Cheyenne Fire Rescue does not conduct risk assessments based on socioeconomic data, demographic trends are considered broadly. Mitigation efforts have focused on city-owned properties identified as high-risk for wildfires, but addressing risks on private property remains challenging due to the need for owner cooperation and associated costs. Climate change is expected to exacerbate these hazards. Rising temperatures and prolonged droughts in Wyoming are increasing wildfire frequency and severity, as well as reducing snowpack critical for water resources. These changes heighten risks to property, health, and ecosystems while complicating mitigation efforts.

Additionally, there is the potential that more frequent storm events and stormwater run-off will lead to more localized flooding problems, as more stormwater runoffs will be generated with more frequent storm events. This will be especially prevalent in older areas of Cheyenne, which are typically occupied by low to moderate income households, where storm sewer systems are consistently undersized or non-existent. Figure 3 (attached) shows two locations in Cheyenne that will experience the impacts due to insufficient storm sewer collection infrastructure.

DRAFT

Strategic Plan

SP-05 Overview

This section presents the City of Cheyenne’s strategic approach to funding, emphasizing priorities such as low- and moderate-income (LMI) census tracts and block groups, which will receive the majority of Community Development Block Grant (CDBG) resources. It outlines the strategies designed to address the City’s most pressing needs, identifies the populations and areas targeted, and explains the rationale behind these priorities.

The Strategic Plan Overview also details the City’s 2025–2027 strategies to:

- Remove barriers to affordable housing
- Address homelessness
- Reduce lead hazards
- Coordinate with the Cheyenne Housing Authority

Additionally, the plan describes the City’s efforts to combat poverty and outlines strategies for effective monitoring of sub-recipients.

Anticipated CDBG Resources

This section specifies the actual U.S. Department of Housing & Urban Development (HUD) allocation for the 2025 Program Year, as well as other matching funds provided by the City for public service activities. Returned funds from previous grant cycles will be allocated to infrastructure and public facility projects. The Housing & Community Development Division (H&CD), which administers the CDBG grant, intends to expend all or most of the returned funds by June 30, 2026.

To achieve this, the H&CD Division will open a supplemental or mini grant cycle before the end of the year. This mini grant cycle will fund shovel-ready projects that align with the Consolidated Plan goals of Preserving and Improving Low-Income Neighborhoods or Public Facility Improvements. Applications that include projects that are at least halfway completed, or will be finished by June 15, 2026, will be prioritized for funding.

All funded activities must meet the requirements outlined in the Strategic Plan sections:

- SP-25 (Priority Needs)
- SP-35 (Anticipated Resources)
- SP-45 (Goals Summary)

The City's 2025–2027 Con Plan identifies several priority needs in Section SP-25 to address housing, public service, infrastructure and public facility needs. All priority needs included in the Con Plan are considered “high” level needs. By strategically allocating CDBG funds to these priorities, the City's goal is to maximize the impact of its limited federal resources, serve the greatest number of low- and moderate-income residents, and ensure full compliance with HUD regulations.

DRAFT

SP-10 Geographic Priorities – 91.215 (a)(1)

Geographic Area

Table 43 - Geographic Priority Areas

1	Area Name:	City of Cheyenne
	Area Type:	Local Target area
	Other Target Area Description:	
	HUD Approval Date:	
	% of Low/ Mod:	
	Revital Type:	Comprehensive
	Other Revital Description:	
	Identify the neighborhood boundaries for this target area.	N/A
	Include specific housing and commercial characteristics of this target area.	N/A
	How did your consultation and citizen participation process help you to identify this neighborhood as a target area?	N/A
	Identify the needs in this target area.	N/A
	What are the opportunities for improvement in this target area?	N/A
	Are there barriers to improvement in this target area?	N/A

General Allocation Priorities

Describe the basis for allocating investments geographically within the jurisdiction (or within the EMSA for HOPWA)

The City's CDBG Target Area encompasses the entire city, with funds distributed citywide. For the 2025-2027 Consolidated Plan, projects will focus on qualified census tracts and block groups that benefit low-to moderate-income (LMI) residents. Most Public Service activities will serve LMI individuals throughout Cheyenne.

During this period, the City will prioritize infrastructure and public facility improvement projects and area benefit projects in qualified census tracts and LMI block groups to meet HUD's area benefit requirements, ensuring that at least 51% of beneficiaries are LMI residents in primarily residential areas.

Eligible areas include:

- Census Tract 15, Block Groups 2 (70.60% LMI) & 3 (64.11% LMI): Northeastern Cheyenne
- Census Tract 2, Block Group 1 (85.59% LMI) & Block Group 2 (65.05% LMI): South Cheyenne
- Census Tract 6, Block Group 4 (55.74% LMI): East of Downtown
- Census Tract 7, Block Group 1 (65.75% LMI): Downtown and west of downtown Cheyenne

By targeting these LMI areas, the City of Cheyenne ensures that CDBG resources address key community needs and maximize benefits for LMI residents, in alignment with HUD regulations.

SP-25 Priority Needs - 91.215(a)(2)

Priority Needs

The City's 2025–2027 Con Plan identifies several priority needs to address housing and community development challenges. All listed priority needs are considered equally important and are not further ranked. By strategically allocating CDBG funds to these priorities, the City aims to maximize the impact of its limited federal resources, serve the greatest number of low- and moderate-income residents, and ensure full compliance with HUD regulations.

Table 44 – Priority Needs Summary

1	Priority Need Name	Neighborhood Improvements and Infrastructure
	Priority Level	High
	Population	Extremely Low Low Moderate Middle Large Families Families with Children Elderly Persons with Physical Disabilities Persons with Developmental Disabilities Non-housing Community Development
	Geographic Areas Affected	City of Cheyenne
	Associated Goals	Preserve and Improve Low Income Neighborhoods
	Description	Provide infrastructure improvements for LMI neighborhoods (block groups and qualified census tracts) in Cheyenne other than LMI housing benefit.

	Basis for Relative Priority	Neighborhood improvements are a high priority for the 2025-2027 Con Plan because they address critical issues of safety, accessibility, and equity, particularly in historically disadvantaged areas. By focusing on enhancing infrastructure and public spaces, the City aims to create safer, more inclusive environments that support the well-being of all residents while fostering sustainable community development. These efforts reflect Cheyenne's commitment to equitable growth and improving quality of life for underserved populations.
2	Priority Need Name	Public Facilities
	Priority Level	High
	Population	Extremely Low Low Families with Children Elderly Chronic Homelessness Individuals Families with Children Mentally Ill Chronic Substance Abuse veterans Victims of Domestic Violence Unaccompanied Youth Elderly Persons with Mental Disabilities Persons with Physical Disabilities Persons with Developmental Disabilities Persons with Alcohol or Other Addictions Victims of Domestic Violence
	Geographic Areas Affected	City of Cheyenne
	Associated Goals	Public Facility Improvements

	Description	Provide improvements and rehabilitation to public facilities, prioritizing transitional housing, housing for special needs populations and shelters, to enhance their functionality and support for individuals and families in need.
	Basis for Relative Priority	Improving and rehabilitating public facilities, including transitional housing, housing for special needs populations, and shelters, is a top priority in response to the growing demand for services that address homelessness and housing instability. Local organizations such as the Comea Shelter, Unaccompanied Student Initiative, the local domestic violence shelter, Community Action of Laramie County, and Accessible Space Inc. have all reported increasing strain on their resources as they provide emergency shelter, transitional housing, affordable housing and supportive services to vulnerable groups, including individuals with disabilities, families, and people recovering from addiction. The shortage of affordable housing and supportive infrastructure further exacerbates the challenges faced by low- and extremely low-income residents, as well as those at risk of homelessness. By improving these facilities, agencies are better equipped to meet the community's needs, promote self-sufficiency, and offer a pathway to stable housing for individuals and families in crisis.
3	Priority Need Name	Supportive Services for Low-Income & Special Needs
	Priority Level	High
	Population	Extremely Low Low Moderate Families with Children Elderly Individuals Families with Children Victims of Domestic Violence Elderly Persons with Physical Disabilities Victims of Domestic Violence Other
	Geographic Areas Affected	City of Cheyenne
	Associated Goals	Promote self-sufficiency through service provision

	Description	CDBG funds will be allocated to support public services in three key areas: • Domestic Violence Shelter: Funding will assist with utility reimbursement to ensure the shelter can continue providing essential services to survivors. • Health Clinic: Resources will support language interpretation services, improving access to healthcare for low- and moderate-income (LMI) clients. • Senior Nutrition: Funds will be used to provide nutritious meals for LMI seniors, addressing their dietary needs and promoting overall well-being.
	Basis for Relative Priority	Funding for Supportive (Public) Services for Low-Income and Special Needs populations is crucial for Cheyenne's LMI residents, as these services ensure access to necessities such as healthcare, food, and shelter. Public services act as a vital safety net, helping to mitigate risks to health, safety, and stability for the city's most vulnerable populations. Without adequate funding, individuals face increased risks of poor outcomes, including untreated health issues and homelessness, which can also result in higher societal costs. The City allocates 15% of each year's annual HUD funding to support these essential public services. For the 2025 Program Year, the Housing & Community Development Advisory Council reviewed twelve applications and recommended funding for five organizations with strong community partnerships, experience managing federal grants, and a proven track record of effective outcomes.
4	Priority Need Name	Job Training and Opportunities
	Priority Level	High
	Population	Extremely Low Low Moderate Families with Children Elderly Individuals Families with Children veterans Unaccompanied Youth Elderly Persons with Physical Disabilities Persons with Developmental Disabilities Other

	Geographic Areas Affected	City of Cheyenne
	Associated Goals	Job Training
	Description	Provide job training and digital literacy training for low-to-moderate income residents of Cheyenne.
	Basis for Relative Priority	The City prioritizes job training and digital literacy as essential tools to empower LMI residents to thrive in today's economy. Job training equips individuals with in-demand skills, fostering employment opportunities and economic resilience, while digital literacy bridges the digital divide, enabling access to education, job markets, and essential services. These efforts not only enhance individual economic mobility but also strengthen the community by promoting equity and preparing all residents for success in a competitive, technology-driven global economy.
5	Priority Need Name	Program Administration
	Priority Level	High
	Population	Extremely Low Low Moderate
	Geographic Areas Affected	City of Cheyenne
	Associated Goals	Program Administration
	Description	To provide program administration for the CDBG Entitlement allocation for the City of Cheyenne.
	Basis for Relative Priority	Program administration is essential to the effective operation of the CDBG program. Administrative funds cover critical tasks such as compliance monitoring, financial oversight, planning, and reporting, ensuring that activities align with federal regulations and community priorities. The City utilizes 20% of the annual CDBG allocation to cover these costs, which include staff salaries and operational costs. Without this support, the City lacks the resources necessary to implement and oversee projects, jeopardizing its ability to meet HUD standards and address local housing and community development needs effectively.

SP-30 Influence of Market Conditions – 91.215 (b)

Influence of Market Conditions

Affordable Housing Type	Market Characteristics that will influence the use of funds available for housing type
Tenant Based Rental Assistance (TBRA)	Cost burden is the most significant housing challenges in Cheyenne, with a substantial proportion of renter-occupied households spending more than 30% of their income on housing. The high demand for affordable rental options, reflected in long Housing Choice Voucher waitlists, underscores the need for TBRA to help low-income households access and maintain stable housing.
TBRA for Non-Homeless Special Needs	Rising area rents and lack of accessible units are making it increasingly difficult for Special Needs households to secure affordable rental housing. Additionally, the existing housing stock offers a limited number of units that can be feasibly rehabilitated for accessibility, as many older buildings are costly and challenging to modify to meet the needs of people with disabilities.
New Unit Production	The shortage of affordable housing units, rising construction costs, and limited availability of contractors willing or able to develop affordable homes have increased competition for available units, particularly among low- and moderate-income (LMI) households. New unit production is critical to expanding the housing supply and easing cost burdens across the community. There is also a growing need for accessible and affordable units designed for one to two occupants, reflecting the increasing senior population and their specific housing requirements. Cheyenne faces a significant shortage of accessible housing units to accommodate its aging population and residents with disabilities. According to data from the (ACS) 5-Year Estimates for 2019–2023, Cheyenne has approximately 11,722 residents aged 65 and above, accounting for 18.04% of the city’s total population. This proportion is higher than the national average of 16.84% for the same period. Developing strategies to increase the number of accessible units is essential to meet the current and future housing needs of Cheyenne’s seniors and to

Affordable Housing Type	Market Characteristics that will influence the use of funds available for housing type
Rehabilitation	Rehabilitating Cheyenne’s housing stock is a crucial step in addressing the housing challenges faced by residents earning 0–80% of the Area Median Income (AMI). Deferred maintenance has contributed to the aging of many homes, and targeted improvements can significantly enhance energy efficiency, thereby reducing utility costs and easing the financial burden on LMI residents. These rehabilitation efforts help preserve existing affordable housing and improve long-term affordability for low-income households. However, retrofitting a large percentage of aging units does not always provide the level of accessibility required by all residents and, in many cases, serves only as a temporary solution. Therefore, prioritizing facility upgrades to, and the development of safe, affordable, and accessible housing units is essential. By sustaining and creating more suitable options, seniors can safely transition into housing that better meets their needs. This, in turn, allows younger families to purchase and customize existing homes, further supporting the community’s housing stability and diversity.
Acquisition, including preservation	Supporting acquisition and preservation helps maintain affordable homeownership and rental opportunities for current and future residents, especially in markets like Cheyenne with high-cost burdens and limited new supply. However, market factors such as the availability of suitable properties for acquisition, and the availability of organizations willing to invest in these efforts influence the feasibility of these efforts.

Table 45 – Influence of Market Conditions

SP-35 Anticipated Resources - 91.215(a)(4), 91.220(c)(1,2)

Introduction

The City will allocate CDBG funds throughout the 2025–2027 Con Plan period to support a variety of eligible activities, including:

- Neighborhood and infrastructure improvements
- Public facility enhancements
- Public service
- Job training and economic development
- Administration and planning

These investments are designed to fund activities that meet HUD requirements, address critical community needs, promote economic opportunity, and improve the quality of life for Cheyenne residents, especially LMI individuals and neighborhoods. The allocation process is guided by the Con Plan, ensuring all funded activities align with federal objectives and local priorities.

Additional Notes about the Anticipated Resources Table:

- The annual allocation of **\$416,012**, as shown in the Anticipated Resources table below, reflects the *actual* amount the City received from HUD for the 2025 Program Year. The City received the official allocation letter from the HUD CPD Region 8 Office in Denver via email on Monday, May 19, 2025.
- The “Program Income” column included in the “Anticipated Resources” table below shows **\$0.00** because the City does not receive program income.
- The \$298,580 listed in the “Prior Year Resources” column consists of \$39,527.20 in unused CDBG funds, which the City will allocate to the Safe Routes to School infrastructure improvement project in a LMI neighborhood. In addition, the City will open a Supplemental or Mini Grant Cycle, offering up to **\$259,000** for shovel-ready infrastructure and public facility projects that benefit LMI housing and serve vulnerable populations. This added grant cycle allows the City to allocate funds returned by Habitat for Humanity of Laramie County, combined with unspent funding from prior program years. The City is committed to the timely expenditure of federal funds and is excited to offer this bonus grant round to support much-needed improvements to facilities and infrastructure that impact LMI residents.
- The amount shown in the “Expected Amount Available in the Con Plan” column, \$832,024, is calculated by taking the actual allocation for Program Year 2025 (\$416,112) and using that amount as the anticipated allocation for both Program Year 2026 and Program Year 2027.

Anticipated Resources

Program	Source of Funds	Uses of Funds	Expected Amount Available Year 1				Expected Amount Available Reminder of Con Plan \$	Narrative Description
			Annual Allocation: \$	Program Income: \$	Prior Year Resources: \$	Total: \$		
CDBG	public - federal	Acquisition Admin and Planning Economic Development Housing Public Improvements Public Services	416,112	0	298,580	714,692	832,024	The City will allocate CDBG funds over the 3-year Con Planning period to support public facility and neighborhood improvements, public services, job training and economic development, as well as administration and planning.

Table 46 - Anticipated Resources

Explain how federal funds will leverage those additional resources (private, state and local funds), including a description of how matching requirements will be satisfied

For each year of the 2025–2027 Con Plan period, the City will match \$62,417 in CDBG PY25 Public Service funds with \$38,451 from City funds. This partnership will increase total public service funding to \$100,000 annually, enabling subrecipients to more effectively address critical community needs. To ensure full compliance with HUD requirements, \$83,222 will be allocated to CDBG program administration—precisely within the 20% cap set by HUD. Additionally, the City will cover a portion of the Community Development Manager’s salary and benefits from the General Fund, further leveraging CDBG resources.

The City Planning Department will utilize \$250,000 in CDBG funding for major safety improvements through the Safe Routes to School Project at Alta Vista Elementary School, located in a low- and moderate-income (LMI) neighborhood. The City Engineering Department will contribute by covering planning and project management staffing costs, while the #FORMAK Foundation will assist in securing additional funds to update the Wyoming Safe Routes to School Program plan. This collaborative approach will support citywide pedestrian safety audits, educational initiatives, and the construction of essential safety upgrades.

By combining federal, City, and third-party resources, project budgets are expanded, and the impact of CDBG-funded initiatives is amplified. This strategy fulfills all matching requirements and demonstrates the City's strong commitment to maximizing community benefits and ensuring sustainable, long-term improvements for residents.

If appropriate, describe publicly owned land or property located within the jurisdiction that may be used to address the needs identified in the plan

The Safe Routes to School Project will be implemented within City rights-of-way, utilizing publicly owned land to support infrastructure and facility improvements. These enhancements will directly benefit a LMI neighborhood by addressing a priority need to improve conditions in low-income areas. This initiative aligns with the Con Plan's goal of enhancing neighborhood infrastructure.

SP-40 Institutional Delivery Structure – 91.215(k)

Responsible Entity	Responsible Entity Type	Role	Geographic Area Served
City of Cheyenne	Government	Economic Development Homelessness Non-homeless special needs Planning neighborhood improvements public facilities public services	Jurisdiction

Table 47 - Institutional Delivery Structure

Explain the institutional structure through which the jurisdiction will carry out its consolidated plan including private industry, non-profit organizations, and public institutions.

Cheyenne is fortunate to offer healthcare and workforce services through a strong network of organizations, including the Cheyenne Regional Medical Center, the Wyoming Department of Health, HealthWorks, and Crossroads Health Clinic. These providers offer general healthcare, HIV/AIDS care, mental health counseling, and mobile clinics, ensuring broad access to essential services. Workforce development is supported by Wyoming Workforce Services, Laramie County Community College, and programs like Climb Wyoming and NextGen, which focus on employment training and life skills.

Mental health and substance abuse support are provided by agencies such as Recover Wyoming, the Cheyenne VA Medical Center Substance Abuse Treatment Program, Peak Wellness Center, and Harmony House. These organizations offer counseling and treatment, often targeting homeless individuals or those at risk. However, increasing demand and recent funding reductions have raised concerns about the continued availability of these critical services.

The City is continually investing in neighborhood and infrastructure improvements through its Planning Department, Community Recreation and Events Department, Metropolitan Planning Organization, Downtown Development Authority, and Board of Public Utilities. Planned initiatives for 2025–2027 include water infrastructure replacement, upgraded streets and sidewalks, facade improvements, enhancements to parks and greenways, and public facility upgrades, all targeted to support economic development and improve quality of life for Cheyenne residents.

Cheyenne’s housing network is strengthened by collaboration among providers, City leadership, and organizations such as the Wyoming Housing Network, the Mayor’s Housing Task Force, Southeastern

Wyoming Builders Association and the Laramie County Community Partnership Housing Force. Cheyenne Housing Authority, Wyoming Housing Network, Accessible Space.org and others manage affordable rental units, many of which participate in the Section 8 program.

Despite these efforts, challenges remain due to limited affordable housing, insufficient development funding, and inadequate resources for property maintenance. Continued collaboration and integrated efforts are essential to ensure all residents have access to safe housing and vital services.

Availability of services targeted to homeless persons and persons with HIV and mainstream services

Cheyenne provides a range of targeted and mainstream services to homeless individuals, families, veterans, unaccompanied youth, and persons with HIV. Key providers such as Cheyenne Regional Hospital, the Wyoming Department of Health, HealthWorks, and Crossroads Health Clinic offer accessible healthcare, HIV/AIDS care, mental health counseling, and mobile clinics. Many of these services are specifically designed for or actively reach out to homeless populations and those at risk of homelessness. Employment and life skills support are available through Wyoming Workforce Services, Laramie County Community College, Climb Wyoming, and NextGen, helping homeless individuals and families gain job skills and improve self-sufficiency. Mental health and substance abuse treatment are provided by organizations like Recover Wyoming, the Cheyenne VA Medical Center Substance Abuse Treatment Program, Peak Wellness Center, and Harmony House. These programs serve chronically homeless individuals, families, veterans, youth, and persons with HIV. While these services are widely available and utilized, providers report increasing demand and some reductions in funding, which may impact ongoing access. Nonetheless, Cheyenne's network of services remains a critical support for homeless persons and those with HIV.

Table 48 - Homeless Prevention Services Summary

Describe how the service delivery system, including, but not limited to, the services listed above meet the needs of homeless persons (particularly chronically homeless individuals and families, families with children, veterans and their families, and unaccompanied youth)

Family Promise of Cheyenne and the local domestic violence shelter collaborate to support survivors of domestic violence and homeless families by providing both immediate shelter and assistance with longer-term housing needs. The Unaccompanied Student Initiative (USI), in partnership with the Laramie County School District and other local organizations, focuses on supporting homeless students. Beyond housing, USI offers transportation and academic support and connects students with case workers who help them prepare for further education, job training, internships, and independent living opportunities once they age out of the program.

Community Action of Laramie County, the Comea Shelter, and the Cheyenne VA operate multiple programs designed to assist families, veterans and their families, and unaccompanied youth. These organizations work together to address the diverse needs of the homeless population through a variety of supportive services.

However, there remains a significant programming gap for chronically homeless individuals, particularly those struggling with addiction, mental illness, or reentry after incarceration. The city currently lacks sufficient low-barrier shelter options for this population, making it challenging to provide consistent care and access to mental health services. Additional resources or program development may be needed to better address the needs of these individuals.

Describe the strengths and gaps of the service delivery system for special needs population and persons experiencing homelessness, including, but not limited to, the services listed above

There are many strengths and gaps in the service delivery system for special needs populations and individuals experiencing homelessness. While there is a strong network of compassionate and knowledgeable agencies, there have historically been capacity challenges and organizations have, at times, been siloed, which could limit better outcomes for LMI populations.

Wyoming211 has been a leader in serving as a referral center and resource hub for residents who are homeless or at risk of becoming homeless. However, a more comprehensive strategy is needed, particularly for services targeting people experiencing homelessness, to better leverage funding and resources, implement targeted strategies for specific populations, and improve data analysis and outcome tracking. Enhanced statewide communication and collaboration with the State Continuum of Care (CoC) is also necessary. The recent CoC three-part forum on gaps analysis brought these issues to the forefront, and strategies and benchmarks were identified to address deficiencies.

While Cheyenne is fortunate to have both a homeless shelter and a domestic violence shelter, these facilities are not considered low-barrier shelters. There is a pressing need for shelter options for homeless individuals with mental health or substance abuse issues, as well as for services and shelter for those exiting incarceration. Additionally, programs providing legal, mortgage, utility, and rental assistance need additional support, as these providers have reported an increase in requests for assistance.

Provide a summary of the strategy for overcoming gaps in the institutional structure and service delivery system for carrying out a strategy to address priority needs

The City has invested significant staff time in consulting and coordinating with members of the service delivery system to improve support for special needs populations, as well as individuals who are homeless or at risk of homelessness. The City actively participates in coordinated efforts such as the annual Point-in-Time Count, CoC grant review committees, housing and community development boards and task forces, and statewide associations such as WYNAHRO. These collaborations enable the City to work closely with service providers to address and overcome gaps in the institutional delivery system.

Through the targeted allocation of CDBG funds, the City helps service providers address priority needs that impact these vulnerable populations. Funded initiatives include shelter utility support, improvements to transitional housing facilities, job training and digital literacy programs, meal and outreach services for seniors and persons with disabilities, and translation services to improve healthcare access.

SP-45 Goals Summary – 91.215(a)(4)

Goals Summary Information

Sort Order	Goal Name	Start Year	End Year	Category	Geographic Area	Needs Addressed	Funding	Goal Outcome Indicator
1	Preserve and Improve Low Income Neighborhoods	2025	2027	Non-Housing Community Development	City of Cheyenne	Neighborhood Improvements and Infrastructure	CDBG: \$570,472	Public Facility or Infrastructure Activities other than Low/Moderate Income Housing Benefit: 9645 Persons Assisted
2	Public Facility Improvements	2025	2027	Affordable Housing Homeless Non-Homeless Special Needs	City of Cheyenne	Public Facilities	CDBG: \$539,526	Public Facility or Infrastructure Activities for Low/Moderate Income Housing Benefit: 132 Households Assisted
3	Promote self-sufficiency through service provision	2025	2027	Homeless Non-Homeless Special Needs	City of Cheyenne	Supportive Services for Low-Income & Special Needs	CDBG: \$112,347	Public Facility or Infrastructure Activities other than Low/Moderate Income Housing Benefit: 1965 Persons Assisted
4	Job Training	2025	2027		City of Cheyenne	Job Training and Opportunities	CDBG: \$74,990	Public service activities other than Low/Moderate Income Housing Benefit: 510 Persons Assisted
5	Program Administration	2025	2027		City of Cheyenne	Program Administration	CDBG: \$249,665	

Table 49 – Goals Summary

Goal Descriptions

1	Goal Name	Preserve and Improve Low Income Neighborhoods
	Goal Description	Preserve and Improve Low Income Neighborhoods by supporting infrastructure projects aimed at creating a positive impact for low- to moderate-income households within eligible census tracts and block groups.
2	Goal Name	Public Facility Improvements
	Goal Description	Provide essential public facility improvements for low-to-moderate income households including shelters, transitional housing facilities or other housing that support homeless individuals, survivors of domestic violence, persons with disabilities and seniors.
3	Goal Name	Promote self-sufficiency through service provision
	Goal Description	Provide public service support to vulnerable populations, ensuring access to basic needs such as healthcare, food, and shelter.
4	Goal Name	Job Training
	Goal Description	Provide Job training and employment opportunities for LMI residents of Cheyenne, Wyoming.
5	Goal Name	Program Administration
	Goal Description	To provide program administration for the Community Development Block Grant.

Estimate the number of extremely low-income, low-income, and moderate-income families to whom the jurisdiction will provide affordable housing as defined by HOME 91.315(b)(2)

CDBG funds will provide support for Public Facilities improvements that benefit approximately 132 LMI households. Specifically, funds will be allocated for improvements to transitional and senior housing facilities that support homeless individuals, survivors of domestic violence, persons with disabilities and LMI seniors.

SP-50 Public Housing Accessibility and Involvement – 91.215(c)

Need to Increase the Number of Accessible Units (if Required by a Section 504 Voluntary Compliance Agreement)

The Cheyenne Housing Authority (CHA) has implemented various initiatives to address the needs of public housing effectively. The CHA is a recognized Public Housing Authority (PHA) that administers federal housing programs funded by the U.S. Department of Housing and Urban Development (HUD). While located within the City's jurisdiction, CHA operates independently and is not managed by the City of Cheyenne.

Each year, the CHA receives an annual allocation of Capital Funds from the HUD, which are utilized to maintain and improve public housing properties. These funds are competitively bid and allocated for essential upgrades and replacements, including roofing, siding, windows, flooring, cabinets, HVAC systems, concrete, and blacktop. This ongoing investment ensures that properties remain well-maintained, operate efficiently, and adequately meet the housing needs of tenants.

In addition to capital improvements, the CHA administers the Housing Choice Voucher (Section 8) program, which provides rental assistance to low-income families, the elderly, and individuals with disabilities. This program enables qualifying households to secure suitable housing in the private market while the CHA subsidizes a portion of the rent paid to landlords. Furthermore, the CHA operates specialized housing programs such as Indian Hills Manor, which offer apartments specifically designed for seniors aged 62 and older and individuals with disabilities. These targeted initiatives are crucial in addressing the unique housing requirements of vulnerable populations within the community.

Activities to Increase Resident Involvements

CHA has implemented strategies to encourage public housing residents to become more involved in management and participate in homeownership. Staff engage tenants in planning by inviting them to review and provide feedback on the agency's 5-year and Annual Plans. This initiative allows residents to voice their concerns and needs, which CHA considers when developing plans and allocating Capital Funds, ensuring that improvements align with the community's needs.

Additionally, each multifamily public housing property has a Resident Council that provides a formal structure for tenant participation in management. These councils allow residents to collectively address concerns, propose ideas, and serve as liaisons between tenants and CHA administration.

Is the public housing agency designated as troubled under 24 CFR part 902?

The CHA is currently designated as a Standard PHA and is not classified as "troubled." As a result, Community Development Block Grant (CDBG) financial assistance is not being allocated to the CHA for the upcoming year.

Plan to remove the 'troubled' designation

N/A

DRAFT

SP-55 Barriers to affordable housing – 91.215(h)

Barriers to Affordable Housing

Wyoming faces a critical shortage of nonprofit developers and limited funding for affordable housing. The state must add tens of thousands of new homes by 2030 to meet projected demand, but the current shortfall is especially severe for extremely low-income households, who have far fewer affordable and available rental homes. This disproportionately impacts extremely low-income residents. According to the National Low Income Housing Coalition 2025 Wyoming Housing Profile- only 52 rental homes are affordable and available for every 100 extremely low-income households and 72% of extremely low-income renters are severely cost-burdened. Through consultation with affordable housing developers and as part of the updated 2025 Analysis to Impediments to Fair Housing Study, Wyoming's affordable housing sector has identified several significant barriers that hinder the development of new affordable homes, particularly for extremely low-income households.

Wyoming lacks both a State Revolving Loan Fund and a State Housing Trust Fund, making it one of only a few states without such resources. A recent legislative effort to create a Wyoming State Housing Trust Fund with substantial annual funding did not advance. This fund would have supported new construction, rehabilitation, maintenance, and homelessness initiatives, and included a revolving loan component at or below market rates, as well as capacity-building for affordable housing development.

Six bills were introduced during the 2025 session to simplify housing development by removing barriers or establishing funding, but none passed. For example, House Bill 68 (HB0068), which would have supported tax increment financing for affordable housing by expanding the Wyoming Urban Renewal Code, died in committee. Another attempt to amend the Zoning Protest Petition law—which allows a small percentage of nearby property owners to force a supermajority city council vote on developments—also failed. This law recently blocked a large apartment project in Cheyenne and left the site vacant during a period of high demand.

Developers struggle to make projects financially feasible, particularly due to infrastructure costs. Wyoming's infrastructure funding, managed by the State Lands and Investment Board (SLIB), is accessible only to municipalities, not private developers or nonprofits. Wyoming's state constitution restricts funding to nonprofits except for direct aid to the poor, which does not include affordable housing development. As a result, when municipalities need to apply for the funds, projects are subject to public processes where resident opposition can halt developments. Nonprofits and developers may apply for federal funding through state-administered programs, but these resources are limited and highly competitive.

Strategy to Remove or Ameliorate the Barriers to Affordable Housing

The City's strategy to remove barriers to affordable housing during the 2025–2027 Con Plan period includes the following actions:

To address infrastructure barriers, the City will:

1. Continue seeking funding opportunities, such as SLIB Infrastructure funding, to support affordable housing development. For example, the City provided infrastructure for the Habitat for Humanity Pronghorn Crossing Development, which includes 14 units.
2. Provide regular updates to State legislators on Cheyenne's barriers to affordable housing development and advocate for policies and funding that support affordable housing and economic development.
3. Work with the Wyoming Business Council to amend their eligibility requirements for the Business Ready Grant and Loan program to include workforce housing.

To address limited developer capacity, the City will:

1. Continue exploring strategies to streamline local permitting and zoning processes.
2. Further develop public engagement tools to educate the community about city projects and initiatives, and provide clear, consistent information to developers.
3. Collaborate with state agencies to provide gap funding.

To improve access to affordable housing, the City will:

1. Utilize CDBG funds to support infrastructure and facility upgrades for transitional housing, as well as housing for seniors and vulnerable populations.
2. Participate in long-term planning meetings for affordable housing projects involving multiple stakeholders, with a focus on developing housing for vulnerable populations such as seniors and persons with disabilities.
3. Explore innovative collaborations, such as the Hope Springs Development Project in Greeley, CO—a partnership between Habitat, the City, the County, and private developers—which will provide 491 units on 42 acres using LIHTC.

SP-60 Homelessness Strategy – 91.215(d)

Reaching out to homeless persons (especially unsheltered persons) and assessing their individual needs

The H&CD Division staff has adopted a proactive approach to engaging homeless individuals, particularly those who are unsheltered, and assessing their unique needs. The Committee recently reviewed the results of the 2025 Point-In-Time (PIT) Count, noting a significant improvement in Cheyenne's outreach: 34 individuals were interviewed in 2025, compared to just 5 in 2024. Despite this progress, challenges remain in reaching certain populations, such as people residing in cars who may feel intimidated to participate, as well as those staying in hotels. The Committee is currently developing targeted strategies to better reach and accurately count these groups.

The Community Development Manager (CDM) will serve on the 2026 PIT Count Planning Committee and act as Secretary, coordinating and attending monthly meetings from May 2025 through January 2026. The CDM will collaborate with members of the PIT Count Committee and the Wyoming Continuum of Care (CoC) to develop effective strategies for engaging hard-to-reach unsheltered individuals, connecting them with services, and participating directly in interviews during the January 2026 PIT Count.

Additionally, the CDM will attend Wyoming CoC meetings and will participate in CoC committees, such as the Data Analysis Committee, to further assess and address the specific needs of unsheltered populations. Ongoing outreach efforts will include visiting food kitchens and conducting interviews with homeless individuals to gain deeper insight into their needs. The CDM will share this information with the service delivery network to help improve outcomes for those experiencing homelessness.

Addressing the emergency and transitional housing needs of homeless persons

The H&CD Division has a longstanding commitment to addressing the emergency shelter and transitional housing needs of homeless individuals and families. For Program Year 2025, the City allocated \$60,000 in CDBG funds to support the Community Action of Laramie County's Smith Manor Transitional Housing project, specifically to provide new, safe, and accessible sidewalks for the facility. Smith Manor offers 18 efficiency apartments for homeless individuals. Of these, 12 units serve as transitional housing for men and women working toward regaining stability and employment, with residents able to stay for up to two years. The remaining six apartments are designated for individuals with disabilities, who may reside there permanently. Rent is income-based: for residents with a monthly income of \$400 or higher, rent is set at \$240. For those earning less than \$400 per month, rent is

calculated as a percentage of their income. The security deposit is \$240, which can be paid in installments over four months to ease the financial burden on new tenants.

Additionally, the City has allocated \$12,483 in PY25 CDBG funds and \$7,517 in matching funds—totaling \$20,000—to support a local domestic violence shelter through utility reimbursement. The shelter anticipates serving approximately 60 clients each month. The grant covers utility costs for nine months, enabling the shelter to serve an estimated 540 clients annually. Clients include children, young adults, seniors, families, crime victims, homeless individuals, and people with special needs. The shelter has reported a 28% increase in bed nights occupied over the past two years, a trend attributed to economic challenges and a tightening housing market, which make it more difficult for victims to secure stable housing and achieve self-sufficiency.

Through these targeted investments in transitional and emergency housing, the City continues to address critical housing needs and support vulnerable residents on their path to stability and independence.

Helping homeless persons (especially chronically homeless individuals and families, families with children, veterans and their families, and unaccompanied youth) make the transition to permanent housing and independent living, including shortening the period of time that individuals and families experience homelessness, facilitating access for homeless individuals and families to affordable housing units, and preventing individuals and families who were recently homeless from becoming homeless again.

The City is committed to helping homeless individuals transition to permanent housing and independent living through a collaborative, data-driven approach. By partnering with local organizations, the city will review recommendations from the 2025 Wyoming CoC Homeless Needs Assessment and analyze data specific to Cheyenne. This process will inform targeted strategies to reduce the duration of homelessness and prevent its recurrence among those recently housed.

Additionally, the City will coordinate with other HUD-funded organizations, including the Cheyenne Housing Authority, the Wyoming Department of Health's Communicable Disease Unit (which manages the Housing Opportunities for Persons With AIDS [HOPWA] program, a federal initiative that provides housing and related services for low-income individuals living with HIV/AIDS and their families), and

local recipients of CoC funding, to pool resources and expand access to affordable housing. These efforts are designed to create a coordinated response that addresses both the immediate and long-term needs of homeless individuals and families in the community.

Help low-income individuals and families avoid becoming homeless, especially extremely low-income individuals and families who are likely to become homeless after being discharged from a publicly funded institution or system of care, or who are receiving assistance from public and private agencies that address housing, health, social services, employment, education or youth needs

Cheyenne has some resources available to assist individuals discharged from publicly funded institutions and systems of care. Local nonprofits, such as Volunteers of America, work collaboratively to support these individuals as they transition back into the community. At the state level, the Wyoming Health Council partners with the Wyoming Department of Corrections to facilitate referrals to vital community resources and providers. These referrals have helped some individuals access essential services, including medication, primary care, housing, and employment opportunities.

Currently, in Wyoming, no state program ensures individuals being released from an institution are connected to outpatient care and/or supportive services. However, Cheyenne Regional Medical Center is partnering with local public safety agencies to implement a comprehensive Medication-Assistance Treatment program. This initiative will provide continuous care for individuals with opioid use disorder from incarceration to community-based recovery services. The goal of this program is to reduce opioid related overdose deaths, improve recovery outcomes, and reduce recidivism. More consistency in discharge protocol planning and continuity of care is needed. Programs that offer wraparound services are critical to ensuring that gaps in benefits and services are reduced.

The City is dedicated to helping low-income individuals and families, especially extremely low-income households and those exiting public institutions, avoid homelessness by:

- Coordinating with Comea to support the establishment of transitional housing units for individuals leaving incarceration.
- Utilize CDBG funds to promote digital learning and employment training programs for LMI individuals and families, including unaccompanied youth receiving assistance from agencies focused on housing, health, social services, employment, education, or youth needs.
- Seek opportunities to coordinate with or provide CDBG assistance to programs to help them develop better continuity of care and wrap around services for individuals being discharged from a publicly funded institution or system of care, or who are receiving assistance from public and private agencies that address housing, health, social services, employment, education or youth needs

Through these collaborative initiatives, the City and its partners are committed to supporting vulnerable populations and preventing homelessness by ensuring equitable access to essential resources and services.

DRAFT

SP-65 Lead based paint Hazards – 91.215(i)

Actions to address LBP hazards and increase access to housing without LBP hazards

The City is actively working to reduce lead-based hazards and increase access to safe, lead-free housing through infrastructure upgrades, certified remediation, public education, and compliance with federal rules,

Lead in Water: Identification and Replacement

- The Cheyenne Board of Public Utilities (BOPU) is leading efforts to address the lead in the city's water system. BOPU has mapped around 28,000 service line locations and created a Lead Service Line Inventory to identify which lines may contain lead. So far, only a small number of lead lines have been confirmed.
- When a lead line is found or suspected, BOPU works directly with the property owner to replace it. Residents are notified if their property has a confirmed or suspected lead line. Those with confirmed lead lines receive educational materials and water filtration pitchers.
- BOPU is also adjusting the water's pH to minimize the risk of lead leaching from pipes into the water supply. The responsibility for service lines is shared: BOPU maintains the section from the water main to the curb stop, while homeowners are responsible for the section from the curb stop to their home. Regular water testing by BOPU shows that lead levels in Cheyenne's water remain below action thresholds at most sites.

Lead-Based Paint: Inspection and Remediation

The Housing & Community Development (H&CD) Division requires lead paint inspections and remediation for rehabilitation projects in homes built before 1978. Certified inspectors and contractors, following EPA guidelines, handle these tasks.

Homeowners receive information about the risks of lead-based paint, and local non-profits help with outreach and education. The City's Economic Resource Administrator and Community Development Manager are seeking funding to help income-eligible property owners replace lead water lines.

State and Community Support

- The Wyoming Department of Health (WHD) runs a lead poisoning prevention program and recommends that all children in Wyoming be tested for lead at 12 and 24 months. The department provides resources on prevention, testing, and abatement.

- The Cheyenne Housing Authority (CHA) has already abated all lead-based paint in its public housing units by following the required regulations.

How are the actions listed above related to the extent of lead poisoning and hazards?

While it is very difficult to determine the exact extent of lead poisoning and hazards in the jurisdiction, the actions listed above demonstrate that BOPU, the City's H&CD Division, CHA and WDH are all working to reduce the risk of exposure from lead hazards in water, soil, and homes. These efforts include notifying residents about potential lead service lines, adjusting water chemistry to minimize lead leaching, and collaborating with property owners to identify and replace lead pipes. In addition, the WDH is working to improve blood lead testing, reporting, and surveillance, which will help ensure that cases of lead exposure are identified and managed more effectively.

Lead is most commonly found in homes built before 1978. Nationally, around 44% of the U.S. housing stock was built before 1970, and in Cheyenne, about 35% of homes were built before 1970. This demonstrates that a significant number of homes in Cheyenne may contain lead, potentially exposing residents to lead hazards. While the extent of lead poisoning and hazards in Cheyenne is difficult to determine, the actions being taken by local agencies help to reduce these risks for Cheyenne residents.

How are the actions listed above integrated into housing policies and procedures?

BOPU's measures focus on ensuring water safety, while their policies for resident notification and resource provision illustrate how these actions are embedded in operational protocols. H&CD Division's policies require that all HUD-funded projects comply with federal standards for testing and remediation. Additionally, subrecipients are mandated to provide EPA Renovate Right information and actively educate clients and beneficiaries about the dangers of lead exposure and the importance of remediation.

SP-70 Anti-Poverty Strategy – 91.215(j)

Jurisdiction Goals, Programs and Policies for reducing the number of Poverty-Level Families

Cheyenne does not have a formal anti-poverty strategy, but it implements a wide range of goals, programs, and policies across multiple departments to reduce the number of poverty-level families. These efforts have become especially important considering recent economic challenges, such as increased inflation and a rise in unemployment. While the City's overall poverty rate is relatively low at about 9.3%, certain groups—including children, females aged 18-24, and persons with disabilities, face much higher rates of poverty.

The City prioritizes support for children, women, people with disabilities, and seniors. Reducing childhood poverty is a central goal, with investments in programs such as the City's youth programs, United Way, CDBG funding, and the Youth Alternatives Program. For women, especially those affected by domestic violence or single mothers, CDBG funds are used to support shelters, job training programs like Climb Wyoming, and victim assistance services. The Mayor's Council for People with Disabilities focuses on improving accessibility and advocating for the needs of disabled residents, addressing barriers in employment, transportation, and public facilities.

During the 2025-2027 Con Plan Period, the H&CD Division will use CDBG funds to support public services for LMI residents. These services include healthcare access, digital literacy, job training, domestic violence support, and senior meals. Infrastructure improvements, such as the Safe Routes to School Initiative and ADA upgrades to transitional housing, are also targeted to reduce poverty for LMI residents.

The Youth Alternatives Department offers counseling, crisis intervention, mentoring, and academic support for at-risk youth and their families. Programs like the Foster Grandparent Program and the Academic Support and Enrichment Center provide mentoring, tutoring, and after-school activities to improve educational and emotional outcomes, reduce juvenile offenses, and strengthen family stability.

For seniors, the City provides transportation and health services through partnerships with the Cheyenne Housing Authority and local transit programs, as well as providing annual funding for the Senior Activity Center. Employment initiatives, including partnerships with organizations like Dad's

Making a Difference and the Laramie County Community College trucking program, help create job opportunities for residents facing employment barriers.

These coordinated efforts are designed to address immediate needs, improve infrastructure, and support long-term self-sufficiency for families and individuals most at risk of poverty.

How are the Jurisdiction poverty reducing goals, programs, and policies coordinated with this affordable housing plan

Cheyenne's poverty-reducing programs and policies are closely coordinated with its affordable housing plan. The City recognizes that LMI households are disproportionately cost-burdened and face significant barriers to securing affordable housing, with many spending more than 30% of their income on housing and having to make difficult choices between basic needs.

The City's CDBG-funded activities for Program Year 2025, including transitional housing facility upgrades, shelter support, job training for single mothers, and free digital literacy for LMI City residents, are intentionally designed to both prevent poverty and provide direct assistance to residents facing economic hardship. These activities are aligned with Con Plan goals, which explicitly support reducing poverty and fostering self-sufficiency. By reducing the number of barriers that LMI residents face, these efforts have a direct impact on access to affordable housing.

SP-80 Monitoring – 91.230

Describe the standards and procedures that the jurisdiction will use to monitor activities carried out in furtherance of the plan and will use to ensure long-term compliance with requirements of the programs involved, including minority business outreach and the comprehensive planning requirements

The City follows procedures established by HUD to ensure that all applicable laws, regulations, and eligibility requirements are met, including minority business outreach and comprehensive planning requirements. All CDBG funds are managed by the H&CD Division and disbursed by the City's Finance Department. Expenses are drawn down monthly using the Integrated Disbursement and Information System (IDIS), which also serves as the platform for reporting program performance. This system ensures that all financial transactions are transparent, well-documented, and compliant with federal guidelines. The H&CD Division maintains systems for tracking and data collection to support its comprehensive planning efforts. All activities are reviewed to ensure alignment with HUD's planning requirements and the City's own strategic priorities.

The H&CD Division ensures ongoing compliance with HUD program requirements and is responsible for tracking the progress of all funded activities. Monitoring is conducted in several forms, including desk reviews, phone and email communications, and on-site visits. These procedures are detailed in the City's Sub-Grantee Procedures manual. For each new General Service Project, the Community Development Manager (CDM) conducts at least two on-site visits. The first visit, held before the project begins, focuses on reviewing the subrecipient's accounting system, understanding financial requirements, required policies and procedures, and record-keeping practices. Later visits are to evaluate the project's progress, take site photos, ensure compliance by conducting interviews with laborers and meet with agency and construction staff, as needed.

Ongoing projects and experienced subrecipients are monitored at least once per program year through on-site visits that focus on financial and programmatic compliance. Subrecipients are also required to submit regular performance status reports, which provide updates on progress, identify any issues or delays, and include demographic information on clients served, such as race, ethnicity, and income.

AP-15 Expected Resources – 91.220(c)(1,2)

Introduction

An annual action plan, included within a Consolidated Plan (Con Plan) for a Community Development Block Grant (CDBG) entitlement, is a required document that outlines how a jurisdiction will use its allocation of federal CDBG funds during a single program year to address local housing and community development priorities. The AP-15 Section of the Action Plan for the City of Cheyenne’s 2025-2027 Con Plan details how the City will allocate HUD CDBG funds during the first year of the Con Plan, the 2025 Program Year.

During the 2025 Program Year (PY25), the City will allocate CDBG funds to the following eligible activities:

- Neighborhood and infrastructure improvements
- Public facility enhancements
- Public services
- Job training and economic development
- Administration and planning

These CDBG activities were recommended by the Housing & Community Development (H&CD) Division’s Advisory Council to the City Council, as they meet HUD requirements for eligible activities and fulfill a National Objective to benefit low- to moderate-income individuals or households. Additionally, these activities are identified as goals and priority needs in the Con Plan.

The allocation process is conducted through an annual grant cycle and includes opportunities for citizen participation and public comment. The allocation of resources is broken out in the Anticipated Resources Table and the narrative sections below.

Additional Notes about the Anticipated Resources Table:

- The “Program Income” column shows \$0.00 because the City does not receive program income.
- The “Annual Allocation” of \$416,012, reflects the actual amount the City received from HUD for the 2025 Program Year. The City received the official allocation letter from the HUD CPD Region 8 Office in Denver via email on Monday, May 19, 2025.
- The \$298,580 listed in the “Prior Year Resources” column consists of \$39,527.20 in unused CDBG funds, which the City will allocate to the Safe Routes to School project and \$259,000 for a Supplemental Grant Cycle.
- The amount shown in the “Expected Amount Available in the Con Plan” column, \$832,024, is calculated by taking the actual allocation for Program Year 2025 (\$416,112) and using that

amount as the estimated allocation for both Program Year 2026 and Program Year 2027.

Anticipated Resources

Program	Source of Funds	Uses of Funds	Expected Amount Available Year 1				Expected Amount Available Remainder of Con Plan \$	Narrative Description
			Annual Allocation: \$	Program Income: \$	Prior Year Resources: \$	Total: \$		
CDBG	public - federal	Admin and Planning Public Facility and Improvements Public Services	416,112.00	0.00	298,580.00	714,692.00	832,024.00	The City will allocate CDBG funds over the three-year Con Planning period to support public facility and neighborhood improvements, public services, job training and economic development, as well as administration and planning.

Table 50 - Expected Resources – Priority Table

Explain how federal funds will leverage those additional resources (private, state and local funds), including a description of how matching requirements will be satisfied

The City will maximize federal resources by combining HUD allocations with local matches and collaborative investments to increase the impact of limited CDBG funds. Here's how funds will be leveraged:

Public Service Funding Match:

- 2025 Commitment: \$62,416 in HUD funds + \$37,584 local match = \$100,000 total for five public service projects (\$20,000 each).
- Future Funding Match: If HUD allocations remain stable in 2026–2027, the City will continue matching funds to sustain these critical services for vulnerable populations.

CDBG Program Administration:

- Compliance Focus: \$83,222 allocated to administration, meeting HUD's 20% cap, ensures efficient program delivery.
- Cost Sharing: The City supplements this by covering part of a Community Development Manager's salary/benefits through its General Fund.

Safe Routes to School Infrastructure Project:

- \$250,000 CDBG Investment: provides CDBG funds for critical safety improvements for the Alta Vista Elementary School in a low-to-moderate income (LMI) neighborhood, including \$39,527 in repurposed prior-year funds. The City will cover the costs of staff time and project management for the Traffic Engineer and a portion of the salaries of the H&CD staff.
- FORMAK Foundation: Secures additional grants to update Wyoming's Safe Routes plan and fund implementation projects.
- The City of Cheyenne's "5th Penny" tax is an optional 1% sales and use tax approved by voters to be used for general purposes, specifically for road maintenance and improvements.

Supplemental Grant Opportunities

- \$250,000 Shovel-Ready Projects: Unspent CDBG funds will finance infrastructure/public facilities serving LMI communities.
- Priority Criteria: Projects which demonstrate multi-resource leverage (e.g., state grants, private donations) and serve vulnerable groups will be prioritized for funding.

This integrated strategy ensures every federal dollar attracts complementary investments, driving greater equity and scalability in community development efforts.

If appropriate, describe publicly owned land or property located within the jurisdiction that may be used to address the needs identified in the plan

The Safe Routes to School Project will be implemented within City rights-of-way, utilizing publicly owned land to support infrastructure and facility improvements. These enhancements will directly benefit LMI neighborhoods in Cheyenne, Wyoming. This project addresses a priority need to improve low-income neighborhoods and aligns with the goal of enhancing infrastructure, as identified in the Con Plan.

AP-20 Annual Goals and Objectives

Goals Summary Information

Sort Order	Goal Name	Start Year	End Year	Category	Geographic Area	Needs Addressed	Funding	Goal Outcome Indicator
1	Preserve and Improve Low Income Neighborhoods	2025	2027	Non-Housing Community Development		Neighborhood Improvements and Infrastructure	CDBG: \$250,000.00	Public Facility or Infrastructure Activities other than Low/Moderate Income Housing Benefit: 3215 Persons Assisted
2	Public Facility Improvements	2025	2027	Affordable Housing Homeless Non-Homeless Special Needs	City of Cheyenne	Public Facilities	CDBG: \$60,000.00	Public Facility or Infrastructure Activities for Low/Moderate Income Housing Benefit: 18 Households Assisted
3	Promote self-sufficiency through service provision	2025	2027	Homeless Non-Homeless Special Needs	City of Cheyenne	Supportive Services for Low-Income & Special Needs	CDBG: \$37,449.00	Public Facility or Infrastructure Activities other than Low/Moderate Income Housing Benefit: 535 Persons Assisted
4	Job Training	2025	2027		City of Cheyenne	Job Training and Opportunities	CDBG: \$24,966.00	Public Facility or Infrastructure Activities other than Low/Moderate Income Housing Benefit: 170 Persons Assisted

Sort Order	Goal Name	Start Year	End Year	Category	Geographic Area	Needs Addressed	Funding	Goal Outcome Indicator
5	Program Administration	2025	2027		City of Cheyenne	Program Administration	CDBG: \$83,222	

Table 51 – Goals Summary

Goal Descriptions

1	Goal Name	Preserve and Improve Low Income Neighborhoods
	Goal Description	Preserve and Improve Low Income Neighborhoods by supporting infrastructure projects aimed at creating a positive impact for low- to moderate-income households within eligible census tracts and block groups.
2	Goal Name	Public Facility Improvements
	Goal Description	Provide essential public facility improvements for low-to-moderate income households including shelters, transitional housing facilities or other housing that support homeless individuals, survivors of domestic violence, persons with disabilities and seniors.
3	Goal Name	Promote self-sufficiency through service provision
	Goal Description	Provide public service support to vulnerable populations, ensuring access to basic needs such as healthcare, food, and shelter.
4	Goal Name	Job Training
	Goal Description	Provide Job training and employment opportunities for LMI residents of Cheyenne, Wyoming.
5	Goal Name	Program Administration
	Goal Description	To provide program administration for the Community Development Block Grant.

AP-35 Projects – 91.220(d)

Introduction

The AP-35 Projects Section of the PY25 Action Plan provides details about the projects selected to receive CDBG funding for the City's upcoming program year, and the amount awarded to each project. Additionally, the annual goals and priority-needs are identified and the anticipated number of beneficiaries that the activity will benefit. Additionally, reasons for allocation priorities and obstacles in addressing the City's underserved needs are discussed.

Projects

#	Project Name
1	Community Action of Laramie County Smith Manor Sidewalks
2	Safe Routes to School-Alta Vista Elementary School Safety Improvements
3	Meals On Wheels: More than a Meal for Laramie County Seniors
4	Healthworks: Enhancing Access to Healthcare with Interpretation Services
5	Domestic Violence Shelter: Utility Assistance
6	Climb Wyoming Job Training
7	LCCC ACES Program-Digital Literacy
8	Program Administration

Table 52 - Project Information

Describe the reasons for allocation priorities and any obstacles to addressing underserved needs

The City's action plan priorities are shaped by input from nonprofits, community organizations, survey data, and City staff. The primary challenge in addressing underserved needs is limited funding, which is further strained by rising costs and inflation impacting Cheyenne's low- and moderate-income (LMI) residents. Additionally, many nonprofits find CDBG regulations complex, which discourages some from pursuing larger, more impactful projects.

To help overcome these barriers, the H&CD Division offers technical support and outreach, assisting organizations in navigating requirements and encouraging more applications. Nonprofits that receive funding are enthusiastic about meeting community needs and value the ongoing impact of CDBG funding in Cheyenne.

Allocation priorities were determined through debriefs on the Con Plan Consultations between H&CD

staff and the H&CD Advisory Council. For the Program Year 2025 (PY25) grant cycle, the H&CD Division accepted nineteen Letters of Intent (LOI). The Council reviewed these and determined that all proposed activities met HUD eligibility requirements and the National Objective to serve LMI residents. As a result, all agencies submitting LOIs were invited to submit full applications. However, no agencies applied for acquisition or rehabilitation for housing, likely due to capacity limitations and concerns about regulatory requirements for larger projects (such as BAP, environmental review, Davis-Bacon, and Section 3 compliance).

Based on these consultations, the H&CD staff and Advisory Council prioritized activities that not only address identified needs but also have willing and capable organizations ready to meet HUD requirements. Additionally, their goal was to shorten the Con Plan cycle from five to three years and use the next three years to educate and engage housing developers about CDBG opportunities, laying the groundwork for future partnerships and grant applications.

When the PY25 grant applications were received in January, the Advisory Council reviewed 15 applications, including a large project submitted by the City. There was a significant increase in eligible Public Service applications, and with support from the City Economic Coordinator and the Mayor, matching funds from the H&CD Reserve funds were approved so that five public service projects could each be awarded \$20,000. This commitment ensures that the City can better meet priority needs identified in the Con Plan.

1	Project Name	Community Action of Laramie County Smith Manor Sidewalks
	Target Area	City of Cheyenne
	Goals Supported	Public Facility Improvements
	Needs Addressed	Public Facilities
	Funding	CDBG: \$60,000.00
	Description	The Community Action of Laramie County (CALC) Smith Manor Sidewalks project will utilize Community Development Block Grant (CDBG) funds to repair and replace the sidewalks and walkways at Smith Manor, a transitional housing facility. These improvements will enhance resident safety and help CALC maintain compliance with Wyoming Community Development Authority (WCDA) regulations, thereby supporting the continued funding and operation of the project. This initiative is expected to benefit approximately 18 low-to-moderate-income households and directly advances the City's annual goal and priority to provide public facility improvements for the benefit of low-to-moderate-income housing residents.
	Target Date	6/15/2026
	Estimate the number and type of families that will benefit from the proposed activities	Approximately eighteen households will benefit from this activity.
	Location Description	This activity will take place at the Smith Manor Transitional Housing units, located at 555 West 6th Street in Cheyenne.
	Planned Activities	The activity will provide CDBG funds to repair and replace the sidewalks and walkways at the Smith Manor Transitional Housing units.
2	Project Name	Safe Routes to School-Alta Vista Elementary School Safety Improvements
	Target Area	City of Cheyenne
	Goals Supported	Preserve and Improve Low Income Neighborhoods
	Needs Addressed	Neighborhood Improvements and Infrastructure
	Funding	CDBG: \$250,000.00
	Description	The Safe Routes to School Project will provide critical school zone safety improvements. This activity meets the annual goal to preserve and improve low-income neighborhoods and addresses the priority

		need for Neighborhood and Infrastructure Improvements. This activity is expected to serve 3,215 low- and moderate-income residents, specifically targeting Census Tract 7, Block Group 3, where all beneficiaries are Cheyenne residents. It directly supports the City's annual goal to provide public facility improvements for low-to-moderate income and addresses the priority need to improve neighborhoods and infrastructure.
	Target Date	6/15/2026
	Estimate the number and type of families that will benefit from the proposed activities	The project is expected to serve an estimated 3,215 families, all of whom are residents of Cheyenne. This initiative qualifies as an Area Benefit project for low- and moderate-income residents, specifically targeting Census Tract 7, Block Group 3, where all beneficiaries are Cheyenne residents. Of the persons served, 61.28%, or approximately 1,970 households, will have incomes at or below 80% of the Area Median Income, based on local income limits for Laramie County, Wyoming.
	Location Description	The activity will be located at and around Alta Vista Elementary School located at 1514 East 16th Street in Cheyenne.
	Planned Activities	This project involves several critical School Zone safety improvements at Alta Vista Elementary School. Planned enhancements include installing school zone flashing beacons, rehabilitating pavement, adding crosswalks with durable thermoplastic markings, and implementing Rectangular Rapid Flashing Beacon (RRFB) systems at main school crossings.
3	Project Name	Meals On Wheels: More than a Meal for Laramie County Seniors
	Target Area	City of Cheyenne
	Goals Supported	Promote self-sufficiency through service provision
	Needs Addressed	Supportive Services for Low-Income & Special Needs
	Funding	CDBG: \$12,483
	Description	\$12,483 in CDBG funding will help provide meals for individuals over the age of 65 who are living below the poverty line and currently receive SNAP benefits. This support will allow their SNAP funds to stretch further throughout the month. In addition, the funding will be used to enhance outreach efforts, connecting with other community members who are not yet receiving meals but could benefit from the program. The \$12,483 in CDBG funds will be leveraged with a \$7,517 matching contribution from the City's H&CD Reserve funds.

	Target Date	6/15/2026
	Estimate the number and type of families that will benefit from the proposed activities	This activity will serve approximately 300 residents by providing meals and outreach to low-to moderate-income seniors.
	Location Description	Meals on Wheels beneficiaries reside throughout the entire City of Cheyenne.
	Planned Activities	This activity will provide meals and outreach to LMI seniors in Cheyenne, Wyoming.
4	Project Name	Healthworks: Enhancing Access to Healthcare with Interpretation Services
	Target Area	City of Cheyenne
	Goals Supported	Promote self-sufficiency through service provision
	Needs Addressed	Supportive Services for Low-Income & Special Needs
	Funding	CDBG: \$12,483
	Description	\$12,483 in CDBG funds will be used to implement a new, comprehensive professional interpretation service at Healthworks. This expanded initiative will cover a wider range of languages and introduce video conferencing capabilities, allowing patients to communicate directly in their preferred language during medical, behavioral health, and case management appointments. By integrating video remote interpreting, Healthworks will enhance the patient experience, improve communication, and ensure equitable access to care for individuals with limited English proficiency. This activity is expected to serve approximately 175 patients annually with language interpretation services. It directly supports the City's annual goal to provide supportive services for low-to-moderate income and special needs residents. The \$12,483 in CDBG funds will be leveraged with a \$7,517 matching contribution from the City's H&CD Housing Program funds.
	Target Date	6/15/2026
	Estimate the number and type of families that will benefit from the proposed activities	HealthWorks anticipates serving 175 City of Cheyenne patients each year with language interpretation services.
	Location Description	

	Planned Activities	CDBG funding will be used to provide language interruptive services to provide healthcare services to patients with limited English proficiency.
5	Project Name	Domestic Violence Shelter: Utility Assistance
	Target Area	City of Cheyenne
	Goals Supported	Promote self-sufficiency through service provision
	Needs Addressed	Supportive Services for Low-Income & Special Needs
	Funding	CDBG: \$12,483
	Description	CDBG funds will be used to provide utility reimbursement for a local domestic violence shelter. This critical support will help the shelter manage rising utility costs and continue to offer safe refuge for approximately 50-60 victims of domestic violence, sexual assault, and/or stalking each month, over one-third of whom are children. This initiative directly advances the City's annual goal to provide supportive services for low-to-moderate income and special needs residents. The \$12,483 in CDBG funds will be leveraged with a \$7,517 matching contribution from the City's H&CD Housing Program funds.
	Target Date	6/15/2026
	Estimate the number and type of families that will benefit from the proposed activities	The domestic violence shelter estimates that up to 60 families will benefit from the proposed activity each month.
	Location Description	This address is confidential as it is a domestic violence shelter.
	Planned Activities	CDBG funds will be used to provide utility reimbursement for a local domestic violence shelter.
6	Project Name	Climb Wyoming Job Training
	Target Area	City of Cheyenne
	Goals Supported	Job Training
	Needs Addressed	Job Training and Opportunities
	Funding	CDBG: \$12,483
	Description	CDBG funds will be used to assist Climb Wyoming in providing free job training and counseling for low-income single mothers in Cheyenne, empowering them to increase their earning potential and achieve self-sufficiency. This initiative will remove financial barriers to workforce development, equipping Cheyenne's mothers with the

		skills and support needed to secure higher-wage employment and build more stable futures for their families. This activity advances the City's annual goal to provide supportive services, specifically through job training to approximately 20 low-to-moderate income (LMI) residents. The \$12,483 in CDBG funds will be leveraged with a \$7,517 matching contribution from the City's H&CD Housing Program funds.
	Target Date	6/15/2026
	Estimate the number and type of families that will benefit from the proposed activities	Climb Wyoming estimates that CDBG funds will help assist 20 single mothers with employment training annually.
	Location Description	Climb Wyoming beneficiaries reside throughout the entire City of Cheyenne.
	Planned Activities	This CDBG-funded initiative will offer employment training and counseling services to low-income single mothers in Cheyenne.
7	Project Name	LCCC ACES Program-Digital Literacy
	Target Area	City of Cheyenne
	Goals Supported	Job Training
	Needs Addressed	Job Training and Opportunities
	Funding	CDBG: \$12,483
	Description	The Laramie County Community College (LCCC) ACES Program-Digital Literacy project will utilize CDBG funds to provide digital literacy instruction to approximately 150 ACES students residing in Cheyenne. The digital literacy program meets the City's annual goal and priority to provide job training and opportunities to low-to-moderate income Cheyenne residents. The \$12,483 in CDBG funds will be leveraged with a \$7,517 matching contribution from the City's H&CD Housing Program funds.
	Target Date	6/15/2026
	Estimate the number and type of families that will benefit from the proposed activities	The proposed activity will benefit approximately 150 LMI students with free digital literacy training.
	Location Description	Laramie County Community College ACES program beneficiaries reside throughout the entire City of Cheyenne.

	Planned Activities	This activity will provide CDBG funds to assist the LCCC ACES program in offer free digital literacy instruction.
8	Project Name	Program Administration
	Target Area	City of Cheyenne
	Goals Supported	Program Administration
	Needs Addressed	Program Administration
	Funding	CDBG: \$83,222.40
	Description	The \$83,222.40 in CDBG funding will support the City in administering the CDBG Program for the 2025 program year. This funding will ensure compliance with federal regulations, facilitate public participation, and enable the effective allocation, monitoring, and reporting of funds to address local community development needs. This support will help the City achieve its consolidated plan goals and priority of providing effective program administration for the CDBG grant.
	Target Date	6/30/2026
	Estimate the number and type of families that will benefit from the proposed activities	Program administration supports all the CDBG-funded activities in serving the anticipated beneficiaries the organization who were funded listed on the grant application.
	Location Description	Program Administration will support activities that benefit low- to moderate-income residents of the City.
	Planned Activities	CDBG funding for this activity will support the administration of the City's CDBG Program for the 2025 program year.

AP-50 Geographic Distribution – 91.220(f)

Description of the geographic areas of the entitlement (including areas of low-income and minority concentration) where assistance will be directed

Assistance will be directed to Qualified Census Tracts (QCTs) and Low- and Moderate-Income (LMI) block groups. Within the City of Cheyenne, targeting is based on analysis of local data included on the HUD CPD map tool, which identifies areas of need.

For the 2025 Program Year, activities have been funded in the following areas:

Tract 7, Block Group 1 (56021000701):

- Located just east of downtown Cheyenne, this tract is bounded by Pershing Boulevard to the north, 15th Street to the south, and is adjacent to the Union Pacific rail yard, which separates Cheyenne's north and south sides. The tract's eastern boundary runs from Evans Avenue on the west to Logan Avenue on the east. This predominantly residential area includes Holiday Park and the Cheyenne Family YMCA. CDBG funds will support critical school safety improvements at Alta Vista Elementary School, situated between Rollins and Logan Avenue, just east of Holiday Park and the YMCA.

Tract 7 Block Group 2 (56021000702):

- West of Tract 7.02, this area contains the offices of Community Action of Laramie County, which operates the Smith Manor Transitional Housing program. For Program Year 2025, CDBG funds are allocated for sidewalk replacement to improve resident safety. The City of Cheyenne Municipal Building (2101 O'Neil Ave.) is also located in this tract, which houses the Housing & Community Development Division. While Smith Manor itself is not in a QCT or LMI block, its residents, homeless individuals in transitional housing, qualify as a HUD presumed benefit category.

Geographic Distribution

Target Area	Percentage of Funds
City of Cheyenne	100%

Table 53 - Geographic Distribution

Rationale for the priorities for allocating investments geographically

The City of Cheyenne is prioritizing Community Development Block Grant (CDBG) funding in low- and moderate-income (LMI) block groups and census tracts. This approach ensures that CDBG funds are directed toward area benefit projects, particularly for larger infrastructure and public facility improvements, in compliance with program requirements. The city is dedicated to investing these resources in primarily residential LMI neighborhoods, so that LMI families directly experience the benefits of these investments.

DRAFT

AP-55 Affordable Housing – 91.220(g)

Introduction

The City has allocated funds for the Smith Manor Transitional Housing Sidewalk Repair and Replacement project, which will upgrade transitional housing facilities and benefit approximately 18 individuals each year.

During the previous Con Planning period, CDBG funds were allocated for home rehabilitation. Rehabilitation is not included as a priority need in the 2025-2027 Con Plan as the subrecipient experienced challenges coordinating the repairs projects, particularly, issues meeting extensive environmental review requirements. The funds were recently returned and will be used to fund facility rehabilitation or infrastructure improvements that benefit low- to moderate- income households.

Other affordable housing activities, such as the acquisition of existing units, were also excluded from the upcoming plan due to difficulties in spending previously allocated funds, largely because of complex environmental review requirements and limited affordable housing inventory. The City is reassessing which activities can be implemented more efficiently and is seeking ways to better align projects with regulatory requirements and local organizational capacity. Additionally, the City will begin working with consulting agencies to conduct CEST-level and EA-level environmental reviews for larger projects. This approach will relieve staff of this responsibility and allow experts with specialized knowledge of environmental regulations to complete the work.

Rental assistance remains an important priority. While applications for the 2025 program year were submitted by nonprofits to provide rental assistance, the H&CD Advisory Council prioritized other public service needs due to high demand, organizational capacity, and past performance considerations. The City remains committed to partnering with strong organizations and encourages future project proposals that provide public facility or infrastructure improvements for LMI households, ensuring CDBG resources continue to support Cheyenne’s affordable housing and community development goals.

DRAFT

AP-60 Public Housing – 91.220(h)

Introduction

The Cheyenne Housing Authority (CHA) plays a crucial role in addressing the need for low-income housing in Cheyenne. CHA's mission is to provide decent, safe, and sanitary housing to elderly, disabled, and economically disadvantaged families who cannot secure housing through conventional means. CHA manages 266 public housing units in Cheyenne, including 97 scattered-site single-family homes and multifamily properties for seniors and disabled tenants. CHA also owns and operates three WRAP houses for larger households and provides market-rate rental units, including 32 townhomes for the elderly in Foxcrest II, seven single-family homes in Cheyenne, and 12 Weaver Road Apartments. The Housing Choice Voucher Program, administered by CHA, is the primary federal program assisting very low-income households, elderly, and disabled persons in Cheyenne to afford decent, safe, and sanitary housing in the private market. Subsidies are paid directly to landlords on behalf of eligible families, who pay the remaining rent difference. CHA also sponsors the Welcome Home Wyoming program, which has provided down payment assistance to more than 625 new homeowners. Additionally, CHA sponsored the formation of the Wyoming Housing Partnership, a nonprofit organization with ownership interest in 88 units in Cheyenne, which CHA manages.

Actions planned during the next year to address the needs to public housing

During PY25, the City will not undertake any direct actions to address public housing needs. CHA, operating independently, is solely responsible for implementing the activities outlined in its own Annual and 5-Year Plans. However, the City has previously supported CHA, including providing CDBG assistance for HVAC upgrades during the 2020–2024 Con Plan period. While CHA did not apply for funding in the most recent grant cycle, the City remains open to assisting CHA with eligible projects in the future.

The Community Development Manager maintains regular communication with the CHA Director to stay informed about public housing needs and priorities. If specific needs are identified during the 2025–2027 Consolidated Plan period, and if funds are available, the City would consider amending the Consolidated Plan to support an eligible CHA project, provided a formal application is submitted and approved. The City's role is thus limited to supporting broader community development and responding to public housing needs as opportunities and resources allow, rather than directly managing or funding public housing activities.

Actions to encourage public housing residents to become more involved in management and participate in homeownership

CHA has implemented several initiatives to increase resident involvement in management and support pathways to homeownership for public housing residents. These initiatives focus on providing

opportunities for residents to participate in decision-making and develop skills for economic self-sufficiency.

One initiative is the Resident Advisory Council (RAC), which CHA encourages at each of its multifamily rental properties. The RAC serves as a forum for residents to provide feedback and discuss issues related to the operation of the public housing program. Through regular meetings, residents can raise concerns, suggest improvements, and participate in discussions about their communities.

CHA also offers the Family Self-Sufficiency (FSS) Program to participants in both the Housing Choice Voucher and Public Housing programs. The FSS Program provides resources and support for residents to work toward financial independence. This includes assistance with employment skills, household budgeting, and other tools to help participants achieve economic self-sufficiency and potentially move toward homeownership.

In addition, CHA provides ongoing training for both staff and residents. Staff members receive regular Fair Housing training, while tenants have access to workshops on topics such as housekeeping, being a good neighbor, and energy conservation. These trainings are intended to help residents maintain successful tenancies and contribute positively to their communities.

Alongside the efforts of CHA, the City of Cheyenne is actively working to involve residents and support community development. The Housing & Community Development Division recently surveyed seniors at the Senior Center to gather input on priority needs for the upcoming Consolidated Plan, ensuring that resident perspectives are included in local planning. The City also supports organizations like Habitat for Humanity and My Front Door, which offer programs such as financial literacy classes, homeownership counseling, and financial planning workshops. The Blue Boost Center is a wraparound service resource center who also provides financial literacy counseling. These programs are designed to help residents build financial stability and achieve homeownership.

Furthermore, the City has invested in an updated Analysis of Impediments to Fair Housing Study in collaboration with the University of Wyoming Center for Business & Economic Analysis. To share the findings, a public “lunch and learn” event was held, with plans to further disseminate the information and work with community partners on actionable steps in the coming year. Recommendations from the study will be incorporated into future annual action plans as the City continues to promote fair housing, financial empowerment, and inclusive community development for all residents.

If the PHA is designated as troubled, describe the manner in which financial assistance will be provided or other assistance

The Cheyenne Housing Authority (CHA) is currently designated as a Standard Public Housing Authority (PHA) and is not classified as "troubled." As a result, Community Development Block Grant (CDBG) financial assistance is not being allocated to CHA for the upcoming year.

AP-65 Homeless and Other Special Needs Activities – 91.220(i)

Introduction

The City of Cheyenne’s annual action plan for Program Year 2025 outlines a comprehensive, multi-faceted strategy to reduce and ultimately end homelessness in the community. Through targeted investments in outreach, emergency shelter, transitional housing, and supportive services, the plan addresses both immediate needs and the root causes of housing instability. Funding allocations from the Housing & Community Development Advisory Council and Community Development Block Grant (CDBG) support a range of initiatives, including job training for single mothers, digital literacy education, language interpretation for healthcare access, and meal delivery for vulnerable seniors. These efforts are complemented by infrastructure improvements and operational support for shelters serving individuals and families at risk of or experiencing homelessness.

By focusing on high-risk populations, such as single mothers, seniors, individuals with disabilities, and survivors of domestic violence, the City aims to prevent homelessness before it occurs and shorten the duration for those already unhoused. Despite challenges posed by limited federal resources, Cheyenne’s approach prioritizes the removal of barriers to stability, ensuring that the most vulnerable residents receive the support needed to achieve long-term housing security and independence.

Describe the jurisdictions one-year goals and actions for reducing and ending homelessness including reaching out to homeless persons (especially unsheltered persons) and assessing their individual needs

The Housing & Community Development Advisory Council has allocated funding to initiatives that will reduce or prevent homelessness. These initiatives address the need for job training, digital literacy education, language interruptive services for access to healthcare and meals for vulnerable populations.

Climb Wyoming’s Cheyenne program received 2025 funding to provide free job training and counseling to low-income single mothers. This initiative addresses the root causes of homelessness for this vulnerable group by empowering participants to secure stable, higher-wage employment and achieve self-sufficiency. Outcomes include a 91% full-time employment rate for graduates, with most participants doubling their wages within two years. At least 85% of enrollees are expected to successfully complete the program, and graduates report significant reductions in dependence on government benefits, including subsidized childcare, Medicaid, and SNAP. By targeting single mothers—

who head 20% of Laramie County households with children, 12% of whom live below the poverty line—the program proactively prevents homelessness for families at high risk.

CDBG funds support language interpretation services at HealthWorks, a federally qualified health center serving homeless individuals, people with disabilities, and those with special needs, regardless of their ability to pay. In 2024, 32% of HealthWorks' patients fell at or below 200% of the Federal Poverty Line, including many uninsured individuals. Enhanced communication with case managers helps address social determinants of health—such as housing, employment, and access to resources—critical for stabilizing those experiencing or at risk of homelessness.

Meals on Wheels was awarded funding to provide meals and outreach to about 300 seniors, most of whom live below the poverty line. The program specifically targets residents over 65 who receive SNAP benefits, helping their food assistance stretch further. Collaboration with hospitals, doctors, and other agencies ensures wrap-around services and holistic support for seniors at risk of homelessness.

The Digital Literacy Program for Adult Education at Laramie County Community College offers free digital skills training to low-to-moderate income residents, including the homeless, non-English speakers, and people with special needs. By equipping approximately 150 city residents with essential technology skills, the program enhances employability and economic stability, reducing the risk of homelessness.

Addressing the emergency shelter and transitional housing needs of homeless persons

The City is allocating Program Year 2025 funds to two projects that directly address the emergency shelter and transitional housing needs of homeless individuals and families.

Smith Manor Transitional Housing, operated by Community Action of Laramie County, offers 18 efficiency apartments for people experiencing homelessness, with a focus on supporting low- to moderate-income young adults (ages 18–24), seniors (62+), and individuals with special needs. Residents benefit from transitional housing paired with intensive case management, helping them work toward permanent housing and increasing self-sufficiency. The program is designed to provide a stable environment and support services that foster independence and long-term stability.

The Smith Manor Sidewalk Restoration project, funded with Program Year 2025 Community Development Block Grant (CDBG) funds, will repair and replace sidewalks and walkways used by residents to access their apartments. This investment improves safety and accessibility for all residents, including those with mobility challenges, and will have a lasting impact by enhancing quality of life and supporting long-term stability as residents transition out of homelessness.

Additionally, public service funds are allocated to a local domestic violence shelter to reimburse utility costs. This ensures the shelter remains operational for children, families, seniors, crime victims, and individuals with special needs, all of whom have incomes below 80% of the area median. The shelter serves approximately 60 clients per month, providing a safe environment and essential services for those who are in dangerous situations and facing immediate risk of homelessness.

Together, these projects utilize CDBG funding to address the emergency shelter and transitional housing needs of homeless individuals and families, supporting pathways to stability and self-reliance.

Helping homeless persons (especially chronically homeless individuals and families, families with children, veterans and their families, and unaccompanied youth) make the transition to permanent housing and independent living, including shortening the period of time that individuals and families experience homelessness, facilitating access for homeless individuals and families to affordable housing units, and preventing individuals and families who were recently homeless from becoming homeless again

The Smith Manor Sidewalk project supports Community Action of Laramie County (CALC), a key Cheyenne nonprofit dedicated to reducing homelessness and preventing these individuals from becoming homeless again by helping them to achieve self-sufficiency. CALC provides stable transitional housing and supportive services to chronically homeless individuals, veterans, young adults, and families, helping them move into permanent housing and independent living.

CALC's success is built on strong community partnerships that deliver wraparound services tailored to each client's needs. These collaborations connect clients with affordable housing and essential resources through organizations such as the Cheyenne Housing Authority, Department of Veterans Affairs, Volunteers of America Northern Rockies, Department of Family Services, local healthcare

providers, shelters, and various volunteer agencies.

Through these partnerships, CALC links residents to vital services including case management, healthcare, employment assistance, mental health counseling, and financial guidance. The City's allocation of Community Development Block Grant (CDBG) funds to Smith Manor strengthens CALC's transitional housing program, providing residents with a safe environment and the comprehensive support needed to build life skills and achieve self-sufficiency. This assistance helps residents plan for long-term stability and reduces the risk of returning homelessness.

CDBG funding for sidewalk repairs at Smith Manor also enhances the safety and accessibility of the property, ensuring residents can move about securely. These improvements help CALC maintain its financial commitments and continue delivering high-quality housing and support services to those in need.

Helping low-income individuals and families avoid becoming homeless, especially extremely low-income individuals and families and those who are: being discharged from publicly funded institutions and systems of care (such as health care facilities, mental health facilities, foster care and other youth facilities, and corrections programs and institutions); or, receiving assistance from public or private agencies that address housing, health, social services, employment, education, or youth needs.

The City's Housing & Community Development Division works closely with local clinics and service providers to identify and address gaps in healthcare, shelter, and supportive services. The City has allocated CDBG funds to cover essential utility costs for a local domestic violence shelter. This CDBG investment ensures that the shelter remains operational and able to provide a haven for children, families, seniors, crime victims, and individuals with special needs, all of whom are living below 80% of the area median income. The shelter serves approximately 60 clients each month, offering protection and essential services to those fleeing unsafe environments and facing the immediate risk of homelessness. By providing this support to the shelter, the City is assisting the shelter in supporting long-term stability for survivors and their children.

While limited federal funding sometimes restricts the ability to offer direct homelessness prevention services, and there are limited programs that directly serve extremely low-income individuals or those

being discharged from institutions, the City’s ongoing efforts, including shelter support, are designed to align with best practices for preventing homelessness among the most vulnerable.

AP-75 Barriers to affordable housing – 91.220(j)

Introduction:

After consulting with more than 30 community stakeholders, non-profits, and public agencies, the City of Cheyenne has developed thoughtful and achievable actions to address the negative impacts of public policies that create barriers to affordable housing. Building on recommendations from the Mayor's Affordable Housing Task Force, the City has made significant progress in updating the Unified Development Code to better support housing development. The Mayor, City Council, department directors, and staff recognize the challenges posed by the current housing shortage for Cheyenne's residents and businesses. They remain committed to collaborating with partners to accelerate housing development and expand the supply of affordable units in the community.

Actions it planned to remove or ameliorate the negative effects of public policies that serve as barriers to affordable housing such as land use controls, tax policies affecting land, zoning ordinances, building codes, fees and charges, growth limitations, and policies affecting the return on residential investment

Below are the actions the City of Cheyenne has planned for the 2025 Program Year to remove or reduce the negative effects of public policies that serve as barriers to affordable housing, such as land use controls, tax policies affecting land, zoning ordinances, building codes, fees and charges, growth limitations, and policies affecting the return on residential investment:

- Identify funding opportunities and provide technical support to affordable housing developers.
- Provide updates on Cheyenne's barriers to affordable housing development to state legislators and advocate for policies and funding that support affordable housing and economic development.
- Explore strategies to streamline local permitting and zoning processes.
- Develop public engagement tools to educate the community about city projects and initiatives, and to provide clear, consistent information to developers.
- Allocate CDBG funds to support infrastructure and facility upgrades for transitional housing, as well as housing for seniors and vulnerable populations.
- Participate in long-term planning meetings for affordable housing projects involving multiple stakeholders, with a focus on developing housing for vulnerable populations such as seniors and persons with disabilities.
- Explore innovative collaborations between public and private affordable housing developers and municipalities that result in impactful affordable housing development projects like Hope Springs in Greeley, CO.

AP-85 Other Actions – 91.220(k)

Introduction:

Each year, the Housing & Community Development (H&CD) Division works in partnership with the H&CD Advisory Council to assess community needs and establish funding priorities. This collaborative process includes public participation and consultation with local agencies to ensure that funding decisions reflect Cheyenne's current priority needs and goals. The CDBG application cycle typically begins in October with information sessions, followed by a single round of applications accepted in November. Applications are reviewed using a standardized scoring system, and funding recommendations are made in January. Funds are awarded to subrecipients and become available the following September.

For Program Year 2025, the H&CD Division is prioritizing projects that provide essential public services and infrastructure and public facility improvements. All funded activities for the 2025 Program Year are designed to benefit low- and moderate-income individuals or households.

These funded activities leverage limited CDBG Entitlement funds with local resources, maximizing the positive impact on Cheyenne residents' quality of life.

Any unused funds from a program year are carried forward and added to the next funding cycle, ensuring that all available resources are fully utilized to address the city's most pressing community development needs.

Actions planned to address obstacles to meeting underserved needs

The City plans to overcome obstacles to meeting the needs of underserved populations through a comprehensive, collaborative approach. All 2025 activities funded by the CDBG programs are intentionally designed to serve low- and moderate-income households, seniors, youth, victims of domestic violence, people experiencing homelessness, and other vulnerable groups. To maximize impact, the City is providing additional funding to activities that receive public service awards. Recognizing the federal 15% cap on public services, the City will contribute around \$35,000 annually during the 2025–2027 Consolidated Planning period, using designated H&CD Housing Program funds. This supplemental funding will enable more organizations to access critical resources and expand

services to those most in need.

The H&CD Division offers ongoing technical assistance to local nonprofits and agencies interested in applying for CDBG funds. This support continues throughout the grant management process, ensuring compliance with federal requirements and helping partner organizations build capacity. By assisting organizations in navigating regulatory requirements and overcoming administrative challenges, the City facilitates greater access to funding and encourages broader program participation.

Strong partnerships with city departments, local nonprofits, and service organizations are integral to identifying needs, coordinating services, and developing strategies to meet the needs of underserved populations. H&CD staff actively participate in local initiatives such as the Point-In-Time Count, the Laramie County Community Partnership Housing Task Force, and the WyoNAHRO Board to ensure alignment of efforts and effective resource leveraging. Ongoing communication and consultation with a broad range of stakeholders—including organizations serving individuals with disabilities (such as Magic City, HealthWorks, and CALC), those supporting people experiencing homelessness (including Safehouse, Comea, Family Promise, Needs, and the Unaccompanied Student Initiative), and additional partners such as Recover Wyoming, Habitat for Humanity, Climb Wyoming, and Laramie County Community College (LCCC)—ensure that program planning and implementation remain responsive to evolving community needs.

These coordinated actions reflect the City's ongoing commitment to evaluating performance, adjusting strategies, and leveraging partnerships to remove obstacles to meeting unserved needs and improve outcomes for Cheyenne's underserved residents.

Actions planned to foster and maintain affordable housing

The City is prioritizing the improvement and rehabilitation of public facilities, including transitional housing, housing for special needs populations, and shelters, in response to the growing demand for services that address homelessness and housing instability. For Program Year 2025 (PY25), the City has allocated \$60,000 to enhance sidewalks and accessibility at the Community Action of Laramie County's (CALC) Smith Manor Apartments. These transitional housing units support extremely low-income residents who are transitioning out of homelessness. In addition to managing the housing development, CALC provides Smith Manor residents with comprehensive wrap-around services to help them achieve self-sufficiency.

The City will also open a Supplemental or Mini Grant Cycle, offering up to \$259,000 for shovel-ready infrastructure and public facility projects that benefit low- and moderate-income (LMI) housing and

serve vulnerable populations. This additional grant cycle is made possible by reallocating funds returned by Habitat for Humanity of Laramie County, along with unspent funding from previous program years. The City is committed to the timely expenditure of federal funds and is excited to offer this bonus grant round to support much-needed improvements to facilities and infrastructure that impact LMI residents.

To further support these initiatives, the City has allocated CDBG funds to engage environmental review consultants with expertise in HUD CEST-level and Environmental Assessment (EA) reviews. These consultants will prepare HEROS reviews for each project, ensuring compliance with all regulatory requirements. By outsourcing these specialized reviews, the H&CD staff can dedicate more time to community engagement and inter-departmental collaboration, further strengthening the City's institutional capacity. By providing this support, the City hopes to encourage nonprofits and housing developers, who may have been hesitant to apply for CDBG funds due to environmental requirements, to participate in future grant cycles for housing rehabilitation and acquisition activities.

Actions planned to reduce lead-based paint hazards

H&CD Division policies require all HUD-funded projects to comply with federal standards for testing and remediation. Additionally, subrecipients must provide EPA Renovate Right information and actively educate clients and beneficiaries about the dangers of lead exposure and the importance of remediation. The City's Economic Resource Administrator and Community Development Manager plan to research potential federal funding for service line replacement, as well as other funding opportunities to establish a program that would replace lead lines for low- and moderate-income (LMI) homeowners. If funding sources are identified, the City will collaborate with the Cheyenne Board of Public Utility on this project.

Actions planned to reduce the number of poverty-level families

The City's plans to reduce the number of poverty-level families through providing employment training, digital literacy, support for survivors of domestic violence, and food security for seniors.

Climb Wyoming Employment Training

CDBG funds will continue to support Climb Wyoming, a statewide nonprofit that provides free, industry-specific job training and career placement for low- and moderate-income single mothers. The program's holistic approach includes not only technical and job skills training, but also mental health counseling and wraparound services such as childcare, transportation, and housing assistance. By equipping participants with marketable skills and supporting their transition into stable employment, Climb Wyoming directly addresses the root causes of poverty among single-parent families and helps break cycles of generational poverty.

Laramie County Community College (LCCC) ACES Program

CDBG funds have been allocated to provide free digital literacy and workforce development training. The Laramie County Community College Adult Career & Education Services (ACES) program offers free courses in basic literacy, high school equivalency preparation, English as a Second Language, and digital skills training. These programs are designed to help participants build foundational and advanced skills needed for higher-wage jobs in a digital economy, supporting long-term income growth and social mobility.

Shelter Utility Reimbursement

CDBG allocations will help cover essential operating costs for local domestic violence shelters. This shelter utility reimbursement support is critical for providing shelter that empowers survivors of domestic violence to achieve self-sufficiency.

Meals on Wheels and Food Pantry Support

The city directs CDBG funds to Meals on Wheels and local food pantries, ensuring that seniors and other low- and moderate-income residents have reliable access to nutritious food. These services help reduce the financial burden of grocery expenses, prevent malnutrition among seniors on fixed incomes, and support overall household stability.

Collectively, these initiatives represent a coordinated effort to address both the immediate needs and the underlying barriers faced by families experiencing poverty, with a focus on sustainable employment,

digital inclusion, housing stability, and food security.

Actions planned to develop institutional structure

The City of Cheyenne is committed to strengthening its institutional framework to more effectively deliver federal funds and support Wyoming residents. The City collaborates closely with internal staff and departments to continuously refine its delivery systems for federal programs, ensuring compliance and maximizing community impact.

Regional Collaboration and Best Practices

- H&CD Division staff actively participate in the HUD Region 8 User Group, a network of professionals from jurisdictions receiving HUD funding.
- This group facilitates the exchange of best practices and innovative strategies for managing federal grant funds efficiently.
- The Community Development Manager (CDM) contributes to the planning of quarterly Region 8 User Group meetings, helping to select presentation topics that equip municipalities and jurisdictions with practical tools to navigate complex HUD regulations.

Professional Development and Training

- The CDM is committed to ongoing professional development and plans to pursue additional training in areas such as Davis-Bacon certified payroll review, Build America, Buy America (BABA), and Section 3 compliance.
- These trainings are designed to enhance the City's capacity to meet federal requirements and ensure Actions planned to enhance coordination between public and private housing and social service agencies.

During the 2025 Program Year, the H&CD Division will implement several initiatives to strengthen collaboration between public and private housing and social service agencies:

WYNAHRO (Wyoming Chapter of NAHRO)

- Board Participation: Serve on the Board of Directors to provide leadership and strategic direction.
- Membership Drive & Statewide Meeting: Assist with the 2025 WyoNAHRO membership drive and help plan the statewide meeting.
- Resource Development: Set up resource links on the WyoNAHRO website to facilitate information sharing.
- Impact: These activities will enhance public and private housing efforts in Cheyenne and foster a

statewide network for sharing best practices and resources, ultimately benefiting Cheyenne's low- and moderate-income (LMI) housing situation.

Continuum of Care (CoC)

- Active Engagement: Attend and participate in CoC meetings, trainings, and forums.
- Data Committee: Serve on the CoC Data Committee to improve data-driven decision-making.
- Impact: These efforts will enhance coordination among multiple service organizations in Cheyenne that support unhoused individuals and families.

Point-in-Time (PIT) Count Committee

- Committee Service: Serve on the PIT Count Committee and assist in coordinating the 2026 PIT Count.
- Collaboration: Work closely with the City Compliance Department, Cheyenne Police Department, Laramie County, and various service organizations.
- Impact: This collaboration will improve data collection and service coordination for unhoused clients in Cheyenne.

Laramie County Community Partnership Housing Task Force

- Task Force Participation: Attend regular meetings and participate in coordinating initiatives.
- Agency Collaboration: Work with over twenty public and private housing and social service agencies.
- Impact: These partnerships will advance affordable housing solutions in Cheyenne and Laramie County.

Cheyenne Housing Authority (CHA)

- Ongoing Communication: Maintain regular communication with CHA regarding activities and initiatives.
- Focus Areas: Address the needs of low- to moderate-income individuals, special needs populations, and those experiencing homelessness.

Program Specific Requirements

AP-90 Program Specific Requirements – 91.220(l)(1,2,4)

Introduction:

The City of Cheyenne will not be receiving program income; therefore, there is no program income to report. It is estimated that 100% of CDBG funds for Program Year 2025, including those outlined in this Annual Action Plan, will be used for activities that benefit persons of low and moderate income.

Regarding the Overall Benefit requirement, the City anticipates that activities for Program Years 2025–2027 will benefit 100% low- and moderate-income (LMI) persons. This ensures that the required minimum overall benefit of 70% of CDBG funds used to benefit persons of low and moderate income will be met. The years covered by this Annual Action Plan are 2025, 2026, and 2027.

Community Development Block Grant Program (CDBG)

Reference 24 CFR 91.220(l)(1)

Projects planned with all CDBG funds expected to be available during the year are identified in the Projects Table. The following identifies program income that is available for use that is included in projects to be carried out.

1. The total amount of program income that will have been received before the start of the next program year and that has not yet been reprogrammed	\$0
2. The amount of proceeds from section 108 guarantees that will be used during the year to address the priority needs and specific objectives identified in the grantee's strategic plan.	\$0
3. The amount of surplus funds from urban renewal settlements	\$0
4. The amount of any grant funds returned to the line of credit for which the planned use has not been included in a prior statement or plan	\$0
5. The amount of income from float-funded activities	\$0
Total Program Income:	\$0

Other CDBG Requirements

1. The amount of urgently need activities	\$0
---	-----

2. The estimated percentage of CDBG funds that will be used for activities that benefit persons of low and moderate income. Overall Benefit - A consecutive period of one, two or three years may be used to determine that a minimum overall benefit of 70% of CDBG funds is used to benefit persons of low and moderate income. Specify the years covered that include this Annual Action Plan.
